A woman diagnosed with dissociative identity disorder reveals her harrowing journey from abuse to recovery in this #1 New York Times bestselling autobiography written by her own multiple personalities. Successful, happily married Truddi Chase began therapy hoping to find the reasons behind her extreme anxiety, mood swings, and periodic blackouts. What emerged from her sessions was terrifying: Truddi's mind and body were inhabited by the Troops—ninety-two individual voices that emerged to shield her from her traumatizing childhood. For years the Troops created a world where she could hide from the pain of the ritualized sexual abuse she suffered at the hands of her own stepfather—abuse that began when she was only two years old. It was a past that Truddi didn't even know existed, until she and her therapist took a journey to where the nightmare began... Written by the Troops themselves, When Rabbit Howls is told by the very alter-egos who stayed with Truddi Chase, watched over her, and protected her. What they reveal is a spellbinding descent into a personal hell—and an ultimate, triumphant deliverance for the woman they became.

"How are you today?" the doctor asked. "I'm fine," was the reply. "But Sybil isn't. She was so sick she couldn't come. So I came instead." Sybil's diagnosis has since been called into question—but, forty years after it was first published, her story remains a gripping and disturbing account of one woman's struggle for mental stability and happiness. In SPQR, an instant classic, Mary Beard narrates the history of Rome "with passion and without technical jargon" and demonstrates how "a slightly shabby Iron Age village" rose to become the "undisputed hegemon of the Mediterranean" (Wall Street Journal). Hailed by critics as animating "the grand sweep and the intimate details that bring the distant past vividly to life" (Economist) in a way that makes "your hair stand on end" (Christian Science Monitor) and spanning nearly a thousand years of history, this "highly informative, highly readable" (Dallas Morning News) work examines not just how we think of ancient Rome but challenges the comfortable historical perspectives that have existed for centuries. With its nuanced attention to class, democratic struggles, and the lives of entire groups of people omitted from the historical narrative for centuries, SPQR will to shape our view of Roman history for decades to come.

A hundred years ago, any soapbox orator who called for women's suffrage, laws protecting the environment, an end to lynching, or a federal minimum wage was considered a utopian dreamer or a dangerous socialist. Now we take these ideas for granted—because the radical ideas of one generation are often the common sense of the next. We all stand on the shoulders of earlier generations of radicals and reformers who challenged the status quo of their day. Unfortunately, most Americans know little of this progressive history. It isn't taught in most high schools. You can't find it on the major television networks. In popular media, the most persistent interpreter of America's radical past is Glenn Beck, who teaches viewers a wildly inaccurate history of unions, civil rights, and the American Left. The 100 Greatest Americans of the 20th Century, a colorful and witty history of the most influential progressive leaders of the twentieth century and beyond, is the perfect antidote.

This volume presents over 200 selected original artworks from the collection of Betsy Beinecke Shirley, one of the great collectors of American children's literature. The artwork in Shirley's collection guides the reader on a tour through the stages of childhood reading, this volume begins with ABC's and nursery books. It continues through adventure stories, magazines, and more, then concludes with a miscellany section of odds and ends. The images demonstrate how children's books evolved, from the nation's first days of independence to modern times. Artists whose books are represented include many of the favorites, among them Ludwig Bemelmans, Maurice Sendak, A.B. Frost, Wanda Gág, Peter Newell, N.C. Wyeth, Tony Sarg, Robert Lawson, and Johnny Gruelle.

The concept of Identity Crisis came into usage in the 1940s and it has continued to dominate the cultural zeitgeist ever since. In his exploration of the historical origins of this development, Frank Furedi argues that the principal driver of the 'crisis of identity' was and continues to be the conflict surrounding the socialisation of young people. In turn, the politicisation of this conflict provides a terrain on which the Culture Wars and the politicisation of identity can flourish. Through exploring the interaction between the problems of socialisation and identity, this study offers a unique account of the origins and rise of the Culture Wars.

Translation is at the heart of psychoanalysis: from unconscious to conscious, experience to verbal expression, internal to enacted, dream thought to dream image, language to interpretation, unrepresented to represented and transference of past to present. The book's first part discusses the question of translation, literal and metaphoric. Both linguistic and cultural translations are closely tied to specific and significant personalities who worked in the early history of psychoanalysis and the history of the IP. There was a close relationship between the IP and the visual arts via the Bloomsbury Group. The link between the visual arts and the IP is indeed to be found in its logo, which is taken from a painting by Ingres. The second part of the book approaches transformations between psychoanalysis and the arts from the conscious, unconscious and non-represented elements into non-verbal modes, specifically visual, poetic and musical; it also looks at the developments and transformations in psychoanalytic ideas about artistic expression as expressed within the pages of the IP. This book will be of great interest to psychoanalysts and psychotherapists, and to those interested in the history of psychoanalysis and the IP.

One of the 20th century's enduring works, One Hundred Years of Solitude is a widely beloved and acclaimed novel known throughout the world, and the ultimate achievement in a Nobel Prize-winning career. The novel tells the story of the rise and fall of the mythical town of Macondo through the history of the Buendia family. It is a rich and brilliant chronicle of life and death, and the tragicomedie of humankind. In the noble, ridiculous, beautiful, and tawdry story of the Buendia family, one sees all of humanity, just as in the history, myths, growth, and decay of Macondo, one sees all of Latin America. Love and lust, war and revolution, riches and poverty, youth and senility -- the variety of life, the endlessness of death, the search for peace and truth -- these universal themes dominate the novel. Whether he is describing an affair of passion or the voracity of capitalism and the corruption of government, Gabriel García Márquez always writes with the simplicity, ease, and purity that are the mark of a master. Alternately reverential and comical, One Hundred Years of Solitude weaves the political, personal, and spiritual to bring a new consciousness to storytelling. Translated into dozens of languages, this stunning work is no less than an accounting of the history of the human race.

Since 1619, when Africans first came ashore in the swampy Chesapeake region of Virginia, there have been many individuals whose achievements or strength of character in the face of monumental hardships have called attention to the genius of the African American people. This book attempts to distill from many wonderful possibilities the 100 most outstanding examples of greatness. Pioneering scholar of African American Studies Molefi Kete Asante has used four criteria in his selection: the individual's significance in the general progress of African Americans toward full equality in the American social and political system; self-sacrifice and the demonstration of risk for the collective good; unusual will and determination in the face of the greatest danger or against the most stubborn odds; and personal achievement that reveals the best qualities of the African American people. In adopting these criteria Professor Asante has sought to steer away from the usual standards of popular culture, which often elevates the most popular, the wealthiest, or the most photogenic to the cult of celebrity. The individuals in this book - examples of lasting greatness as opposed to the ephemeral glare of celebrity fame - come from four centuries of African American history.Each entry includes brief biographical information, relevant dates, an assessment of the individual's place in African American history with particular reference to a historical timeline, and a discussion of his or her unique impact on American society. Numerous pictures and illustrations will accompany the articles. This superb reference work will complement any library and be of special interest to students and scholars of American and African American history.

Human attitudes towards other species are inevitably complex. We love the dog and eat the pig, or, we love the bison and eat the bison. Who exactly are these fellow creatures? The newest science from anthropology, psychology, and zoology can help us figure out some answers to that question by showing us how the animals we eat-- for some the octopus or the chimpanzee, for many others the chicken and the goathink, feel, and act as distinct individual beings. Who are we eating? In this insightful exploration of the animals that humans consume, Barbara King does not tell us what or whom we should be eating, but rather she invites us to a smorgasbord of thought and reflection on the sentence and behaviors of the consumed. By getting to know these animals better, we can begin to taste the different ways they experience the world with awareness and intention, and it brings greater connection between us and those animals than we encounter in shrink-wrapped grocery-store products. This book shows us how valuable it is to understand who we eat, no matter how varied that consumption is. From octopi to crickets to chimpanzees, the animals we consume deserve a better appreciation from all who encounter them in a culinary context, and there is no host of this scale in and behavioral feast than Barbara King. According to the federal Office of Minority Health, African Americans " are affected by serious diseases and health conditions at far greater rates than other Americans. " In fact, African Americans suffer an estimated 85,000 excess deaths every year from diseases we know how to prevent: heart disease, stroke, cancer, high blood pressure, and diabetes. In this important and accessible book, Dr. Michelle Gourdine provides African Americans with the knowledge and guidance they need to take charge of their wellbeing. Reclaiming Our Health begins with an overview of the primary health concerns facing African Americans and explains who is at greatest risk of illness.

Expanding on her career and life experiences as an African American physician, Dr. Gourdine presents key insights into the ways African American culture shapes health choices—how beliefs, traditions, and values can influence eating choices, exercise habits, and even the decision to seek medical attention. She translates extensive research into practical information and presents readers with concrete steps for achieving a healthier lifestyle, as well as strategies for navigating the health-care system. This interactive guide with illustrations is a vital resource for every African American on how to live a healthier and more empowered life, and an indispensable handbook for health-care providers, policy makers, and others working to close the health gap among people of color. Says Gourdine, " I wrote this book to empower our community to solve our own health problems and save our own lives. "

DIVThs briskly told history of Reformed Protestantism takes these churches through their entire 500-year history—from sixteenth-century Zurich and Geneva to modern locations as far flung as Seoul and São Paulo. D. G. Hart explores specifically the social and political developments that enabled Calvinism to establish a global presence. /divDIVHart's approach features significant episodes in the institutional history of Calvinism that are responsible for its contemporary profile. He traces the political and religious circumstances that first created space for Reformed churches in Europe and later contributed to Calvinism's expansion around the world. He discusses the effects of the American and French Revolutions on ecclesiastical establishments as well as nineteenth- and twentieth-century communions, particularly in Scotland, the Netherlands, the United States, and Germany, that directly challenged church dependence on the state. Raising important questions about secularization, religious freedom, privatization of faith, and the place of religion in public life, this book will appeal not only to readers with interests in the history of religion but also in the role of religion in political and social life today./div

Our previous three books were well received, and we decided to write this fourth book "100 Great Personalities and their Quotations". This book is based on my collection, over many years, of quotations from many personalities. To be easy to read, the book is divided in five Chapters, and the personalities are listed in chronological order, with the name followed by the year of birth and the oldest age. At the end of the book there is an Addendum with some of my ideas and an Alphabetical Index of the personalities. There are included pictures from our travels to Rome, Italy, and other cities. I want to thank my wife Sophia for her continuous help.Let's remember what Cicero told us more than 2050 years ago:A home without books is a body without soul.

Selected by the Modern Library as one of the 100 best nonfiction books of all time From the Modern Library ' s new set of beautifully repackaged hardcover classics by Truman Capote—also available are Breakfast at Tiffany ' s and Other Voices, Other Rooms (in one volume), Portraits and Observations, and The Complete Stories Truman Capote ' s masterpiece, In Cold Blood, created a sensation when it was first published, serially, in The New Yorker in 1965. The intensively researched, atmospheric narrative of the lives of the Clutter family of Holcomb, Kansas, and of the two men, Richard Eugene Hickock and Perry Edward Smith, who brutally killed them on the night of November 15, 1959, is the seminal work of the " new journalism. " Perry Smith is one of the great dark characters of American literature, full of contradictory emotions. " I thought he was a very nice gentleman, " he says of Herb Clutter. " Soft-spoken. I thought so right up to the moment I cut his throat. " Told in chapters that alternate between the Clutter household and the approach of Smith and Hickock in their black Chevrolet, then between the investigation of the case and the killers ' flight, Capote ' s account is so detailed that the reader comes to feel almost like a participant in the events.

"It is rare to see a publication which includes personalities from both Shia and Sunni schools of thought and which is so much needed in today's turbulent world. This book, I believe will . . . enrich our understanding of not only the historical but the contemporary history of the Muslim."—Ahmed J. Versi, chief editor of The Muslim News (London) Who have been the Muslim world's most influential people? What were their ideas, thoughts, and achievements? In one hundred short and engaging profiles of these extraordinary people, fourteen hundred years of the world's rich history of the Muslim world is unfolded. For anyone interested in getting an intimate view of Islam through its kings and scholars, generals and sportsmen, architects and scientists, and many others—this is the book for you. Among those profiled are the Prophet Muhammad, the Caliph Umar, Imam Husain, Abu Hanifa, Harun al-Rashid, al-Khwarizmi, al-Ghazali, Saladin, Rumi, Ibn Battuta, Sinan, Ataturk, Iqbal, Jinnah, Ayatollah Khomeini, Malcolm X, and Muhammad Ali.

Fiction. Translated from the Italian by William Weaver. Luigi Pirandello's extraordinary final novel begins when Vitangelo Moscarda's wife reminds that Vitangelo's nose tilts to the right. This commonplace interaction spurs the novel's unemployed, wealthy narrator to examine himself, the way he perceives others, and the ways that others perceive him. At first he only notices small differences in how he sees himself and how others do; but his self-examination quickly becomes relentless, dizzying, leading to often darkly comic results as Vitangelo decides that he must demolish that version of himself that others see. Pirandello said of his 1926 novel that it "deals with the disintegration of the personality. It arrives at the most extreme conclusions, the farthest consequences." Indeed, its unerring humor and existential dissection of modern identity find counterparts in Samuel Beckett's Molloy trilogy and the works of Thomas Bernhard and Vladimir Nabokov.
