

1953 Lincoln Power Steering Gear Box

Lincoln's heritage is as rich as that of any car built anywhere in the world, and more impressive than all but a few. Generations of Americans have known it as the Car of Presidents; since the days of Franklin Roosevelt, the White House has exhibited a marked preference for Lincolns. This comprehensive, illustrated history describes in detail the successes and failures of the Lincoln from World War II up to the present-day Aviator. It discusses the forces in the market and in Ford Motor Company that have affected the Lincoln, and is a must read for anyone interested in this classic marque.

Cars We Love

FABULOUS FORDS From Model T's to T-Birds, from "woodie" wagons to Mustangs, Ford Motor Company has built them all. And in the process, it has amassed a huge fan base of car buffs who grew up on Ford and continue to admire and collect FoMoCo cars today. Everybody, it seems, has a story to tell about their favorite Ford. In Just Fords, you'll find a collection of profiles, feature stories, and memories of some truly great Fords that are still around today. More than 30 chapters highlight some of the best machines Ford ever built, and remind us how Ford has blazed its own trail for more than 100 years.

Blue Collar Classics and Collector Favorites

This e-book details the most interesting and important characteristics of the automobiles, car maintenance, styling features, car body style, the standard classification of the cars, an history of the automobiles, introduction in the automotive industry, and the traffic code, rules and signs. An automobile, usually called a car (an old word for carriage) or a truck, is a wheeled vehicle that carries its own engine. Older terms include horseless carriage and motor car, with "motor" referring to what is now usually called the engine. It has seats for the driver and, almost without exception, for at least one passenger. The automobile was hailed as an environmental improvement over horses when it was first introduced. Before its introduction, in New York City, over 10,000 tons of manure had to be removed from the streets daily. However, in 2006 the automobile is one of the primary sources of worldwide air pollution and cause of substantial noise and health effects.

The Motor

From the foreword: ". . . these cars aren't rare or unique, but they have other things going for them. Sometimes they were the subject of amazing restorations or rescue efforts. Sometimes, against all odds, they remained in one family for generations, or were babied to extremes and today have ridiculously low totals on their odometers. These are the cars that have stories. They might not have been amazing when they were new, but they are unique now because of the lives they've lived and the owners who have sat in their driver's seats. They've got history, and if they could talk, what

amazing tales they could tell us!"
