Experience Colorado's unparalleled beauty as seen through the lens of one of Colorado's pioneering families. Each month of this 12-month calendar features a large color photograph taken by Grant Collier, along with a smaller black & white image taken by Grant's great-great-grandfather, the pioneer photographer Joseph Collier. These images provide fascinating insight into the different perspectives of two photographers linked by family lineage but separated by a chasm of time.

The Doctor Next Door Widowed firefighter Mason Benfield is happy putting out fires and running a teen center—anything to distract himself from the loss of his wife. A loss he blames on a young doctor's inexperience. So when he discovers his landlords' new houseguest is just out of med school and working at the new health clinic, Mason bristles. Since Lexie Campbell is also donating her time to his teen center, he can't escape the woman...or the attraction he feels to the pretty doctor. As they work together, they develop a bond neither thought they wanted. But can Mason give her—and himself—a reason to take one more chance on forever?

Sparked by the opportunity to explore his personal passions, David Kroese turns away from a rewarding yet languishing career and begins the adventure of a lifetime. What happens next evolves into a tour of all four hundred-plus units in America's National Park System -- a perfect way to celebrate the 2016 National Park Service centennial. The Centennial: A Journey Through America's National Park System details David's compelling centennial explorations to 387 parks in 360 days. The story continues through December 2017, when he becomes one of fewer than fifty people known to have visited all 417 national parks. His personal expedition is a poignant exploration into quintessential America as told through its historical and natural wonders. Delve into diverse locations from Hawaii to the Rockies, New England to the Caribbean, Charleston to the California desert, Alaska to American Samoa. Join David and experience the inherent marvels within America's unique landscape and fascinating history, revealed in engaging context, poetic descriptions, and heartfelt appreciation. The Centennial: A Journey Through America's National Park System is an odyssey of self discovery and fulfillment through the nation's soul.

"This book celebrates Pickett's Charge, Mark Bradford's monumental commission for the Hirshhorn Museum and Sculpture Garden, an epic site-specific work inspired by Paul Dominique Philippoteaux' nineteenth century cyclorama at Gettysburg National Military Park. ... Spanning the entire circumference of the inner-circle galleries on the Museum's third floor, the artist creates an immersive installation that fills the massive space.... Working with a combination of colored paper and reproductions of the original cyclorama, Bradford collaged and transformed the historic Gettysburg imagery into a series of eight powerful works."--Page vi.

In homage to America's National Parks and their iconic art posters, this volume features new artwork for seventy-five parks and monuments across all fifty states. "In this sepia-tinged homage" to the iconic National Parks posters "modern artists contribute dazzling new graphics" (Entertainment Weekly). From 1935 to 1943, the WPA's Federal Art Project hired American artist to create posters celebrating the National Parks Service. The icon See America posters inspired Americans to fall in love with the country's landmarks and wild spaces from the Golden Gate Bridge to the Gateway Arch and from the Grand Canyon to the Great Smokey Mountains. Originally published to coincide with the centennial anniversary of the National Parks Service, the Creative Action Network has partnered with the National Parks Conservation Association to revive and reimagine the legacy of WPA travel posters. Artists from all over the world participated in the creation of this new, crowdsourced collection of See America posters for a modern era. This beautifully produced deep dive into Yosemite National Park features stunning photography by Robb Hirsch and fascinating natural history from knowledgeable contributors. Yosemite is like nowhere else on Earth. Within its vast expanses are spectacular granite mountains, glacially carved valleys, thundering waterfalls, delicate meadows, grand trees, and charismatic wildlife. From

his years of exploring and studying California's Sierra Nevada, Robb knows that understanding natural processes can thoroughly enhance a visitor's connection to the landscape. In this book, Robb provides that enriching experience by calling on experts to contribute insights into the natural wonders on view. The images and essays work together to draw readers into a deeper relationship with their favorite national park. The book features essays by these Sierra Nevada luminaries: John Muir Laws, on "Wonder, Beauty, and Nature" Tim Palmer, on rivers Greg Stock, on geology James McGrew, on the role of art in Yosemite Brock Dolman, on the water cycle Sarah Stock, on bird diversity Rob Grasso, on the Yosemite toad Kurt Menning, on fire ecology Beth Pratt, on pikas Dan Webster, on wildflowers Karen Amstutz, on Tuolumne Meadows Nathan Stephenson, on giant sequoias Adonia Ripple, on the importance of Yosemite Pete Devine, on the remarkable properties of leaves Robb's passion is the ongoing search for the "Wow!" that can be found in every acre of Yosemite National Park—and that passion comes through in each of his photographs. The result is a breathtaking book that will dazzle, enlighten, and inspire a deep appreciation for the nature of Yosemite.

"One of the most profound and illuminating studies of this century to have been published in recent decades."—John Gray, *New York Times Book Review* Hailed as "a magisterial critique of top-down social planning" by the *New York Times*, this essential work analyzes disasters from Russia to Tanzania to uncover why states so often fail—sometimes catastrophically—in grand efforts to engineer their society or their environment, and uncovers the conditions common to all such planning disasters. "Beautifully written, this book calls into sharp relief the nature of the world we now inhabit."—*New Yorker* "A tour de force."—Charles Tilly, *Columbia University*

From Acadia and Great Smoky Mountains to Zion and Mount Rainier, millions of visitors tour America's national parks. While park roads determine what most visitors see and how they see it, however, few pause to consider when, why, or how the roads they travel on were built. In this extensively researched and richly illustrated book, national parks historian Timothy Davis highlights the unique qualities of park roads, details the factors influencing their design and development, and examines their role in shaping the national park experience—from the Blue Ridge Parkway and Skyline Drive to Glacier National Park's Going-to-the-Sun Road, Yellowstone's Grand Loop, Yosemite's Tioga Road, and scores of other scenic drives. Decisions about park road development epitomize the central challenge of park management: balancing preservation and access in America's most treasured landscapes. Park roads have been celebrated as technical and aesthetic masterpieces, hailed as democratizing influences, and vilified for invading pristine wilderness with the sights, sounds, and smells of civilization. Davis's recounting of efforts to balance the interests of motorists, wilderness advocates, highway engineers, and other stakeholders offers a fresh perspective on national park history while providing insights into evolving ideas about the role of nature, recreation, and technology in American society. Tales of strong personalities, imposing challenges, resounding controversies, and remarkable achievements enliven this rich and compelling narrative. Key players include many of the most important figures of conservation history—John Muir, Frederick Law Olmsted, wilderness advocates Aldo Leopold, Bob Marshall, and Ansel Adams, and NPS directors Stephen Mather and Horace Albright among them. An engrossing history, *National Park Roads* will be of interest to national park enthusiasts, academics, design professionals, resource managers, and readers concerned with the past, present, and future of this quintessentially American legacy. As the National Park Service celebrates its centennial, this book offers a fascinating and illuminating account of the agency's impact on American lives and landscapes.

*This Book Exposes the False Prophets of the New Apostolic Reformation Phyllis Kathleen Gault, B.S. M.A. is the author of *Phoenix Rising: Birthing the Strong Delusion*. Mrs. Gault states that all religions are merging with Christianity to form one universal church. She provides an overview of the major world religions, and she explains how both liberal and Charismatic Christians are merging Eastern mysticism and Western esotericism with Christianity. Mysticism is the tie that binds these mystery religions together. Her book focuses on a far-right movement called the New Apostolic Reformation. These Gnostics are cloaking mysticism within Christian-sounding terms to convert Christians, unwitting, to their rising apostate religion. These false prophets call this the underground stream. These pretenders of the faith are taking advantage of the rising global crises. These dominionists plan to deconstruct the United States Government to establish a fascist system controlled by their heretical prophets, and apostles, as they do not follow Bible-based Christianity. When they reach the apex of their plan, they will establish a theocracy, which is a political, economic, social, and religious system based on their heretical interpretation of Christianity. Revelation 12 calls this church Mystery Babylon. Finally, these Gnostic Christians are networking with various groups to deconstruct the United States Government by increasing divisions among the people. They say this chaos will lead to a second Civil War. Then, this "revolution" will spread worldwide, leading to the bloodiest crusade ever. About this Book: This book is 372 pages with 56 pages of reference. The printed copy is one inch thick. It is a big book. This work has 320 black and white images and 52 color photos. It traces the rise of pagan religions from the beginning of time and it reveals how Gnostics and other esotericists have infiltrated Christianity with these philosophical ideas.*

Discover tranquility and peace by coloring in beautiful landscape and wildlife scenes from America's national parks based on the renowned photographs of Ian Shive. Some of the world's most beautiful and iconic landscapes are preserved within the US National Park System, and Ian Shive, praised as the "leading chronicler of America's national parks," has been capturing these vistas for years. This National Parks Poster Coloring Book will feature poster-sized and styled line-art renderings of Shive's most iconic images from the national parks. A full-color poster complements the line drawings and provides inspiration from the greatest of all painters—Mother Earth. Ignite your creativity through the exploration of nature, and color your way through the National Park System.

Matthew Dickerson's well-crafted prose narrative takes readers from the headwaters of the Colorado River in Wyoming to the Crown of the Continent in Glacier National Park. In the midst of the lovingly described wild and scenic beauty of these places, readers will learn about the science, history, conservation, and restoration of an important native fish—cutthroat trout—and the habitats where they live, while enjoying stories of the pursuit of those fish with both a fly rod and a camera. The book is well-informed by science as well as careful observation, and conveys both the passion and knowledge of the author. The author, Matthew Dickerson, was a 2017 artist-in-residence at Glacier National Park, invited to that residence specifically to learn and write about cutthroat trout. Much of what he learned and observed is shared in this book, along with stories and knowledge gleaned from times in the national forests of Wyoming and interviews with USGS, U.S. Forest Service, and National Park Service biologists. It is well-informed by science, but doesn't read like a scientific text.

Graphic designer Natalie Pearce faces the most difficult Christmas of her life. For almost a year, her mother has lain in a nursing home, the victim of a massive stroke, and Natalie blames herself for not being there when it happened. Worse, she's allowed the monstrous load of guilt to drive a wedge between her and everyone she loves—most of all her husband Daniel. Her marriage is on the verge of dissolving, her prayer life is suffering, and she's one Christmas away from hitting rock bottom Junior-high basketball coach Daniel Pearce is at his wit's end. Nothing he's done has been able to break through the wall Natalie has erected between them. And their daughter Lissa's adolescent rebellion isn't helping matters. As Daniel's hope reaches its lowest ebb, he wonders if this Christmas will spell the end of his marriage and the loss of everything he holds dear.

In the classic nature work, *The Yosemite*, the great American naturalist, John Muir, describes the Yosemite valley's geography and the myriad types of trees, flowers, birds, and other animals that can be found there. *The Yosemite* is among the finest examples of John Muir nature writings. *The Yosemite* is a classic nature/outdoor adventure text and a fine example of John Muir nature writings. In this volume, Muir describes the Yosemite valley's geography and the various types of trees, flowers and animals that can be found there. John Muir (April 21, 1838 - December 24, 1914) also known as "John of the Mountains" and "Father of the National Parks", was an influential Scottish-American naturalist, author, environmental philosopher, glaciologist and early advocate for the preservation of wilderness in the United States. His letters, essays, and books describing his adventures in nature, especially in the Sierra Nevada, have been read by millions. His activism has helped to preserve the Yosemite Valley, Sequoia National Park and many other wilderness areas. The Sierra Club, which he co-founded, is a prominent American conservation organization. The 211-mile (340 km) John Muir Trail, a hiking trail in the Sierra Nevada, was named in his honor.[6] Other such places include Muir Woods National Monument, Muir Beach, John Muir College, Mount Muir, Camp Muir, Muir Grove, and Muir Glacier. In Scotland, the John Muir Way, a 130-mile-long route, was named in honor of him. In his later life, John Muir devoted most of his time to the preservation of the Western forests. As part of the campaign to make Yosemite a national park, Muir published two landmark articles on wilderness preservation in *The Century Magazine*, "The Treasures of the Yosemite" and "Features of the Proposed Yosemite National Park"; this helped support the push for U.S. Congress to pass a bill in 1890 establishing Yosemite National Park. The spiritual quality and enthusiasm toward nature expressed in his writings has inspired readers, including presidents and congressmen, to take action to help preserve large nature areas.[8] John Muir has been considered "an inspiration to both Scots and Americans". Muir's biographer, Steven J. Holmes, believes that Muir has become "one of the patron saints of twentieth-century American environmental activity," both political and recreational. As a result, his writings are commonly discussed in books and journals, and he is often quoted by nature photographers such as Ansel Adams. "Muir has profoundly shaped the very categories through which Americans understand and envision their relationships with the natural world," writes Holmes. John Muir was noted for being an ecological thinker, political spokesman, and religious prophet, whose writings became a personal guide into nature for countless individuals, making his name "almost ubiquitous" in the modern environmental consciousness. According to author William Anderson, Muir exemplified "the archetype of our oneness with the earth", while biographer Donald Worster says he believed his mission was "...saving the American soul from total surrender to materialism." 403 On April 21, 2013, the first ever John Muir Day was celebrated in Scotland, which marked the 175th anniversary of his birth, paying homage to the conservationist.

One question. What is a woman for? In this ferociously imaginative novel, abortion is once again illegal in America, in-vitro fertilization is banned, and the Personhood Amendment grants rights of life, liberty, and property to every embryo. In a small Oregon fishing town, five very different women navigate these new barriers alongside age-old questions surrounding motherhood, identity, and freedom. Ro, a single high-school teacher, is trying to have a baby on her own, while also writing a biography of Eivør, a little-known 19th-century female polar explorer. Susan is a frustrated mother of two, trapped in a crumbling marriage. Mattie is the adopted daughter of dotting parents and one of Ro's best students, who finds herself pregnant with nowhere to turn. And Gin is the gifted, forest-dwelling herbalist, or "mender," who brings all their fates together when she's arrested and put on trial in a frenzied modern-day witch hunt. RED CLOCKS is at once a riveting drama, whose mysteries unfold with magnetic energy, and a shattering novel of ideas. In the vein of Margaret Atwood and Eileen Myles, Leni Zumas fearlessly explores the contours of female experience, evoking THE HANDMAID'S TALE for a new millennium. This is a story of resilience, transformation, and hope in tumultuous-even frightening-times.

In 1941, the National Park Service hired Ansel Adams to photograph national parks and other western landscapes, with the goal of creating murals for the Department of the Interior building. Although this project was canceled in 1942 at the beginning of World War II, Adams' compiled 226 stunning photographs during his work for the government. 12 of these images are presented in this 2017 mini wall calendar. Each photo was meticulously prepared by photographer and imaging expert Grant Collier in an effort to do justice to Adams' images.
