Technology and particularly the Internet have caused many changes in the realm of politics.

Aspects of engineering, computer science, mathematics, or natural science can be applied to politics. Politicians

and candidates use their own websites and social network profiles to get their message out.

Revolutions in many countries in the Middle East and North Africa have started in large part due to social networking websites such as Facebook and

Twitter. Social networking has also played a role in protests and riots in numerous countries. The mainstream media no longer has a monopoly on political commentary as anybody can set up a blog or post a video online. Now,

This book investigates the effects of utilitarian and hedonic shopping behavior, drawing on original empirical research.

Consumers have been shown to shop in one of two ways: they are either mainly driven by fun,

Access Free 09

Chapter 4

Shodhganga

escapism, and
variety, or by need
and efficiency. While
previous literature has
focused on the drivers
of hedonic or
utilitarian shopping,
this book explores the
consequences of
these styles of
shopping and
addresses their
impact on perceived
value, money spent,

and willingness to return to the store in future. The author synthesizes theories from previous studies, applying them to two key retailing contexts – intensive distribution and selective distribution.

Ultimately, this book highlights the need for retailers to adopt a more consumer-

Access Free 09

based perspective to improve shopping experiences. It will prove useful for academics who want to gain a better understanding of hedonic and utilitarian behavior, and also offers practitioners with useful insights on how to target different customer segments.
