*Lemon-Aid guides steer the confused and anxious buyer through the economic meltdown unlike any other car-and-truck books on the market. U.S. automakers are suddenly awash in profits, and South Koreans and Europeans have gained market shares, while Honda, Nissan, and Toyota have curtailed production following the 2011 tsunami in Japan. Shortages of Japanese new cars and supplier disruptions will likely push used car prices through the roof well into 2012, so what should a savvy buyer do? The all-new Lemon-Aid Used Cars and Trucks 2012-2013 has the answers, including: More vehicles rated, with some redesigned models that don't perform as well as previous iterations downrated. More roof crash-worthiness ratings along with an expanded cross-border shopping guide. A revised summary of safety- and performance-related defects that are likely to affect rated models. More helpful websites listed in the appendix as well as an updated list of the best and worst "beaters" on the market. More "secret" warranties taken from automaker internal service bulletins and memos than ever. This would be such a WONDERFUL GIFT for your favorite spark plug or a friend or family member who is a spark plug! * Gold letters on black cover, stylish, elegant * Lined notebook, 110 pages, high quality cover, (6 x 9) inches in size * Perfect Bound * Crisp White Pages with a Thick Cardstock Cover * Notebook, diary, journal Show your appreciation! Make somebody's day! Tell them: You're the best spark plug ever! Who wouldn't want such a GREAT PRESENT?*

Car ownership is set to triple by 2050, trucking activity will double and air travel could increase fourfold. This book examines how to enable mobility without accelerating climate change. It finds that if changes are made to the way people travel, adoption of technologies to improve vehicle efficiency and a shift to low-CO2 fuels, it is possible to move onto a different pathway where transport CO2 emissions by 2050 are far below current levels, at costs that are lower than many assume. The report discusses the prospects for shifting more travel to the most efficient modes and reducing travel growth rates, improving vehicle fuel efficiency by up to 50% using cost-effective, incremental technologies, and moving toward electricity, hydrogen, and advanced biofuels to achieve a more secure and sustainable transport future. If governments implement strong policies to achieve this scenario, transport can play its role and dramatically reduce CO2 emissions by 2050.

Bringing together the foundations of the discipline and its recent developments in a single text, the book is structured in three parts: it begins with a historical overview of road vehicles; then deals with the forces exchanged between the vehicle and the road, and the vehicle and the air; and finally, deals with the dynamic behavior of the vehicle in normal driving conditions with some extensions towards conditions encountered in high-speed racing. Coverage of contemporary automatic controls is included in this edition.

This is the disturbing account of 31-year-old Joanna Dennehy, mother of two, the man under her spell, Gary Stretch, 47, and the murder investigation that led them and others to the Old Bailey for trial. A true crime short, plus 17 additional true crime stories. It was the day before Easter, 2013. A man out walking his dog on a rural road near Peterborough, United Kingdom found a dead body lying in a ditch. The grisly discovery preceded two other dead body discoveries under similar circumstances, thus launching police on a massive country-wide manhunt for a self-mutilating female psychopath with an affinity for knives and her 7-foot 3-inch tall companion and accomplice. Before their bloody rampage was

brought to an end, they would attempt to kill two additional innocent people who likely never even saw them coming. This volume also includes the bizarre, compelling and frighteningly authentic true crime stories of several headline-grabbing cases, as well as more obscure cases that received little media attention. Within these pages you will find stories about serial killer Andrew Urdiales; Jodi Arias and the murder of Travis Alexander; the random serial stabber case; a killer who wanted to be like "Dexter;" a "blood oath" murder case out of Washington State; a story about a "dead" man who murdered two female victims; the case of Portland's "Motel Hell" bloodbath; and several other real-life true crime dramas chosen especially for true crime aficionados about killers who mostly had one thing in common—they were OUT FOR BLOOD! 18 stories in all.
