Floral morphology is key for understanding floral evolution and plant identification. Floral diagrams are two-dimensional representations of flowers that replace extensive descriptions elaborate drawings to convey information in a clear and unbiased way. Following the same ou as the first edition, this comprehensive guide includes updated and relevant literature, repres the latest phylogeny, and features 28 new diagrams. Diagrams are presented in the context o most recent classifications, covering a variety of families and illustrating the floral diversity o major groups of plants. A strong didactic tool for observing and understanding floral structure these diagrams are the obvious counterpart to any genetic study in flowering plants and to t discussion of major adaptations and evolutionary trends of flowers. This book is invaluable for researchers and students working on plant structure, development and systematics, as well a being an important resource for plant ecologists, evolutionary botanists and horticulturists.

Planners are a terrific way to manage your time, to stay organized and to keep all your impor information in one handy book. This 2018 Weekly Planner does exactly that - and it's laid out a full 53 weeks of planning. Best of all, each month contains its own calendar followed by 2 p per week to allow enough room for you to record all your essential weekly events. The left si pages feature: the week's start and end date your "Daily Diary" to record urgent messages a "Doodle Box" to write in or draw for fun The right side pages feature: your "To Do" list for the week your "Urgent Calls to Make" for the week your "Reminders for Next Week" list your "Notes/Thoughts/Ideas/Gratitude" But that's not all. each Calendar Page includes a Bible Vers Inspirational Quote and space to log "Your Goals for the Month." at the beginning of the book there is a "Goals for this Year" page to plan your life at the end of the book there is a "Year in Review" page to record your milestones This planner is 8.5" x 11" in size, perfect for logging y life and staying organized every week throughout the year. The 2018 Weekly Planner also ma great gift! In summary, this 136-page weekly planner features: Fully dated 12 month calendar (January 2018 through December 2018) followed by 2 pages per week - for 53 full weeks (December 31 2017 through January 5 2019)! Each monthly calendar contains a Bible verse scriptural quote and space to log your goals for the month WEEKLY PAGES: left side is 53 pag featuring your "Daily Diary" and a "Doodle Box" to write or draw in Right side is 53 pages featuring your "To Do" list, your "Calls to Make," "your Reminders for Next Week," and space to write your "Notes/Thoughts/Ideas/Gratitude" Supplemental pages including: 1 - Cover Page where you can enter your name, 1 - "Goals for this Year" Page and 1 - "Year in Review" Page 8.5" x 11" size - large enough to record all your important information for the year Monthly blank pages to use as you wish

Tropical East Asia is home to over one billion people and faces massive human impacts from its rising population and rapid economic growth. It has already lost more than half of its forest cover to agriculture and urbanization, and has the highest rates of deforestation and logging in the tropics. Habitat loss, coupled with hunting and the relentless trade in wildlife products, threatens all its large and many of its smaller vertebrates. Despite these problems, the region still supports an estimated 15-25% of global terrestrial biodiversity and a growing environmental awareness means that it is no longer assumed that economic development justifies environmental damage, and no longer accepted that this trade-off is inevitable. Effective conservation action now depends on integrating a clear understanding of the ecological patterns and processes in the region with the varied needs of its human population. This third edition continues to provide an overview of the terrestrial ecology of Tropical East Asia: from southern China to Indonesia, and from Bhutan and Bangladesh to the Ryukyu Islands of Japan. It retains the balance between compactness and comprehensiveness of the previous editions, and the even-handed geographical treatment of the whole region, but it updates both the contents and the perspective. Approximately one third of the text is new or greatly modified, reflecting the explosion of new research in the region in the last few years and the increasing use of new tools, particularly from genomics and remote sensing. The change in perspective largely reflects the growing realization that we are in a new epoch, the Anthropocene, in which human activities have at least as large an influence as natural processes, and that stopping or reversing ecological change is no longer an option. This does not mean that biodiversity conservation is no longer possible or worthwhile, but that the biodiverse future we strive for will inevitably be very different from the past. The Ecology of Tropical East Asia is an advanced textbook suitable for senior undergraduate and graduate level students taking courses on the terrestrial ecology of the East Asian tropics, as well as an authoritative regional reference for professional ecologists, conservationists, and interested amateurs worldwide.
