What began as stray doodles on scraps of paper became an internet sensation when Catana Chetwynd's boyfriend shared her drawings online. Now, Catana Comics touches millions of readers with its sweet, relatable humor. Little Moments of Love collects just that – the little moments that are the best parts of being with the person you love.

An irresistible photographic story featuring wild squirrels in homemade miniature domestic settings -- taking a bath, doing laundry, and barbecuing -- will surprise and amuse readers and animal lovers of all ages! Adorable squirrels as you've never seen them! You may think you know what squirrels do all day...but Mr. Peanuts is no ordinary squirrel. Instead of climbing tress, he plays the piano. ("Moonlight Sonutta" is his favorite.) Instead of scurrying through the woods, he reads books (such as A Tail of Two Cities). But everything is more fun with company, so Mr. Peanuts writes a letter to Cousin Squirrel and invites him for a visit! Featuring candid photographs of wild squirrels in handcrafted, homemade miniature settings, this irresistible book is sure to delight readers young and old!

Is your baseball team getting beat sixty-eight to nothing? Are you caught in the rain without an umbrella? Have you finally worked up the courage to call your crush only to get the Don't worry! The Peanuts gang has the cure for your worries. Join Linus as he awaits the Great Pumpkin, Peppermint Patty as she faces off against an entire hockey team, and Snoopy to eat the largest sandwich he's ever seen. Sally befriends the new girl at school, Eudora, only to find a rival for the affection of her Sweet Babboo. And Charlie Brown searches for Snoopy's mysterious brother, Spike.

Why bother getting out of bed when you could stay bundled up with that special someone and a book of cozy, cute comics. From the author of the bestselling Little Moments of Love, a New York Times bestseller Snug, a collection of comics that perfectly captures the honest, playful, and relatable snapshots of romantic life. Chetwynd's second book has the same charming style as her first and includes 50 percent new, never-before-shared comics. Snug is a celebration of the quirks and peculiarities of every one of us—and the magic that happens with the matching puzzle piece.

Just when we all thought things couldn't get any cuter, from the author of the New York Times bestselling *I Could Pee on This* comes *I Knead My Mommy*, a book of confessional poems, triumphs, trials, and daily discoveries of being a kitten. From climbing walls to claiming hearts, these little cats bare all in such instant classics as "And Then You Said 'No,'" "Ode to the Kitten Who Didn't Know It Was Also a Pet in This House," and "I Will Save You." With adorable photos of the poetic prodigies throughout, this volume gives readers a glimpse into their confused and curious minds as they encounter the world around them.

Cats are done with humans' crap. For too long they have put up with baby talk, the humiliation of holiday costumes, and the social injustice of being told, "No." They will not sleep peacefully anymore. We humans have woken the beast, and in this book they have gathered together to reclaim their voice, loudly and repeatedly until we pay attention. Watch the uprising unfold in anthems such as "Redefine Terms," "Accepted," "Decide," "A New Dawn," and "Just What Do You Think You're Doing?" Show support for your feline friends and try to understand why they are so spitting mad.

Who's Crazy? What does it mean to be crazy? Is using the word crazy offensive? What happens when such a label gets attached to your everyday experiences? In order to understand mental health, we need to talk openly about it. Because there's no single definition of crazy, there's no single experience that embodies it, and the word itself means different things—wild? extreme? disturbed? passionate?—to different people. (Don't) Call Me Crazy is a conversation starter and guide to better understanding how our mental health affects us every day. Thirty-three writers, athletes, and artists offer essays, lists, comics, and illustrations that explore their personal experiences with mental illness, how we do and do not talk about mental health, help for better understanding how every person's brain is wired differently, and what, exactly, might make

someone crazy. If you ' ve ever struggled with your mental health, or know someone who has, come on in, turn the pages, and let ' s get talking.

This new edition builds on the explosion of research on sustainable agriculture since the late 1980s. By separating myth from reality, Miguel Altieri extracts the key principles of sustainable agriculture and expounds on management systems that "really work." Providing case studies of sustainable rural development in developing countries, he goes beyond a mere description of practices to include data that reveal the socioeconomic and environmental impacts of alternative projects. Each chapter of Agroecology has been enriched and updated with the latest research results from around the world. New emphasis has been placed on such issues as the ecological economics of agriculture, policy changes needed for promoting sustainable agriculture, rural development in the Third World, the role of biodiversity in agriculture, and new research methodologies.

FAO provides countries with technical support to conduct nutrition assessments, in particular to build the evidence base required for countries to achieve commitments made at the Second International Conference on Nutrition (ICN2) and under the 2016-2025 UN Decade of Action on Nutrition. Such concrete evidence can only derive from precise and valid measures of what people eat and drink. There is a wide range of dietary assessment methods available to measure food and nutrient intakes (expressed as energy insufficiency, diet quality and food patterns etc.) in diet and nutrition surveys, in impact surveys, and in monitoring and evaluation. Different indicators can be selected according to a study's objectives, sample population, costs and required precision. In low capacity settings, a number of other issues should be considered (e.g. availability of food composition tables, cultural and community specific issues, such as intra-household distribution of foods and eating from shared plates, etc.). This manual aims to signpost for the users the best way to measure food and nutrient intakes and to enhance their understanding of the key features, strengths and limitations of various methods. It also highlights a number of common methodological considerations involved in the selection process. Target audience comprises of individuals (policy-makers, programme managers, educators, health professionals including dietitians and nutritionists, field workers and researchers) involved in national surveys, programme planning and monitoring and evaluation in low capacity settings, as well as those in charge of knowledge brokering for policy-making.

In the vein of Randall Munroe's What If? meets Brian Green's Elegant Universe, a senior writer from Space.com leads readers on a wild ride of exploration into the final frontier, investigating what's really "out there." We've all asked ourselves the question. It's impossible to look up at the stars and NOT think about it: Are we alone in the universe? Books, movies and television shows proliferate that attempt to answer this question and explore it. In OUT THERE Space.com senior writer Dr. Michael Wall treats that question as merely the beginning, touching off a wild ride of exploration into the final frontier. He considers, for instance, the myriad of questions that would arise once we do discover life beyond Earth (an eventuality which, top NASA officials told Wall, is only drawing closer). What would the first aliens we meet look like? Would they be little green men or mere microbes? Would they be found on a planet in our own solar system or orbiting a star far, far away? Would they intend to harm us, and if so, how might they do it? And might they already have visited? OUT THERE is arranged in a simple question-and-answer format. The answers are delivered in Dr. Wall's informal but informative style, which mixes in a healthy dose of humor and pop culture to make big ideas easier to swallow. Dr. Wall covers questions far beyond alien life, venturing into astronomy, physics, and the practical realities of what long-term life might be like for we mere humans in outer space, such as the idea of lunar colonies, and even economic implications. Dr. Wall also shares the insights of some of the leading lights in space exploration today, and shows how the next space age might be brighter than ever.

The measure of the executive, Peter Drucker reminds us, is the ability to 'get the right things done'. Usually this involves doing what other people have overlooked, as well as avoiding what is unproductive. He identifies five talents as essential to effectiveness, and these can be learned; in fact, they must be learned just as scales must be mastered by every piano student regardless of his natural gifts. Intelligence, imagination and knowledge may all be wasted in an executive job without the acquired habits of mind that convert these into results. One of the talents is the management of time. Another is choosing what to contribute to the particular organization. A third is knowing where and how to apply your strength to best effect. Fourth is setting up the right priorities. And all of them must be knitted together by effective decision-making. How these can be developed forms the main body of the book. The author ranges widely through the annals of business and government to demonstrate the distinctive skill of the executive. He turns familiar experience upside down to see it in new perspective. The book is full of surprises, with its fresh insights into old and seemingly trite situations.

The history of Islamic mapping is one of the new frontiers in the history of cartography. This book offers the first in-depth analysis of a distinct tradition of medieval Islamic maps known collectively as the Book of Roads and Kingdoms (Kitab al-Masalik wa al-Mamalik, or KMMS). Created from the mid-tenth through the nineteenth century, these maps offered Islamic rulers, scholars, and armchair explorers a view of the physical and human geography of the Arabian peninsula, the Persian Gulf, the Mediterranean, Spain and North Africa, Syria, Egypt, Iraq, the Iranian provinces, present-day Pakistan, and Transoxiana. Historian Karen C. Pinto examines around 100 examples of these maps retrieved from archives across the world from three points of view: iconography, context, and patronage. By unraveling their many symbols, she guides us through new ways of viewing the Muslim cartographic imagination.

A New York Times bestseller? Oh, you know the dogs weren't going to let the cats get away with that! This canine companion to *I Could Pee on This*, the beloved volume of poems by cats, *I Could Chew on This* will have dog lovers laughing out loud. Doggie laureates not only chew on quite a lot of things, they also reveal their creativity, their hidden motives, and their eternal (and sometimes misguided) effervescence through such musings as "I Dropped a Ball," "I Lose My Mind When You Leave the House," and "Can You Smell That?" Accompanied throughout by portraits of the canine poets in all their magnificence, *I Could Chew on This* is a work of unbridled enthusiasm, insatiable appetite, and, yes, creative genius. Plus, this is a fixed-format version of the book, which looks nearly identical to the paperback version.
