Contributions examine the relationship between cognitive linguistics and visual elements as well as interrogate the controversial claim about the status of comics as a language. The book argues that comics tell us a great deal about the sociocultural realities of language, exploring what code switching, language contact, dialect, and linguistic variation can tell us about identity — from the imagined and stereotyped to the political and real.

This book is about teaching in classrooms where some or all of the students are learning English, at the same time as they are working to learn the mainstream curriculum.

It was a dark and stormy night in Santa Barbara. January 19, 2017. The next day's inauguration drumroll played on the evening news. Huddled around a table were nine Corwin authors and their publisher, who together have devoted their careers to equity in education. They couldn't change the weather, they couldn't heal a fractured country, but they did have the power to put their collective wisdom about EL education upon the page to ensure our multilingual learners reach their highest potential. Proudly, we introduce you now to the fruit of that effort: *Breaking Down the Wall: Essential Shifts for English Learners' Success*. In this first-of-a-kind collaboration, teachers and leaders, whether in small towns or large urban centers, finally have both the research and the practical strategies to take those first steps toward excellence in educating our culturally and linguistically diverse children. It's a book to be celebrated because it means we can throw away the dark glasses of deficit-based approaches and see children who come to school speaking a

different home language for what they really are: learners with tremendous assets. The authors' contributions are arranged in nine chapters that become nine tenets for teachers and administrators to use as calls to actions in their own efforts to realize our English learners' potential: 1. From Deficit-Based to Asset-Based 2. From Compliance to Excellence 3. From Watering Down to Challenging 4. From Isolation to Collaboration 5. From Silence to Conversation 6. From Language to Language, Literacy, and Content 7. From Assessment of Learning to Assessment for and as Learning 8. From Monolingualism to Multilingualism 9. From Nobody Cares to Everyone/Every Community Cares Read this book; the chapters speak to one another, a melodic echo of expertise, classroom vignettes, and steps to take. To shift the status quo is neither fast nor easy, but there is a clear process, and it's laid out here in *Breaking Down the Wall*. To distill it into a single line would go something like this: if we can assume mutual ownership, if we can connect instruction to all children's personal, social, cultural, and linguistic identities, then all students will achieve.

Boost achievement for English learners in all subject areas! Building ELLs' language skills while teaching content is about to get easier. Hollingsworth and Ybarra combine the best of educational theory, brain research, and data analysis to bring you explicit direct instruction (EDI): a proven method for creating and delivering lessons that help students learn more and learn faster.

Through classroom examples and detailed sample lessons, you'll learn how to: Craft lessons that ELs can learn the first time they're taught Check for understanding throughout each lesson Embed vocabulary development across the curriculum Address listening, speaking, reading, and writing in all lessons

Its unique approach to teaching content area literacy actively engages preservice and practicing teachers in reading and writing the very activities that they will use to teach literacy to their own students in middle and high school classrooms. Rather than passively learning about strategies for incorporating content area literacy activities, readers get hands-on experience in such techniques as mapping/webbing, anticipation guides, booktalks, class websites, and journal writing and reflection. Readers also learn how to integrate children's and young adult literature, print resources, biographies, essays, poetry, and online content, communities, and websites in their classrooms. Each chapter offers concrete teaching examples and practical suggestions that make literacy relevant to students' content area learning. Instagram egg. From the time we roll out of bed to check overnight updates to our last likes, and views of the previous day, we're consuming and producing content. But what does the term "content" even mean? When did it become ubiquitous? And at what cost? In this volume in the MIT Press Essential Knowledge series, Kate Eichhorn offers a concise introduction to content and the content industry, examining the far-reaching effects of content on culture, politics, and labor in a digital age. Eichhorn traces the evolution of our current understanding of content from the early internet to the current social media landscape. A quintessential example of content, she says, is the Instagram egg—an image that imparts information or knowledge and circulated simply for the sake of circulation. Eichhorn explores what differentiates user-generated content from content produced by companies (although often undercompensated) workers; examines how fields from art and literature to journalism and politics have weathered the rise of the content industry; and investigates the increasing importance of artists' "content capital"—the ability of artists, writers, and performers to produce content not about their work but about their status as artists. "This is book has been written for the literacy specialist, coach, interventionist, classroom teacher, or other educators who work to support Pre-K through grade 12 students' language and literacy development.
