

228 1r 03 In Place Methods To Estimate Concrete Strength

Looking at more than two hundred Italian medieval and Renaissance mural cycles, Lavin examines—with the aid of computer technology—the "rearranged" chronologies of familiar religious stories found therein. "Like many masterpieces, Lavin's book builds upon a simple idea . . . it is possible to do a computer analysis of . . . visual narratives. . . . This is the first computer-based study of the visual arts of which I am aware that illustrates how those technologies can utterly transform the study of old master art. An extremely important book, one likely to become the most influential recent study of art of this period, *The Place of Narrative* is also a beautiful artifact."—David Carrier, Leonardo "Covering over a millennium and dealing with the whole of Italy, Lavin makes pioneering use of new methodology employing a computer database . . . [and] novel terminology to describe the disposition of scenes of church and chapel walls. . . . We should recognize this as a book of high seriousness which reaches out into new areas and which will fruitfully stimulate much thought on a neglected subject of very considerable significance."—Julian Gardner, *Burlington Magazine*

H h This third volume of RC3 includes data for galaxies between 12 and 24 . For convenience, we repeat the explanation of the catalogue entries below. Details of the reduction procedures, and Notes, References, and Appendices are in Volume 1. 2. The Catalogue The data for each galaxy are found on four successive lines on a single page. The entries are as follows: Column 1: Positions Line 1: RA and DEC = right ascension and declination for the equinox 2000.0, precessed from the 1950.0 position in Column 1, Line 4, given to 0.1 second of time and 1 arcsec when available, and to 0.1 minute of time and 1 arcmin otherwise (Section 3.1.a). Line 2: l and b = galactic longitude and latitude in the IAU 1958 system (Blaauw et al. 1960); both to 0~01. Line 3: SGL and SGB = supergalactic longitude and latitude in the RC2 system (Section 3.1.b), both to 0~01. Line 4: RA and DEC = right ascension and declination for the equinox 1950.0 (Section 3.1.a). Column 2: Names = commonly used designations for the galaxies (Section 3.2). Line 1: Names (e.g., LMC, SMC) or NGC and IC designations. Line 2: UGC (Nilson 1973), ESO (Lauberts 1982), MCG (Vorontsov-Velyaminov et al. 1962-1974), UGCA (Nilson 1974), and CGCG (Zwicky et al. 1961-1968) designations, given in that order of preference. MCG designations not listed here are given in UGC and ESO.

Tables of Logarithms and Anti-Logarithms to five places, with marginal indices for instant reference; to which is added a table for finding logarithms and antilogarithms to ten places; and a table of constants, with formulæ for their application

Wetlands are the unheralded gems of the New Zealand landscape. Seriously endangered and taken for granted by New Zealanders, they are often stunning environments and harbour all manner of beautiful and rare flora and fauna. This beautiful, environmentally important book describes what wetlands do, what we find in wetlands - plants, aquatic life, birds and animals - and it also looks at the conservation and restoration of wetlands.

Examining the different kinds of wetlands - peatlands, wetlands for waders, coastal wetlands, urban wetlands, upland and geothermal wetlands and rivers - it also focuses on the internationally renowned wetlands known as the Ramsar convention wetlands: Firth of Thames, Kopuatai Peat Dome, Whangamarino, Farewell Spit, Waituna Lagoon, and the Manawatu estuary. A substantial book featuring excellent natural history writing by award-winner Janet Hunt combined with excellent photography by Arno Gasteiger.

Annual Statement of the Trade of the United Kingdom [with Foreign Countries and British Possessions]

This study continues the adaptation of the method of Case Frame analysis for the investigation of the Greek text of the

New Testament. Case Frame analysis distinguishes the words of a language into two categories, predicators [words that require completion by other words for their correct grammatical use] and non-predicators [words that do not require such completion], and provides rigorous procedures for describing the syntactic, semantic, and lexical requirements that predicators impose on the words that complete their meaning. The inclusion of semantic function and feature descriptions in Case Frame analysis permits the development of a new genre of lexicon that specifies not only syntactic and lexical information (as do traditional dictionaries) but detailed semantic information. The resulting Case Frame lexicon entries are both more compact and more nuanced than traditional lexicon entries. Danove conducts an exhaustive Case Frame analysis of the ditransitive verbs of transference in the New Testament. He uses this analysis to develop a set of descriptive guidelines for interpreting and translating the various usages of ditransitive verbs of transference and applies these rules in exegetical studies of the text of the New Testament to generate a Case Frame lexicon of the verbs of transference in the New Testament. This study will distinguish the requirements of the 127 New Testament verbs of transference according to four syntactic functions, twelve semantic functions, and 22 lexical realizations. This will permit a rigorous investigation of all occurrences of verbal complements with the same syntactic, semantic, and lexical attributes. The study also will consider the influence of one semantic feature [an inherent quality of words that has implications for their lexical realization] and of the 'intrusion' of four grammatical constructions [inherent structuring templates of grammar that govern syntactic, semantic, and lexical attributes and modify meaning] on each category of complements with the same syntactic, semantic and lexical description. This will produce a rigorous description of meaning that becomes the basis for Danove's contributions to the linguistic study of biblical Greek and to the exegesis of biblical texts.
