Technical objects
and systems
stated by these
models are very
large, and include
various control
systems,
actuators,
sensors, computer
systems,
communication
systems, and

mechanical,
hydraulic,
pneumatic,
electrical and
electronic
devices. The
analytical fault
diagnosis
techniques of
these objects have
been developed
for several

decades. Many of those techniques are based on the use of the results of modern control theory. This is natural, because it is known that fault diagnosis process in control systems is considered as a

part of general
control process.

xxii In

organization of
fault diagnosis of
control systems,
the use of the
concepts and
methods of
modern control
theory including
