This publication is a result of the joint conference held by MATSDA and Fontys University of Applied Sciences, the Netherlands, in Tilburg in June 2017. MATSDA is an international materials development association founded in 1993 which serves to bring together researchers, teachers, materials developers and publishers in an effort to improve the effectiveness of language learning materials. The 2017

conference centred on issues related to the development of meaning-focused materials for language learning, and attracted presenters from twenty-five countries stretching from Greenland to Brazil. These issues are reflected in the chapters in this volume, with each one focusing on a different aspect of meaning-focused materials and many of them introducing the reader to previously unexplored facets of the theory of meaning-focused instruction and its application to materials development. The contributions here are of essential value to post-graduate students, to teachers, to materials developers and to researchers. They are written to be academically rigorous, but at the same time accessible to newcomers to the field and to experienced experts alike.

Emergency Response Guidebook

Following the success of my site <http://www.RaiseYourBrain.com> and numerous requests from readers, I decided to compile some of the most interesting facts in an e-book. That's why I decided to collect the best gems of breath-taking trivia and to present you a great compilation of facts, suitable for a broad audience. This is the result of years of sifting through history and reference books on a myriad of subjects as well as searching the Internet and paying attention to the news. This book is intended to be fun for anyone older than 14 - even the most 'spicy' entries, neatly separated in the chapter 'Facts about human and animal sexuality,' remain factual and abstain from profanity. To my greatest delight, an avid reader of

my site explained that she has been preparing daily fact sheets for her son's lunch box. She prints out three facts every day to create some lunchtime fun for her son, thus enticing him to read more and provoking his intellectual curiosity. I wish my parents had done something like that for me! I confess that most trivia books are insufferably boring. This book is different, packed with interesting, educational and fun ingredients; it seeks to entertain as well as challenge. It will provide you with never-ending intellectual ammunition for a lifetime of dinner parties. You will amaze your friends and family by recounting to them that the greatest Chinese pirate of all times was a woman, or that herrings use flatulence to communicate! The book will be your strongest ally in combatting social awkwardness and will arm you with plenty of icebreaking pieces of trivia, suitable for any occasion.

These collections of the official past papers of the GCE O Level Examinations from the University of Cambridge International Examinations has been developed for students of GCE O level. These books will act as tools for preparation and revision for students. These books have an edited Answer Guide for each paper based on the marks scheme written by CIE Principal

House of Lords official report

This innovative book contributes to a paradigm shift in the study of creole languages, forging new empirical frameworks for understanding language and culture in sociohistorical contact. The authors bring together archival sources to challenge dominant linguistic theory and practice and engage issues of power, positioning marginalized indigenous peoples as the center of, and vital agents in, these languages' formation and development. Students in language contact, pidgins and creoles, Caribbean studies, and postcolonial studies courses—and scholars across many disciplines—will

benefit from this book and be convinced of the importance of understanding creoles and creolization.

Vols. for 1898-1968 include a directory of publishers.

At the end of the Second World War, Britain had the highest incidence of lung cancer in the world. For the first time lung cancer deaths exceeded those from tuberculosis - and no one knew why. On 30 September 1950, a young physician named Richard Doll concluded in a research paper that smoking cigarettes was 'a cause and an important cause' of the rapidly increasing epidemic of lung cancer. His historic and contentious finding marked the beginning of a life-long crusade against premature death and the forces of 'Big Tobacco'. Born in 1912, Doll, a natural patrician, jettisoned his Establishment background and joined the Communist Party as a reaction to the 'anarchy and waste' of capitalism in the 1930s. He treated the blistered feet of the Jarrow Marchers, served as a medical officer at the retreat to Dunkirk, and became a true hero of the NHS. A political revolutionary and an epidemiologist with a Darwinian heart-of-stone, Doll fulfilled

his early ambition to be 'a valuable member of society'. Doll steered a course through a minefield of medical and political controversy. Opponents from the tobacco industry questioned his science, while later critics from the environmental lobby attacked his alleged connections to the chemical industry. An enigmatic individual, Doll was feared and respected throughout a long and wide-ranging scientific career which ended only with his death in 2005. In this authorised and groundbreaking biography, Conrad Keating reveals a man whose life and work encapsulates much of the twentieth century. Described by the British Medical Journal as 'perhaps Britain's most eminent doctor', Doll ushered in a new era in medicine: the intellectual ascendancy of medical statistics. According to the Nobel laureate Sir Paul Nurse, his work, which may have prevented tens of millions of deaths, 'transcends the boundaries of professional medicine into the global community of mankind.' 'A well-crafted biography of Doll, [who] single-handedly saved millions of lives with his findings.' - New Scientist 'As this fascinating and fair-minded biography makes

clear, while Doll's political instincts were radical, he was nevertheless a conservative scientist, always cautious in causal inference. . . Impressive and engaging.' - International

The New Cambridge Bibliography of English Literature: Volume 5, Index

Report of the Council of Trustees

A classified world list of new papers in pure chemistry.

In this classic of esoteric literature, a clairvoyant examines the spiritual

force centers in our body.

This is the second of two Library of America volumes (the companion volume here) presenting, in compact form, all seven parts of Francis Parkman's monumental narrative history of the struggle for control of the American continent. Thirty years in the writing, Parkman's "history of the American forest" is an accomplishment hardly less awesome than the explorations and adventures he so vividly describes. The story reaches its climax with the fatal confrontation of two great commanders at Quebec's Plains of Abraham—and a daring stratagem that would determine the future of a continent. Count Frontenac and New France under Louis XIV (1877) details how France might have won her imperial struggle with England. Frontenac, a courtier who was made governor of New France by that most sagacious of monarchs, oversaw the colony's brightest era of growth and influence. Had Canada's later governors possessed his administrative skill and personal force, his sense of diplomacy and political talent, or his grasp of the uses of power in a modern world, the English colonies to the south might have become part of what Frontenac saw as a continental scheme of French dominion. England's American colonies flourished, while France, in both the Old World and the New, declined from its greatness of the late seventeenth century. Conflict over the developing

western regions of North America erupted in a series of colonial wars. As narrated by Parkman in A Half-Century of Conflict (1892), these American campaigns, while only part of a larger, global struggle, prepared the colonies for the American Revolution. In Montcalm and Wolfe (1884) Parkman describes the fatal confrontation of the two great French and English commanders whose climactic battle marked the end of French power in America. As the English colonies cooperated for their own defense, they began to realize their common interests, their relative strength, and their unique position. In this imperial war of European powers we also begin to see the American figures—Benjamin Franklin, George Washington—soon to occupy a historical stage of their own. LIBRARY OF AMERICA is an independent nonprofit cultural organization founded in 1979 to preserve our nation’s literary heritage by publishing, and keeping permanently in print, America’s best and most significant writing. The Library of America series includes more than 300 volumes to date, authoritative editions that average 1,000 pages in length, feature cloth covers, sewn bindings, and ribbon markers, and are printed on premium acid-free paper that will last for centuries. More than fifty specialists have contributed to the new edition of volume 5 of the Cambridge Bibliography of English Literature. The design of the original work has established itself so firmly as a workable solution to the immense problems of analysis, articulation and coordination that it has been retained in all its essentials for the new edition. The task of the new contributors has been to revise and integrate the lists of 1940 and 1957, to add materials of the following decade, to correct and refine the bibliographical details already available, and to re-shape the whole according to a new series of conventions devised to give greater clarity and consistency to the entries.
