For readers interested in the development of major scientific concepts and the role of science in the western world, here is the first conceptually organized historical dictionary of scientific thought. The purpose of the dictionary is to illuminate this history by providing a concise, single volume reference book of short historical accounts of the important themes, ideas, and discoveries of science. Its conceptual approach differentiates the dictionary from previous reference works such as books of scientific biography and makes it a convenient manual both for the general reader and for scientists interested in the origin of concepts in their own and other scientific fields. Originally published in 1982. The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905.

A core text for Intro to Educational Technology courses. With its hallmark ASSURE technology integration model and classroom cases, this renowned text places readers squarely in the classroom while providing a framework that teaches them to apply what they learn about computers, multimedia, Internet, distance learning, and audio/visual technologies to the 21st Century classroom instruction. Filled with examples drawn from authentic elementary and secondary education situations, this text paints a vivid picture of technology and media enhancing and supporting teaching and learning. The ASSURE cases are supported by video, guided reflection prompts, and lesson plans that demonstrate strong technology integration and lesson planning. In addition to preparing educators with best practices to incorporate technology and media to meet the needs of 21st Century learners, the book includes strong coverage of copyright concerns, free and inexpensive media resources, as well as learning theory and instructional models. The tenth edition updates reflect the accelerating trend toward digitizing information and school use of technologies, especially in the Web 2.0 era. The tenth edition also addresses the interaction among the roles of teachers, technology coordinators, and school media specialists, all complementary and interdependent teams within the school.

The assessment of language learners is having a growing impact in English language teaching and applied linguistics. A formal evaluation of students writing abilities is important for language teachers in order to assess the pedagogical needs of their students. While there has been a considerable body of work undertaken on assessing the writing abilities of native speakers, the issues surrounding the assessment of second language learners writing abilities are still emerging. At present, no one volume has explored these issues and their implications for language teaching practitioners wishing to evaluate their students writing. This book outlines in an accessible manner the major tenets of research in the field and provide language teachers with guidelines to design and develop suitable writing assessment tasks for their students.

The new edition of this best-selling series combines comprehensive development and practice in the rhetorical modes while integrating instruction in reading, grammar, critical thinking, and vocabulary development. -Developing Composition Skills focuses students on narrating, describing, analyzing, comparing and contrasting, classifying, and evaluating at the paragraph level and offers a complete introduction that bridges the gap between the paragraph and the essay level. -Refining Composition Skills develops essay writing skills needed for success at the college level by thoroughly reviewing and presenting the following rhetorical modes: compare and contrast, example, classification, process analysis, cause and effect, and argument

ICCEDI is an international seminar that is held every two years organized by the Law and Citizenship Department, Faculty of Social Science Universitas Negeri Malang. The activities aim to discuss the theoretical and practical citizenship education that becomes needed for democracy in Indonesia and other countries with a view to build academic networks by gathering academics from various research institutes and universities. Citizenship education is an urgent need for the nation in order to build a civilized democracy for several reasons. Citizenship education is important for those who are politically illiterate and do not know how to work the democracy of its institutions. Another problem is the increasing political apathy, indicated by the limited involvement of citizens in the political process. These conditions show how citizenship education becomes the means needed by a democratic country like Indonesia. The book addresses a number of important issues, such as law issues, philosophy of moral values, political government, socio-cultural and Pancasila, and civic education. Finally, it offers a conceptual framework for future democracy. This book will be of interest to students, scholars, and practitioners, governance, and other related stakeholders.

This book analyses the relation between state and religion in Indonesia, considering both the philosophical underpinning of government intervention on religious life but also cases and regulations related to religious affairs in Indonesia. Examining state regulation of religious affairs, it focuses on understanding its origin, history and consequences on citizens' religious life in modern Indonesia, arguing that while Indonesian constitutions have preserved religious freedom, they have also tended to construct wide-ranging discretionary powers in the government to control religious life and oversee religious freedom. Over more than four decades, Indonesian governments have constructed a variety of policies on religion based on constitutional legacies interpreted in the light of the norms and values of the existing religious majority group. A cutting edge examination of the tension between religious order and harmony on one hand, and protecting religious freedom for all on the other, this book offers a cutting edge study of how the history of regulating religion has been about the constant negotiation for the boundaries of authority between the state and the religious majority group.

Contains geographical, political, and economic assessments for the British delegates to the 1919-1920 Paris Peace Conference.

Human beings have the unique ability to consciously reflect on the nature of the self. But reflection has its costs. We can ask what the self is, but as David Hume pointed out, the self, once reflected upon, may be nowhere to be found. The favored view is that we are encouraged to acquire many workplace skills through integrated and applied instruction so that mastering technical writing is relevant and exciting. Abundant model documents reflect Office 2007 formats and include questions providing critical thinking opportunities. This comprehensive text features an engaging writing style, student and real-world models, write-to-learn activities, expanded oral presentation coverage, and much more. TECHNICAL WRITING FOR SUCCESS 3E provides instruction on the less common documents not covered in general communication texts, e.g., proposals, news releases, science lab reports, and instructions. Chapter contents include technical research; writing for the Web; brief informative, brief investigative and recommendation reports; as well as technical reading. The GCBME Book Series aims to promote the quality and methodical reach of the Global Conference on Business Management & Entrepreneurship, which is intended as a high-quality scientific contribution to the science of business management and entrepreneurship. The Contributions are the main reference articles on the topic of each book and have been subject to a strict peer review process conducted by experts in the fields. The conference provided opportunities for the delegates to exchange new ideas and implementation of experiences, to establish business or research connections and to find Global Partners for future collaboration. The conference and resulting volume in the book series is expected to be held and appear annually. The year 2019 theme of book and conference is "Creating Innovative and Sustainable Value-added Businesses in the Disruption Era". The ultimate goal of GCBME is to provide a medium forum for educators, researchers, scholars, managers, graduate students and professional business persons from the diverse cultural backgrounds, to present and discuss their researches, knowledge and innovation within the fields of business, management and entrepreneurship. The GCBME conferences cover major thematic groups, yet opens to other relevant topics: Organizational Behavior, Innovation, Marketing Management, Financial Management and Accounting, Strategic Management, Entrepreneurship and Green Business.

AECT Design & Development Outstanding Book Award for 2008! Design and Development Research thoroughly discusses methods and strategies appropriate for conducting design and development research. Rich with examples and explanations, the book describes actual strategies that researchers have used to conduct two major types of design and development research: 1) product and tool research and 2) model research. Common challenges confronted by researchers in the field when planning and conducting a study are explored and procedural explanations are supported by a wide variety of examples taken from current literature. Samples of actual research tools are also presented. Important features in this volume include: concise checklists at the end of each chapter to give a clear summary of the steps involved in the various phases of a project; an examination of the critical types of information and data often gathered in studies, and unique procedures for collecting these data: examples of data collection instruments, as well as the use of technology in data collection; and a discussion of the process of extracting meaning from data and interpreting product and tool and model research findings. Design and Development Research is appropriate for both experienced researchers and those preparing to become researchers. It is intended for scholars interested in planning and conducting design and development research, and is intended to stimulate future thinking about methods, strategies, and issues related to the field.

Empowering Civil Society in the Industrial Revolution 4.0Proceedings of the 1st International Conference on Citizenship Education and Democratic Issues (ICCEDI 2020), Malang, Indonesia, October 14, 2020Routledge

An updated edition of the “penetrating study” examining how the current state of mass media puts our democracy at risk (Noam Chomsky). What happens when a few conglomerates dominate all major aspects of mass media, from newspapers and magazines to radio and broadcast television? After all the hype about the democratizing power of the internet, is this new technology living up to its promise? Since the publication of this prescient work, which won Harvard’s Goldsmith Book Prize and the Kappa Tau Alpha Research Award, the concentration of media power and the resultant “hypercommercialization of media” has only intensified. Robert McChesney lays out his vision for what a truly democratic society might look like, offering compelling suggestions for how the media can be reformed as part of a broader program of democratic renewal. Rich Media, Poor Democracy remains as vital and insightful as ever and continues to serve as an important resource for researchers, students, and anyone who has a stake in the transformation of our digital commons. This new edition includes a major new preface by McChesney, where he offers both a history of the transformation in media since the book first appeared; a sweeping account of the organized efforts to reform the media system; and the ongoing threats to our democracy as journalism has continued its sharp decline. “Those who want to know about the relationship of media and democracy must read this book.” –Neil Postman “If Thomas Paine were around, he would have written this book.” –Bill Moyers
