Indian English, or rather, the forms of English used in India, have long been a topic of interest for laymen and scholars. For generations, the 'exotic' nature of the transplanted language was commented on, often ridiculed as a matter of unintentional comic. It was only from the 1960s onwards that the local forms of English were recognized for what they are – adaptations of the world language to local needs, and varying to an enormous degree, depending on the speakers' (and writers') education and the uses they make of the language. This acknowledgement came mainly from abroad (and still does); Indians are much less willing to admit to the variation and its communicative functions in the country. Therefore, standard English (if possible in its classical British form) is generally favoured, together with formal written uses often based on the stylistic models provided by English literature from Shakespeare to Dickens. R.R. Mehrotra was one of the first to see the need for a proper sociolinguistic description of the Indian situation, and the forms and functions of English in this complex set-up. He has for a long time collected and analysed the huge range of English around him, with the aim of publishing a collection of texts that reflects the variation within the country along various dimensions, historical, regional, ethnic, social and stylistic. The present collection of texts is typical in many ways, evoking in the content, style and grammatical forms the contexts in which English functions; notes help to put the excerpts into the proper frame to make them intelligible to outsiders.

This two volume handbook provides a comprehensive examination of policy, practice, research and theory related to English L Teaching in international contexts. More than 70 chapters highlight the research foundation for best practices, frameworks for decisions, and areas of consensus and controversy in second language acquisition and pedagogy. The Handbook provides a unique resource for policy makers, educational administrators, and researchers concerned with meeting the increasing demand for English language teaching. It offers a strongly socio-cultural view of language learning and teaching. It is comprehensive and multi-perspective with a range of fresh new voices in English language teaching research.

The book has been designed topic and subtopic-wise, keeping the students' needs in mind. The current edition has certain unique features: Each chapter starts with a To Do list. It gives the central idea of the chapter and the way it has been addressed. Each chapter is divided into several sections corresponding to different components of the syllabus. Each chapter is splashed with HOTS. To promote clarity of the basics. Focus Zones in each chapter present a crux of the concepts. Blocks in each chapter include material of special significance. Power Points and Revision Window offer a quick glance of the subject matter. 'Exercise' is tuned to the preparation for examination. Answers to important questions focus on the technique of writing. The exercise includes: objective type questions (remembering & understanding based questions), divided into five sections: (a) multiple choice questions, (b) fill in the blanks, (c) true or false, (d) matching the correct statements, (e) 'very short answer' objective type questions reason-based questions HOTS questions applications analysis & evaluation CBSE questions (with answers or reference to the text for answers) NCERT questions (with answers) miscellaneous and add-on questions (with hints or reference to the text for answers) Dos and Don'ts (at the end of each chapter) should serve as a safeguard against misinterpretation of the concepts. Ability Zone is a uniquely designed section at the end of the chapter. This raises the difficulty level, of course, but should serve as a useful material for the outstanding learners. Solved and Unsolved numericals are given to boost a grip on the subject.

Dadra & Nagar Haveli, Silvassa. series-27

Constitution of the Earth's Interior discusses the physical and evolutionary principles connecting various elements of the knowledge about structure and dynamics of the Earth's interior. This work is divided into eight chapters that primarily focus on the physical, chemical, and petrological state. This text contains general data on a general stationary model, which is described by equations of state combining the basic parameters, including pressure, temperature, density, gravity acceleration, and mineral composition within the Earth's interior. Considerable chapters concern the chemical and petrological composition of the matter in the Earth's interior. The remaining chapters describe models containing inhomogeneities used to illustrate processes connected with phase transitions. This book will be of great value to geologists, physicists, and researchers.

Global Media Giants takes an in-depth look at how media corporate power works globally, regionally, and nationally, investigating the ways in which the largest and most powerful media corporations in the world wield power. Case studies examine not only some of the largest media corporations (News Corp., The Microsoft Corporation) in terms of revenues, but also media corporations that hold considerable power within national, regional, or geolinguistic contexts (Televisa, The Bertelsmann Group, Sony Corporation). Each chapter approaches a different corporation through the lens of economy, politics, and culture, giving students and scholars a thoughtful and data-driven guide with which to interrogate contemporary media industry power.
