The Juniper Networks routing platforms are becoming the go-to solution for core, edge, metro and remote office networks, and JUNOS software is behind it all. The operating system is so full of industrial-strength routing protocols and IP innovations that those treading into the world of JUNOS will need clarification, explanation, and a showcase example or two. Look no further. This JUNOS Cookbook provides it all and more. Yes, you can mine through the 5,000 pages of documentation or take a two-thousand-dollar training course, but JUNOS's interprocess sophistication can be baffling unless you know the shortcuts and tricks, as well as those rays of illuminating comprehension that can come only from those who live with it. JUNOS Cookbook is the first comprehensive book about JUNOS software and it provides over 200 time-saving step-by-step techniques including discussions about the processes and alternative ways to perform the same task. It's been tested and tech-reviewed by field engineers who know how to take JUNOS out for a spin and it's applicable to the entire line of M-, T-, and J-series routers. JUNOS Cookbook will not only pay for itself the first few times you use it, it will make your network easier to manage and update. "Aviva Garrett has done a tremendous job of distilling the features of JUNOS software in a form that will be useful for a wide audience-students, field engineers, network architects, and other networking professionals alike will benefit from this book. For many people, this is the only book on JUNOS they will need."Pradeep Sindhu, CTO and Founder, Juniper Networks "This cookbook is superb. Aviva Garrett has masterfully assembled a complete set of practical real-world examples with step-by-step instructions. Security, management, routing: it's all here!"Stephen Gill, Research Fellow, Team Cymru "A technical time-saver for any NOC or SOC working with JUNOS. It's clear, concise, and informative recipes are an invaluable resource. "Scott A. McIntyre, Security Officer, XS4ALL Internet B.V

Current Issues in Nursing provides a forum for knowledgeable debate on the important issues that nurses face today. Through the past six editions it has provided information and viewpoints of developments that continue to impact the delivery of health care and the nursing profession. This book provides the opportunity to analyze conflicting viewpoints and to synthesize one's own thoughts on the demands being made on the nursing profession and the difficult issues affecting today's health care delivery. Comments from users and reviewers have continued to praise the book for its in-depth discussion of critical issues, solid organization of material, and encouragement of independent thinking. Offers comprehensive and timely coverage of the issues affecting nursing education and practice. Provides insights and analyses of over 100 well-known and respected nursing leaders. Each section is presented in a consistent format beginning with an overview chapter, followed by a debate chapter, and concluding with several viewpoint chapters to

present varying views of the topics. Presents provocative and often controversial discussions in the viewpoint chapters to encourage the reader to think critically about the issues. Updated table of contents improves the flow of material. A new section on violence prevention and care includes nine new chapters on cutting-edge topics such as terrorist events, homeland security, nursing in wars, bioterrorism, and much more. Six new chapters focus on the overall quality improvement of nursing practice. Three new chapters examine the evolution and expansion of the nursing profession. Two new chapters address the definition and role of nursing in the current health care setting. Two new chapters take a contemporary look at HIPAA and the current health care cost trends. Two new chapters explore educational trends developing in the nursing world. A new chapters on employment and management issues including dealing with unions, health care systems, and patient to staff ratios

An important look at bandwidth-efficient modulations with applications to today's Space program Based on research and results obtained at the California Institute of Technology's Jet Propulsion Laboratory, this timely book defines, describes, and then delineates the performance (power and bandwidth) of digital communication systems that incorporate a wide variety of bandwidth-efficient modulations appropriate for the design and implementation of space communications systems. The author compares the performance of these systems in the presence of a number of practical (non-ideal) transmitter and receiver characteristics such as modulator and phase imbalance, imperfect carrier synchronization, and transmitter nonlinearity. Although the material focuses on the deep space applications developed at the Jet Propulsion Laboratory, the presentation is sufficiently broad as to be applicable to a host of other applications dealing with RF communications. An important contribution to the scientific literature, *Bandwidth-Efficient Digital Modulation with Application to Deep Space Communications* \* was commissioned by the JPL Deep Space Communications and Navigation System Center of Excellence \* highlights many NASA-funded technical contributions pertaining to deep space communications systems \* is a part of the prestigious Deep Space Communications and Navigation Series The Deep Space Communications and Navigation Series is authored by scientists and engineers with extensive experience in astronautics, communications, and related fields. It lays the foundation for innovation in the areas of deep space navigation and communications by disseminating state-of-the-art knowledge in key technologies.

Gray and Harrison have assembled an impressive array of authors to analyse the changing role of the medical profession. The contributions range from historical analyses of the relationship between government and doctors, to a detailed examination of the implementation of clinical governance in the NHS. All offer important insights into an issue that lies at the heart of contemporary debates in health policy. Chris Ham, University of Birmingham This book brings together the most pertinent discussion on clinical governance by some of the most eminent practitioners and researchers in the United Kingdom. Since New Labour's institution of clinical governance through its White Paper in 1997, there has been a good deal of debate about the history, theory and practice of Clinical Governance and the governance of clinical care. Divided into three parts, the book contains sections on: ·Medicine, autonomy and governance ·Evidence, science and medicine ·Realizing clinical governance Starting with the differing definitions of the term clinical governance, the contributors discuss the relationship of medicine and governance, the challenges that evidence-based medicine make upon clinical practice and move on to suggest possible futures for clinical governance. Written by a team of experienced academics and practitioners, this book is aimed at reflective health professionals, as well as students and academics in the fields of health policy, health services management, social policy and public policy. Contributors Marian Barnes, Alan Bilson, David Byrne, Barbara Coyle, Pieter Degeling, Tracy Finch, Rob Flynn, Andrew Gray, Steve Harrison, Rick Ledema, John Kennedy, Fergus Macbeth, Frances Mair, Sharyn Maxwell, Carl May, Michael Moran, Maggie Mort, Nancy Redfern, Chandra Vanu Som, Jane Stewart, Barbara Telfer, Stephen Watkins, Sue White.

**Prescribing has traditionally been the responsibility of medical doctors but independent prescribing courses are now firmly established in the UK and increasing numbers of healthcare professionals have taken on prescribing responsibilities. The Prescribing Pharmacist reflects these changes, beginning with an overview of pharmacist prescribing and continuing with an exploration of consultation, patient clinical assessment, team working, and understanding cultural and religious issues and ethics. Internal and external influences on the new prescriber are considered, as well as medicines optimisation. The authors also look at prescribing for specific patient groups, such as the elderly, the very young, pregnant women and breast-feeding women, and finally move on to specific medicines that require special care when prescribing. Each chapter of the book refers and links to the Royal Pharmaceutical Society framework written in 2016, A Competency Framework for All Prescribers, which is reproduced, with permission. Written by a team of pharmacy experts, this book is intended for any pharmacist who is thinking of becoming an independent prescriber, those on pharmacy courses and those who are already qualified as independent or supplementary pharmacist prescribers, who may use it as a reminder of important points covered on their course. Contents include:**

- List of abbreviations
- An introduction to pharmacist prescribing
- The consultation, diagnostic process, diagnosis and influences on prescribing
- Patient clinical assessment
- Patient partnership and prescribing
- Prescribing for specific groups of patients
- Medicines requiring particular care when prescribing
- Appendix 1: A Competency Framework for All Prescribers

*DFSMSHsm fast replication provides DFSMSHsm management for the use of volume-level fast replication. Fast replication is made possible by using the FlashCopy® capability of storage servers. With this capability, a set of storage groups can be defined as a copy pool. The volumes in this pool are processed collectively creating, by fast replication, backup versions that are managed by DFSMSHsm. Recovery can be performed at the volume or copy pool level. This capability is designed to work specifically with DB2® Version 8 or later. With DFSMSHsm fast replication, the backup and recovery of DB2 copy pools can be managed by DFSMSHsm. DFSMSHsm fast replication provides a quick, easy-to-use backup and recovery solution. This IBM® Redbooks® publication consists of a technical overview of the DFSMSHsm fast replication function in z/OS® V1R12 Data Facility Storage Management Subsystem (DFSMS). It provides you with the information that you need to understand and evaluate the function, with practical implementation hints and tips. This book is written for storage professionals, database administrators, and system programmers who have experience with the components of DFSMS. It provides sufficient information for you to implement the DFSMSHsm fast replication function in your storage environment.*

*Takes programmers through the complete process of developing a professional quality game, covering a range of topics such as the key "gotcha" issues that could trip up even a veteran programmer, game interface design, game audio, and game engine technology. Thousands of international medical graduates come to the United States to start their career as physicians. Many of them, however, are not aware of the challenges and problems that they may encounter along the way. These difficulties can range from the language and cultural barriers to a lack of confidence and self-esteem. Many students are also unaware of the other career options besides getting into a clinical residency program. As a result of these issues, a great number of foreign medical students remain unmatched into the National Resident Matching Program. Not matching can be devastating for these graduates, both financially and medically. Students often suffer from psychological effects like major depression and generalized anxiety disorder. This book outlines the potential problems faced by these graduates and their possible solutions. Each chapter collects research evidence, interviews and surveys to gather information to work on each possible problem one by one and describes a solution in great detail. Comprised of thirty chapters, each chapter is broken down into smaller sub-sections to investigate the main theme in depth. Issues addressed include the different types of international medical graduates and their lives in the United States, differences in the education system and healthcare system, the triangle of residency, language and cultural barriers, lack of professional contacts, confidence, self-image and self-esteem issues, and restriction to specific fields and career paths. Written by experts in the field, *International Medical Graduates in the United States* is a first of its kind text that addresses the biggest issues faced by foreign medical graduates in today's world.*

Traditional approaches to vocational rehabilitation, such as skills training classes, job clubs, and sheltered employment, have not been successful in helping people with severe mental illness gain competitive employment. Supported employment, in which clients are placed in jobs and then trained by on-site coaches, is a radically new conceptual approach to vocational rehabilitation designed for people with developmental disabilities. The Individual Placement and Support (IPS) method utilizes the supported employment concept, but modifies it for use with the severely mentally ill. It is the only approach that has a strong empirical research base: rates of competitive employment are 40% or more in IPS programs, compared to 15% in traditional mental health programs. The third volume in the Innovations in Practice and Service Delivery with Vulnerable Populations series, this will be extremely useful to students in psychiatric rehabilitation programs and social work classes dealing with the severely mentally ill, as well as to practitioners in the field.

*At least 5.6 million to 8 million--nearly one in five--older adults in America have one or more mental health and substance use conditions, which present unique challenges for their care. With the number of adults age 65 and older projected to soar from 40.3 million in 2010 to 72.1 million by 2030, the aging of America holds profound consequences for the nation. For decades, policymakers have been warned that the nation's health care workforce is ill-equipped to care for a rapidly growing and increasingly diverse population. In the specific disciplines of mental health and substance use, there have been similar warnings about serious workforce shortages, insufficient workforce diversity, and lack of basic competence and core knowledge in key areas. Following its 2008 report highlighting the urgency of expanding and strengthening the geriatric health care workforce, the IOM was asked by the Department of Health and Human Services to undertake a complementary study on the geriatric mental health and substance use workforce. The Mental Health and Substance Use Workforce for Older Adults: In Whose Hands? assesses the needs of this population and the workforce that serves it. The breadth and magnitude of inadequate workforce training and personnel shortages have grown to such proportions, says the committee, that no single approach, nor a few isolated changes in disparate federal agencies or programs, can adequately address the issue. Overcoming these challenges will require focused and coordinated action by all.*

*Lawrence Lessig, "the most important thinker on intellectual property in the Internet era", masterfully argues that never before in human history has the power to control creative progress been so concentrated in the hands of the powerful few, the so-called Big Media. Never before have the cultural powers- that-be been able to exert such control over what we can and can't do with the culture around us. Our society defends free markets and free speech; why then does it permit such top-down control? To lose our long tradition of free culture, Lawrence Lessig shows us, is to lose our freedom to create, our freedom to build, and, ultimately, our freedom to imagine.*

This Intergovernmental Panel on Climate Change Special Report (IPCC-SREX) explores the challenge of understanding and managing the risks of climate

extremes to advance climate change adaptation. Extreme weather and climate events, interacting with exposed and vulnerable human and natural systems, can lead to disasters. Changes in the frequency and severity of the physical events affect disaster risk, but so do the spatially diverse and temporally dynamic patterns of exposure and vulnerability. Some types of extreme weather and climate events have increased in frequency or magnitude, but populations and assets at risk have also increased, with consequences for disaster risk. Opportunities for managing risks of weather- and climate-related disasters exist or can be developed at any scale, local to international. Prepared following strict IPCC procedures, SREX is an invaluable assessment for anyone interested in climate extremes, environmental disasters and adaptation to climate change, including policymakers, the private sector and academic researchers.

This report describes the growth and changes in the private security industry between 1970 and 1990, discusses emerging and continuing issues and trends in private security and its relationships with public law enforcement, and recommends measure and research to improve cooperation between private security and law enforcement. Data came from a review of previous research, individual and focus group interviews, and an analysis of market data. Results indicated that the increased use of locks, security lighting, and other private and public security measures reflect a growing fear of crime, even while statistics show stable or declining crime rates. In addition, the frequency and cost of business crime are increasing. Additional crime problems include breaches of business ethics, drug abuse, computer crime, and terrorism. The primary responsibility for protective measures has also been shifting from public law enforcement to private security, indicating the need for greater cooperation between the public and private sectors. In addition, contract security companies are growing, while proprietary security organizations are decreasing in number. Major issues include the privatization of police support tasks, false alarms, police moonlighting, and the growing use of private adjudication.
