

time to buy a new car or truck, thanks to a stronger Canadian dollar, a worldwide recession driving prices downward, and a more competitive Japanese auto industry that's still reeling from a series of natural disasters. In addition to lower prices and more choices, 2013 car buyers will see more generous cash rebates, low financing rates, bargain leases, and free auto maintenance programs. Buy, sell, or hold? Which cars and trucks are "wallet-friendly" and can easily last 15 years? Which vehicles offer the most features to best accommodate senior drivers? Do ethanol and hybrid fuel-saving claims have more in common with Harry Potter than the Society of Automotive Engineers? Is GM's 2013 Volt electric car destined to become an electric Edsel? These questions and more are answered in this informative guide.

In this dynamic and wide-ranging collection of essays, prominent scholars examine the condition of church-state relations in the United States, France, and Israel. Their analyses are rooted in a wide variety of disciplines, ranging from ethnography and demography to political science, gender studies, theology, and the law.

As U.S. and Canadian automakers and dealers face bankruptcy and Toyota battles unprecedented quality-control problems, Lemon-Aid guides steer the confused and anxious buyer through the economic meltdown unlike any other car-and-truck books on the market. Phil Edmonston, Canada's automotive "Dr. Phil" for more than 40 years, pulls no punches. In this all-new guide he says: Chrysler's days are numbered with the dubious help of Fiat. Electric cars and ethanol power are PR gimmicks. Diesel and natural gas are the future. Be wary of "zombie" vehicles: Jaguar, Land Rover, Saab, and Volvo. Mercedes-Benz - rich cars, poor quality. There's only one Saturn you should buy. Toyota - enough apologies: "when you mess up, 'fess up."

**The 'Year' That Changed How We View the North** This book is about a new theoretical approach that transformed the field of Arctic social studies and about a program called International Polar Year 2007–2008 (IPY) that altered the position of social research within the broader polar science. The concept for IPY was developed in 2003–2005; its vision was for researchers from many nations to work together to gain cross-disciplinary insight into planetary processes, to explore and increase our understanding of the polar regions, the Arctic and Antarctica, and of their roles in the global system. IPY 2007–2008, the fourth program of its kind, followed in the footsteps of its predecessors, the first IPY in 1882–1883, the second IPY in 1932–1933, and the third IPY (later renamed to 'International Geophysical Year' or IGY) in 1957–1958. All earlier IPY/IGY have been primarily geophysical initiatives, with their focus on meteorology, atmospheric and geomagnetic observations, and with additional emphasis on glaciology and sea ice circulation. As such, they excluded socio-economic disciplines and polar indigenous people, often deliberately, except for limited ethnographic and natural history collection work conducted by some expeditions of the first IPY. That once dominant vision biased heavily towards geophysics, oceanography, and ice-sheets, left little if any place for people, that is, the social sciences and the humanities, in what has been commonly viewed as the 'hard-core' polar research.

Our current students are digital natives, born into a world of widespread online sharing. Aligning the technologies we use in our courses with their skills and approaches to collaborative learning is an opportunity we should take. The new media share text, images, audio and video material rapidly and interactively. This volume will provide an overview of these new social media including Skype, YouTube, Flickr, blogging, LinkedIn, Facebook, and Twitter. Examples and cases of how instructors around the world are meaningfully incorporating them into their management, marketing, and other business courses are provided. One of the more robust trends is the use of three-dimensional immersive virtual world interfaces for teaching and learning. The leading one is Second Life. Examples of the use of Second Life in business courses will be discussed. The use of wikis to foster collaborative development of course related material by learners will be presented with case examples. Faculty members are co-creators of course content with their learners. Among the topics covered is how faculty members can be supported in their deployment of social media projects and course structures. How social media can enable the structuring of course activities involving students, prospective students, alumni, employers, businesspersons, and others in rich sharing and support with each other will be discussed. Indeed seeing courses as networking venues beyond learning forums will be parsed.

For the first time in one volume, Phil Edmonston, Canada's automotive "Dr. Phil," covers all used vehicles, packing this guide with insider tips to help the consumer make the safest and cheapest choice possible from cars and trucks of the past 25 years.

*This book presents a critical cultural study of the Trans New Wave as a cinematic genre and explores its emergence in the twenty-first century. Drawing on a diverse range of texts, the cultural, social, aesthetic and ethical implications of the genre are placed within the context of rapidly changing understandings of gender diversity. From the cinematic borderlands of independent film festivals to wider public recognition via digital technologies, the genre encompasses a diverse range of texts from short films, documentaries, experimental films, to feature films and narratives that range across life histories, narratives and themes. The book presents transliteracy as an original theoretical approach to reading film representations of the Trans New Wave, and combines it with a new theoretical concept of cinematic ethnogenesis to investigate how the genre emerged from specific communities and the reciprocal interaction of audiences and texts. This interdisciplinary volume engages with contemporary issues of gender diversity, transgender studies, screen and media studies and film festival studies, and as such will be of great interest to scholars working in these fields and in media and cultural studies more generally.*

Trudge through disgusting sewers to battle manatee-massacring mermaids and soggy cultists, creep through creepy, fog-littered cemeteries straight out of an ancient Hammer Film soundstage, confront undead lecherous lodgers and other assorted beasties, creepies, and ghoulies. It all comes down to whether an adolescent giant Automaton, a truly mad, Mad Scientist, a surly Necromancer, a Banshee's granddaughter, and a reluctant furry monster straight from under your little sister's bed can manage not to kill each other - or, at least, quit fighting over the tele-privilege-schedule long enough to get the job done! Not likely.*

Indonesia is the world's largest archipelagic state, with more than 18,000 islands and over 7.9 million square kilometres of sea. The marine frontier presents the nation with both economic opportunities and political and strategic challenges. Indonesia has been affected more than most countries in the world by a slow revolution in the management of its waters. Whereas Indonesia's seas were once conceived administratively as little more than the empty space between islands, successive governments have become aware that this view is outmoded. The effective transfer to the seas of regulatory regimes that took shape on land, such as territoriality, has been an enduring challenge to Indonesian governments. This book addresses issues related to maritime boundaries and security, marine safety, inter-island shipping, the development of the archipelagic concept in international law, marine conservation, illegal fishing, and the place of the sea in national and regional identity.

"Sentimental, heartfelt...the exploration of Henry's changing relationship with his family and with Keiko will keep most readers turning pages...A timely debut that not only reminds readers of a shameful episode in American history, but cautions us to examine the present and take heed we don't repeat those injustices."-- Kirkus Reviews "A tender and satisfying novel set in a time and a place lost forever, Hotel on the Corner of Bitter and Sweet gives us a glimpse of the damage that is caused by war--not the sweeping damage of the battlefield, but the cold, cruel damage to the hearts and humanity of individual people. Especially relevant in today's world, this is a beautifully written book that will

make you think. And, more importantly, it will make you feel." -- Garth Stein, New York Times bestselling author of *The Art of Racing in the Rain* "Jamie Ford's first novel explores the age-old conflicts between father and son, the beauty and sadness of what happened to Japanese Americans in the Seattle area during World War II, and the depths and longing of deep-heart love. An impressive, bitter, and sweet debut." -- Lisa See, bestselling author of *Snow Flower and the Secret Fan* In the opening pages of Jamie Ford's stunning debut novel, *Hotel on the Corner of Bitter and Sweet*, Henry Lee comes upon a crowd gathered outside the Panama Hotel, once the gateway to Seattle's Japantown. It has been boarded up for decades, but now the new owner has made an incredible discovery: the belongings of Japanese families, left when they were rounded up and sent to internment camps during World War II. As Henry looks on, the owner opens a Japanese parasol. This simple act takes old Henry Lee back to the 1940s, at the height of the war, when young Henry's world is a jumble of confusion and excitement, and to his father, who is obsessed with the war in China and having Henry grow up American. While "scholarshipping" at the exclusive Rainier Elementary, where the white kids ignore him, Henry meets Keiko Okabe, a young Japanese American student. Amid the chaos of blackouts, curfews, and FBI raids, Henry and Keiko forge a bond of friendship—and innocent love—that transcends the long-standing prejudices of their Old World ancestors. And after Keiko and her family are swept up in the evacuations to the internment camps, she and Henry are left only with the hope that the war will end, and that their promise to each other will be kept. Forty years later, Henry Lee is certain that the parasol belonged to Keiko. In the hotel's dark dusty basement he begins looking for signs of the Okabe family's belongings and for a long-lost object whose value he cannot begin to measure. Now a widower, Henry is still trying to find his voice—words that might explain the actions of his nationalistic father; words that might bridge the gap between him and his modern, Chinese American son; words that might help him confront the choices he made many years ago. Set during one of the most conflicted and volatile times in American history, *Hotel on the Corner of Bitter and Sweet* is an extraordinary story of commitment and enduring hope. In *Henry and Keiko*, Jamie Ford has created an unforgettable duo whose story teaches us of the power of forgiveness and the human heart. **BONUS:** This edition contains a *Hotel on the Corner of Bitter and Sweet* discussion guide and an excerpt from Jamie Ford's *Love and Other Consolation Prizes*.

He says there's never been a better time to buy a new car or truck, thanks to a stronger Canadian dollar and an auto industry offering reduced prices, more cash rebates, low financing rates, bargain leases, and free auto maintenance programs. In this all-new guide he says: Audis are beautiful to behold but hell to own (biodegradable transmissions, "rodent snack" wiring, and mind-boggling depreciation) Many 2011-12 automobiles have "chin-to-chest head restraints, blinding dash reflections, and dash gauges that can't be seen in sunlight, not to mention painful wind-tunnel roar if the rear windows are opened while underway) Ethanol and hybrid fuel-saving claims have more in common with Harry Potter than the Society of Automotive Engineers) GM's 2012 Volt electric car is a mixture of hype and hypocrisy from the car company that "killed" its own electric car more than a decade ago) You can save \$2,000 by cutting freight fees and "administrative" charges) Diesel annual urea fill-up scams can cost you \$300, including an \$80 "handling" charge for \$25 worth of urea) Lemon-Aid's 2011-12 Endangered Species List: the Chinese Volvo, the Indian Jaguar and Land Rover, the Mercedes-Benz Smart Car, Mitsubishi, and Suzuki
