A History of Three-Dimensional Cinema chronicles 3-D cinema as a single, continuous and coherent medium, proceeding from 19th-century experiments in stereoscopic photography and lantern projection (1839-1892) to stereoscopic cinema's "long novelty period" (1893-1952). It proceeds to examine the first Hollywood boom in anaglyphic stereo (1953-1955), when the mainstream industry produced 69 features in 3-D, mostly action films that could exploit the depth illusion, but also a handful of big-budget films—for example, Kiss Me Kate (George Sidney, 1953) and Dial M for Murder (Alfred Hitchcock, 1954)—until audiences tired of the process; the anaglyphic revival of 1970-1985, when 3-D was sustained as a novelty feature in sensational genres like soft-core pornography and horror; the age of IMAX 3-D (1986-2008); the current era of digital 3-D cinema, which began in 2009 when James Cameron's Avatar became the highest-grossing feature of all time and the studios once again stampeded into 3-D production; and finally the future promise of Virtual Reality.

"This is a fascinating book. It will educate you. Schwartzel has done some extraordinary reporting."

— The New York Times Book Review "In this highly entertaining but deeply disturbing book, Erich Schwartzel demonstrates the extent of our cultural thrall to China. His depiction of the craven characters, American and Chinese, who have enabled this situation represents a significant feat of investigative journalism. His narrative is about not merely the movie business, but the new world order." —Andrew Solomon, author of Far from the Tree and The Noonday Demon An eye-opening and deeply reported narrative that details the surprising role of the movie business in the high-stakes contest between the U.S. and China From trade to technology to military might, competition between the United States and China dominates the foreign policy landscape. But this battle for global influence is also playing out in a strange and unexpected arena: the movies. The film industry, Wall Street Journal reporter Erich Schwartzel explains, is the latest battleground in the tense and complex rivalry between these two world powers. In recent decades, as China has grown into a giant of the international economy, it has become a crucial source of revenue for the American film industry. Hollywood studios are now bending over backward to make movies that will appeal to China's citizens—and gain approval from severe Communist Party censors. At the same time, and with America's unwitting help, China has built its own film industry into an essential arm of its plan to export its national agenda to the rest of the world. The competition between these two movie businesses is a Cold War for this century, a clash that determines whether democratic or authoritarian values will be broadcast most powerfully around the world. Red Carpet is packed with memorable characters who have—knowingly or otherwise—played key roles in this tangled industry web: not only A-list stars like Matt Damon, Angelina Jolie, and Richard Gere but also eccentric Chinese billionaires, zany expatriate filmmakers, and starlets who disappear from public life without explanation or trace. Schwartzel combines original reporting, political history, and show-biz intrigue in an exhilarating tour of global entertainment, from propaganda film sets in Beijing to the boardrooms of Hollywood studios to the living rooms in Kenya where families decide whether to watch an American or Chinese movie. Alarming, occasionally absurd, and wildly entertaining, Red Carpet will not only alter the way we watch movies but also offer essential new perspective on the power struggle of this century.

A timely look at the impact of China's booming emergence on the countries of Southeast Asia Today, Southeast Asia stands uniquely exposed to the waxing power of the new China. Three of its nations border China and five are directly impacted by its claims over the South China Sea. All dwell in the lengthening shadow of its influence: economic, political, military, and cultural. As China seeks to restore its former status as Asia's preeminent power, the countries of Southeast Asia face an increasingly stark choice: flourish within Beijing's orbit or languish outside of it. Meanwhile, as rival powers including the United States take concerted action to curb Chinese ambitions, the region has emerged as an arena of heated strategic competition. Drawing on more than a decade of on-the-ground experience, Sebastian Strangio explores the impacts of China's rise on Southeast Asia, the varied ways in which the countries of the region are responding, and what it might mean for the future balance of power in the Indo-Pacific. Winnie the Pooh and his friends from the Hundred-Acre Wood contemplate some of the best things to say "thank you" for in this delightful board book that comes with plush Pooh Bear ears!

This book explores xiangsheng, one of the most popular folk art performance genres in China, its enlistment by official propaganda machine after the founding of the People's Republic of China (PRC) and its revival in popularity under Guo Degang and his Deyun Club. Just as the 1950's saw the shift of xiangsheng 's social function from entertainment to the political tool of 'serving the party', Guo Degang has completed the paradigm shift by turning its focus back to 'serving the people' as a means of entertainment and social criticism. This volume examines how Guo has resurrected the essence of xiangsheng, successfully commercialised it in a market economy, and simultaneously deconstructed the official discourse through grassroots means. The record-breaking records annual is back and packed with more incredible

A study of how the film industry came to flourish in Detroit in the early years as locals were lured into the new picture theaters. Motor City Movie Culture, 1916–1925 is a broad textured look at Hollywood coming of age in a city with a burgeoning population and complex demographics. Richard Abel investigates the role of local Detroit organizations in producing, distributing, exhibiting, and publicizing films in an effort to make moviegoing part of everyday life. Tapping a wealth of primary source material—from newspapers, spatiotemporal maps, and city directories to rare trade journals, theater programs, and local newsreels—Abel shows how entrepreneurs worked to lure moviegoers from Detroit's diverse ethnic neighborhoods into the theaters. Covering topics such as distribution, programming practices, nonfiction film, and movie coverage

in local newspapers, with entr'actes that dive deeper into the roles of key individuals and organizations, this book examines how efforts in regional metropolitan cities like Detroit worked alongside California studios and New York head offices to bolster a mass culture of moviegoing in the United States.

In this volume of 15 articles, contributors from a wide range of disciplines present their analyses of Disney movies and Disney music, which are mainstays of popular culture. The power of the Disney brand has heightened the need for academics to question whether Disney's films and music function as a tool of the Western elite that shapes the views of those less empowered. Given its global reach, how the Walt Disney Company handles the role of race, gender, and sexuality in social structural inequality merits serious reflection according to a number of the articles in the volume. On the other hand, other authors argue that Disney productions can help individuals cope with difficult situations or embrace progressive thinking. The different approaches to the assessment of Disney films as cultural artifacts also vary according to the theoretical perspectives guiding the interpretation of both overt and latent symbolic meaning in the movies. The authors of the 15 articles encourage readers to engage with the material, showcasing a variety of views about the good, the bad, and the best way forward.

This book examines the relationship that exists between fantasy cinema and the medium of animation. Animation has played a key role in defining our collective expectations and experiences of fantasy cinema, just as fantasy storytelling has often served as inspiration for our most popular animated film and television. Bringing together contributions from world-renowned film and

media scholars, *Fantasy/Animation* considers the various historical, theoretical, and cultural ramifications of the animated fantasy film. This collection provides a range of chapters on subjects including Disney, Pixar, and Studio Ghibli, filmmakers such as Ralph Bakshi and James Cameron, and on film and television franchises such as Dreamworks' *How To Train Your Dragon* (2010–) and HBO's *Game of Thrones* (2011–).

From the creative team behind the bestselling, Caldecott Medal--winning *Finding Winnie* comes an extraordinary wartime adventure seen through the eyes of the world's most beloved bear. Here is a heartwarming imagining of the real journey undertaken by the extraordinary bear who inspired Winnie-the-Pooh. From her early days with her mama in the Canadian forest, to her remarkable travels with the Veterinary Corps across the country and overseas, and all the way to the London Zoo where she met Christopher Robin Milne and inspired the creation of the world's most famous bear, Winnie is on a great war adventure. This beautifully told story is a triumphant blending of deep research and magnificent imagination. Infused with Sophie Blackall's irresistible renderings of an endearing bear, the book is also woven through with entries from Captain Harry Colebourn's real wartime diaries and contains a selection of artifacts from the Colebourn Family Archives. The result is a one-of-a-kind exploration into the realities of war, the meaning of courage, and the indelible power of friendship, all told through the historic adventures of one extraordinary bear.

Phil Lester's first book, *The Vulgar Wasp*, was about one of the world's most hated insects. His second is about just the opposite &– the honey bee, arguably one of our best-loved six-legged creatures. People have revered honey bees for centuries. Today we celebrate them with toys, postage stamps and campaigns to raise awareness; we dress up in large bee suits to protest the use of pesticides; we've even sent bees into space and watched as they adjusted to microgravity. Bees are one of the world's most efficient pollinators. Their work is vital to the success of many food crops, and hence to the world's economy. So we need to take seriously any threats to their health &– including parasites, pathogens, predators and pesticides &– and, guided by evidence at every turn, find a way to minimise harm and keep bees thriving. As *Healthy Bee*, *Sick Bee* shows, this is no small task. In this book, entomologist Phil Lester explores the wonderfully complex and sometimes brutally efficient life history of honey bees, and the problems they face in New Zealand and around the globe. What causes a beehive to collapse? Are pesticides as big a problem as they appear? What can we do to improve the health

Shared, posted, tweeted, commented upon, and discussed online as well as off-line, internet memes represent a new genre of online communication, and an understanding of their production, dissemination, and implications in the real world enables an improved ability to navigate digital culture. This book explores cases of cultural, economic, and political critique levied by the

purposeful production and consumption of internet memes. Often images, animated GIFs, or videos are remixed in such a way to incorporate intertextual references, quite frequently to popular culture, alongside a joke or critique of some aspect of the human experience. Ideology, semiotics, and intertextuality coalesce in the book's argument that internet memes represent a new form of meaning-making, and the rapidity by which they are produced and spread underscores their importance.

Involuntary Motion contributes to the study of refugee flight by using movement as a lens to explore problems in refugee performance and understand the experience of bodies in motion. Drawing from somatics, movement analysis, and dance praxis, the chapters explore forces that set bodies in motion; the spaces in which forced movement occurs; the movement of refugee identity arcs; the monstrosity of refugee performance; and the relationship between writing and body culture. How does forced movement impact identity? What are the philosophical implications of robbing individuals of agency over motion? What performances does involuntary motion necessitate? These questions are important as the world confronts the threat of a return of the horrors of the twentieth century. Bringing together debates in migration studies and movement studies, the book argues that refugees are akin to dancers performing on disappearing stages not of their choosing. It will be of great interest to students and scholars of performance, dance, and politics.

A sweeping history that tracks the development of trade and industry across the world, from Ancient Rome to today. From the development of international trade fairs in the twelfth century to the innovations made in China, India, and the Arab world, it turns out that historical economies were much more sophisticated than we might imagine, tied together by webs of credit and financial instruments much like our modern economy. Here, Philip Coggan takes us from the ancient mountains of North Wales through Grand Central station and the great civilizations of Mesopotamia to the factories of Malaysia, showing how changes in agriculture, finance, technology, work, and demographics have driven the progress of human civilization. It's the story of how trade became broader and deeper over thousands of years; how governments have influenced economies, for good or ill; and how societies have repeatedly tried to tame, and harness, finance. More shows how, at every step of our long journey, it was the connection between people that resulted in more trade, more specialization, more freedom, and ultimately, more prosperity.

The adventures of Christopher Robin and his friends, in which Pooh Bear uses a balloon to get honey, Piglet meets a Heffalump, and Eeyore has a birthday.

This innovative book addresses the question of why increasing numbers of people are being diagnosed with autism since the 1990s. Providing an engaging account of competing and widely debated explanations, it investigates how these have led to differing interpretations of the same data. Crucially, the author argues that the increased use of autism diagnosis is due to medicalisation across the life course, whilst holding open the possibility that the rise may also be partly accounted for by modern-day environmental exposures, again, across the life course. A further focus of the book is not on whether autism itself is valid as a diagnostic category, but whether and how it is useful as a diagnostic category, and how the utility of the diagnosis has contributed to the rise. This serves to move beyond the question of whether diagnoses are 'real' or social constructions, and instead asks: who do diagnoses serve to benefit, and at what cost do they come? The book will appeal to clinicians and health professionals, as well as medical researchers, who are interested in a review of the data which demonstrates the rising use of autism as a

diagnosis, and an analysis of the reasons why this has occurred. Providing theory through which to interpret the expanding application of the diagnosis and the broadening of autism as a concept, it will also be of interest to scholars and students of sociology, philosophy, psychiatry, psychology, social work, disability studies and childhood studies.

Visit our all-new Pooh website! It was eighty years ago, on the publication of The House at Pooh Corner, when Christopher Robin said good-bye to Winnie-the-Pooh and his friends in the Hundred Acre Wood. Now they are all back in new adventures, for the first time approved by the Trustees of the Pooh Properties. This is a companion volume that truly captures the style of A. A. Milne—a worthy sequel to The House at Pooh Corner and Winnie-the-Pooh. Listen to award-winning narrator Jim Dale reading the Exposition to Return to the Hundred Acre Wood. Also available from Penguin Audio.

"London is a very fine place," announced Pooh. When Winnie-the-Pooh ventures to London he's most surprised to encounter a blustery bus, a wobbly bridge and huge lions. But the greatest excitement of all is when he stands in front of the gates at Buckingham Palace and a very important lady comes out to meet the crowd ... Featuring the Shard, Big Ben, Buckingham Palace and many other famous London landmarks this is a wonderful celebration of a great city as seen through the eyes of the Bear of Very Little Brain. Mark Burgess's illustrations, true to the spirit of the original drawings by E. H. Shepard, perfectly capture this incredibly special meeting. Pooh ranks alongside other beloved character such as Paddington Bear, and Peter Rabbit as an essential part of our literary heritage. Whether you're 5 or 55, Pooh is the bear for all ages.

Contributions by Megan De Roover, Jennifer Harrison, Sarah Jackson, Zoe Jaques, Nada Kujundžić, Ivana Milković, Niall Nance-Carroll, Perry Nodelman, David Rudd, Jonathan Chun Ngai Tsang, Nicholas Tucker, Donna Varga, and Tim Wadham One hundred years ago, disparate events culminated in one of the most momentous happenings in the history of children's literature. Christopher Robin Milne was born to A. A. and Dorothy "Daphne" Milne; Edward Bear, a lovable stuffed toy, arrived on the market; and a living, young bear named Winnie settled in at the London Zoo. The collaboration originally begun by the Milnes, E. H. and Florence Shepard, Winnie herself, and the many toys and personalities who fed into the Pooh legend continued to evolve throughout the twentieth and twenty-first centuries to become a global phenomenon. Yet even a brief examination of this sensation reveals that Pooh and his

adventures were from the onset marked by a rich complexity behind a seeming simplicity and innocence. This volume, after a decades-long lull in concentrated Pooh scholarship, seeks to highlight the plurality of perspectives, modes, and interpretations these tales afford, especially after the Disney Corporation scooped its paws into the honeypot in the 1950s. Positioning Pooh: Edward Bear after One Hundred Years argues the doings of Pooh remain relevant for readers in a posthuman, information-centric, media-saturated, globalized age. Pooh's forays destabilize social certainties on all levels—linguistic, ontological, legal, narrative, political, and so on. Through essays that focus on geography, language, narrative, characterization, history, politics, economics, and a host of other social and cultural phenomena, contributors to this volume explore how the stories open up discourses about identity, ethics, social relations, and notions of belonging. This first volume to offer multiple perspectives from multiple authors on the Winnie-the-Pooh books in a single collection focuses on and develops approaches that bring this classic of children's literature into the current era. Essays included not only are of relevance to scholars with an interest in Pooh, Milne, and the "golden age" of children's literature, but also showcase the development of children's literature scholarship in step with exciting modern developments in literary theory.

For much of recorded history, China was a leading science and technology power. But just as the West rose, China turned in on itself, and missed the Industrial Revolution. The result was the 'Hundred Years of Humiliation', and a long struggle for a modern, yet distinctly Chinese, civilisational identity. Today, technological innovation has returned to the core of national pride and ambition. Since the 1980s, reforms have transformed China into the world's second largest economy and a major global power. Cyber space and other advanced technologies have become a battleground for international dominance; but today's world relies on global supply chains and interstate collaboration--at least, for now. Growing tension between the USA and China could result in the two superpowers decoupling their technology--with significant consequences for humanity's future.
