"For over forty years, Ellen Raskin's Newbery Medal-winning *The Westing Game* has been an enduring favorite. This highly inventive mystery involves sixteen people (including a dressmaker, a secretary, an inventor, a doctor, a judge, a bookie, a burglar, and a bomber) who are invited to the reading of the very strange will of the very rich Samuel W. Westing. They could become millionaires, depending on how they play the game. All they have to do is find the answer -- but the answer to what? The Westing game is tricky and dangerous, but the heirs play on -- through blizzards, burglaries, and bombings. Ellen Raskin has entangled a remarkable cast of characters in a puzzle-knotted, word-twisting plot filled with humor, intrigue, and suspense. This unforgettable, timeless classic continues to be cherished by young readers of each new generation." --

'Accounting for Business' is ideal for undergraduate students on business and accounting courses who need to understand the nuts and bolts of financial accounting. This popular textbook has

always enjoyed a deserved reputation for accessibility and thoroughness. Now in its third edition, its contents have been fully updated and restructured to make them even easier to use. Readers will benefit from the coverage of current accounting practices and legislation, in addition to the range of worked examples and self-test activities throughout the book.

'Accounting for Business' clearly explains accounting information's role in making sound business decisions and focuses upon the aspects of accounting practice which are most relevant to the non-specialist manager. It is ideal for first year undergraduates of business studies, higher students and those pursuing professional accountancy qualifications. This third edition has been restructured, to further enhance its 'student centred' approach. The content has now been broken down into 25 roughly equivalent 'bite-sized' individual study topics. Each of these requires 6 hours of study time, enabling this book to support a full scale semester course with two topics a week, or a full year course at one topic a week. Includes a wide selection of topical case studies, with a broad spread of international examples.

The need to revive Euro area growth highlights the importance of the evolution of domestic and external demand in the core. This paper puts recent demand patterns in France, Germany, and Belgium into historical perspective. We find that, first, dynamics for private consumption, non-residential business investment, and exports since 2008 is dominated by conventional determinants, with no discernible structural break as a result of the crisis. Second, although country-specific factors matter in some cases, demand patterns in these countries are largely driven by common determinants. Third, developments in common fundamentals tend to dominate demand dynamics, coupled, in a few cases, with structurally different elasticities across countries. Fourth, short-term analysis suggests a role for confidence and uncertainty factors in explaining temporary deviations of these variables from long-term fundamentals.

Young adulthood - ages approximately 18 to 26 - is a critical period of development with long-term implications for a person's economic security, health and well-being. Young adults are key contributors to the nation's workforce and military services and, since many are parents, to the healthy development of the next generation. Although 'millennials' have received attention in the

popular media in recent years, young adults are too rarely treated as a distinct population in programs, and research. Instead, they are often grouped with adolescents or, more often, with older adults. Currently, the nation is experiencing economic restructuring, widening inequality, a rapidly rising ratio of older adults, and an increasingly diverse population. The possible transformative effects of these features make focus on young adults especially important. A systematic approach to understanding and responding to the unique circumstances and needs of today's young adults can help to pave the way to a more productive and equitable tomorrow for young adults in particular and our society at large. Investing in The Health and Well-Being of Young Adults describes what is meant by the term young adulthood, who young adults are, what they are doing, and what they need. The study recommends actions that nonprofit programs and federal, state, and local agencies can take to help young adults make a successful transition from adolescence to adulthood. According to the report, young adults should be considered as a separate group from adolescents and older adults. Investing in The Health and Well-Being of Young Adults makes the case that increased efforts to improve high school and college graduate rates and education and workforce development systems that are more closely tied to high-demand economic sectors will help this age group achieve greater opportunity and success. The report also discusses the health status of young adults and makes recommendations to develop evidence-based practices for young adults for medical and behavioral health, including preventions. What happens during the young adult years has profound implications for the rest of the life course, and the stability and progress of society at large depends on how this cohort of young adults fares as a whole. Investing in The Health and Well-Being of Young Adults provides a roadmap to improving outcomes for this age group as they transition from adolescence to adulthood.

Through popular movies starring Bruce Lee and songs like the disco hit "Kung Fu Fighting," martial arts have found a central place in the Western cultural imagination. But what would 'martial arts' be without the explosion of media texts and images that brought it to a wide audience in the 1960s and early 1970s? In this examination of the media history of what we now call martial arts, author Paul Bowman makes the bold case that the phenomenon of martial arts is chiefly an invention of media representations. Rather than passively taking up a preexisting history of martial arts practices--some of which, of course, predated the martial arts boom in popular culture--media and narratives actively constructed martial arts. Grounded in a historical survey of the British history of martial arts such as Bartitsu, jujutsu, judo, karate, tai chi, and MMA across a range of media, this book thoroughly recasts our understanding of the history of martial arts. By intervening in theories of key thinkers on historiography, such as Foucault and Hobsbawm, and Said's ideas on Orientalism with analyses of both mainstream and marginal media texts, Bowman arrives at the surprising insight that media representations created martial arts rather than the other way around. In this way, he not only deepens our understanding of martial arts but also demonstrates the productive power of media discourses.

It was a simple incident in the life of James Clavell—a talk with his young daughter just home from school—that inspired this chilling tale of what could happen in twenty-five quietly devastating minutes. He writes, "The Children's Story came into being that day. It was then that I really realized how vulnerable my child's mind was —any mind, for that matter—under controlled circumstances. Normally I write and rewrite and re-rewrite, but this story came quickly—almost by itself. Barely three words were changed. It pleases me greatly because I kept asking the questions... Questions like, What's the use of 'I pledge allegiance' without understanding? Like Why is it so easy to divert thoughts? Like What is freedom? and Why is so hard to explain? The Children's Story keeps asking me all sorts of questions I cannot answer. Perhaps you can—then your child will...."
