Traffic Safety

A psychological thriller in the tradition of Patricia Highsmith about two couples caught in a web of conflicting passions while deep-sea diving off the beautiful Canary Islands In the late 1990s, Sven Fiedler and his girlfriend, Antje, left Germany for the island of Lanzarote, rejecting what Sven considered a vulgar culture of materialism and judgment. The young couple set up a diving service catering to tourists eager to bask in the warm sunshine and explore the silent, gleaming marine paradise that makes this otherwise barren volcanic island such a remarkable retreat. Sven's approach was simple: take the mechanics of diving seriously, instruct his clients clearly, and stay out of their personal business as best he can. And life on the island goes smoothly until two German tourists--Jola von der Pahlen, a daytime soap star on the verge of cinematic success, and Theo Hast, a stalled novelist--engage Sven for a high-priced, intensive two-week diving experience. Staying in a guest house on Sven and Antje's property, the two visitors and their hosts quickly become embroiled in a tangle of jealousy and suspicion. Sven is struck by Jola's beauty, her evident wealth, and her apparently volatile relationship with the much older Theo. Theo quickly become embroiled in a tangle of jealousy and suspicion. As the point of view shifts from one character to the next, the reader is constantly kept guessing about who knows what, and, more important, who is telling the truth. A brutal game of delusion, temptation, and manipulation plays out, pointing toward a violent end. But a quiet one, down in the underwater world beneath the waves.

The transition to clean energy is moving far too slowly. Trapped by a century of fossil fuel investments and politicians that struggle to plan beyond the next election, the "Big Grid" that powers our modern world is outdated and in dire need of an upgrade. Freeing Energy offers a new and faster path towards a clean energy future-one that is more reliable, more equitable, and cheaper. Just like personal computers eclipsed mainframes, millions of solar rooftops and small battery systems are challenging every assumption about our century-old, centralized electric grid. These small-scale projects. Bill Nussey takes readers to mud huts in Africa, an off-grid farm in California, and a rural school in the mountains of Puerto Rico to uncover the underlying patterns of the host cutting-edge startups, bringing it all together into an actionable framework to help accelerate this transition. Freeing Energy is a deeply researched, actionable guide for anyone that cares about the future of energy-from startups, policymakers, investors, and utility leaders to the families and communities that want cleaner, cheaper energy today.

The book examines the status of public service in developing countries, in the sectors of health, infrastructure, labour and public administration. The last decade has witnessed significant government focus on service delivery in developing nations like South Africa, Philippines, India and Malaysia. At the forefront of this movement has been the public sector inefficiencies and liberal economic ideology. This move towards efficient public service delivery in developing nations (versus developed nations) has required a significant shift in institutional thinking and institutional thinki service delivery has been significantly more challenging. In this background, the chapters of the book, with sector themes, examine the three basic foundations of public policy—courses of action, regulatory measures and funding structures and priorities—in public service delivery. The book is a multi country, multi sector, perspective since it includes studies from Russian Federation, India, Ethiopia, Pakistan, Fiji, South Africa, Columbia, Philippines, Macedonia and India. This perspective lends itself to the investigation for a comprehensive overall development model.
