Lani Gerity shows in this book that puppet-making, incorporating both art and narrative, provides an ideal vehicle for therapeutic work. It is particularly valuable in the treatment of dissociative patients, whose symptoms may include disturbances in body image, a dissociated sense of self, a disrupted sense of history and causality, and a feeling of alienation from the self. Lani Gerity explores the application of this in the context of object relations theory. She shows the creative process working on many levels for dissociative individuals and groups. Making puppets, three-dimensional representations of the human body, helped one patient to integrate her sense of her body image and herself. Using puppets and creating narratives about them encourages patients to build communities and to release themselves from the hold of the trauma of their pasts. Descriptions and analyses of Gerity's work with dissociative patients in the US and Canada is underpinned by a theoretical framework which encompasses theories from the arts therapies and from psychiatry.

Thinking about laser eye surgery? Tired of glasses and contacts? Take a look at this easy-to-follow, step-by-step method for improving poor vision. Hackett's innovative self-help guide includes a basic 12-week program of simple routines and drills that are recommended for correcting nearsightedness, farsightedness, crossed eyes, color-blindness, glaucoma, cataracts, and other serious eye problems. Incorporating Dr. William H. Bates' treatment of systematic exercise and training — techniques generally applied in treating and rehabilitating handicapped patients — the text suggests that relaxation, eyesight training, and skillful use of psychological factors are important elements that can possibly lead to improved eye functions. Bates, a practicing New York City ophthalmologist, first demonstrated his method of improving defective vision in the 1920s. Since then, thousands of people have been helped by methods devised by the doctor and his pupils. A useful aid for anyone experiencing problems with their vision, this practical guide will also be of value to healthcare specialists.

Everet has found his perfect place in the nest. As a raven, he's ideally suited to his new role in the nest's security flock. Some of the jobs it entails have been far more enjoyable than others, but when he's called to retrieve a magpie, who's got himself into trouble in a local human club, it becomes a

truly life changing experience. Magpie shifters have always been looked down on by other avians. Just as attracted to shiny things in their human bodies as they are in their avian forms, everyone knows they'll do anything for money-and they're not above stealing what they can't get by more honest means. Kane knows what being a magpie means, and he's got the bruises to show for it. When Everet rescues him from his latest scrape, Kane knows better than to believe the raven will actually take an interest in him and his welfare, but it's just possible that Everet is different to any other man Kane has ever met. Please Note: This book is best read in order as part of the Avian Shifters series. The previous stories are Duck! and Celebrate. With Valerie's mate back in her arms and her pregnancy well under way, she thought she should be able to simply enjoy some peace and quiet. Should is the operative word, and Trey and Valerie couldn't even enjoy a relaxing flight over the desert without finding trouble. Vampires, and they weren't any she recognized. Where they came from and why they were in the middle of the desert, out in the open with daylight on the way, were only two of the many questions she had for them. The answers will take half-vampire/half-witch Valerie Hanigan and her dragon-shifting mate, Trey, on a journey they never contemplated and in no way felt ready for. Life, however, has a way of forcing issues, pushing for more, and presenting Valerie with a vicious life lesson when warnings aren't heeded.

This book investigates the reappearance of the 19th-century dream-child from the Golden Age of Children's Literature, both in the Harry Potter series and in other works that have reached unprecedented levels of popular success today. Discussing Harry Potter as a reincarnation of Lewis Carroll's Alice and J.M. Barrie's Peter Pan, Billone goes on to examine the recent resurrection of Alice in Tim Burton's Alice, and of Peter Pan in Michael Jackson and in James Bond. Visiting trends that have emerged since the Harry Potter series ended, the book studies revisions of the dream-child in texts and films that have inspired mass fandom in the twenty-first century: Stephenie Meyer's Twilight, E.L. James's 50 Shades of Grey and Suzanne Collins's The Hunger Games. The volume argues that the 21st-century desire to achieve dream-states in relationship to eternal youth results from the way that dreams provide a means of realizing the fantastic yet alarming possibility of escaping from time. This current identification with the dream-child stems from the threat of political unrest and economic and environmental collapse as well as from the simultaneous technophilia and technophobia of a culture immersed in the breathless revolution of the digital age. This book not only explores how the dream-child from the past has returned to reflect misgivings about imagined dystopian futures but also reveals how the rebirth of the dream-child opens up possibilities for new narratives where happy endings remain viable against all odds. It will appeal to scholars in a wide variety of fields including Childhood Studies, Children's/YA Literature, Cinema Studies, Cultural Studies, Cyberculture, Gender Studies, Queer Studies, Gothic Studies, New Media, and Popular Culture.
