A visual resource for students providing training in construction crafts. It covers the Craft Certificate requirements, giving information that students need to pass their exam, with exam style multiple-choice assessment questions, which provide extra support for revision and exam preparation.

Sir Norman Lockyer left Nature , the world's leading scientific journal, as his lasting memorial. But his life, and controversial theories, are an important part of science history. His ideas were at the forefront of public debate, and ranged from brilliant to perverse. This entertaining book is a fascinating insight into his eventful life

A comprehensive analysis of European craft guilds through eight centuries of economic history Guilds ruled many crafts and trades from the Middle Ages to the Industrial Revolution, and have always attracted debate and controversy. They were sometimes viewed as efficient institutions that guaranteed quality and skills. But they also excluded competitors, manipulated markets, and blocked innovations. Did the advantages of guilds outweigh their costs? Analyzing thousands of guilds from 1000 to 1880, The European

Guilds answers that question with vivid examples and clear economic reasoning. Sheilagh Ogilvie features the voices of honourable guild masters, underpaid journeymen, exploited apprentices, shady officials, and outraged customers, and follows the stories of the “vile encroachers”—women, migrants, Jews, gypsies, bastards, and others—desperate to work but hunted down by the guilds as illicit competitors. *The European Guilds* analyzes the toxic complicity between guild members and political elites, and shows how privileged institutions and exclusive networks prey on prosperity and stifle growth.

(It is also fully self-sufficient, though many readers will want to use it with its equally impressive sequel which is being published simultaneously.) In it, Professor Nicholas traces the slow regeneration of urban life in the early medieval period, showing where and how an urban tradition had survived from late antiquity, and when and why new urban communities began to form where there was no such continuity. ### ***The 'General Prologue' to the Canterbury Tales***

This book provides an account of the curricular consequences of the outcomes approach to education (NVQs GNVQs etc). It contains contributions from leading experts in the field and, as such, is likely to become the core text in this area. An initial discussion of the main themes leads the reader into a discussion of key ideas and the theory behind the Outcomes approach covering, in addition, issues concerning standards and quality. Areas of the curriculum covered include assessment, modularization, flexible learning and work-based learning, higher level competences and the autonomous learner. It should be of interest to all

concerned with the development of the curriculum, ranging from school sixth forms through further and higher education to professional industrial trainers with an interest in the development of education and training in the UK.

This is a study of how, and why, the British economy has changed since 1951. It covers the Golden Age of 1945-1973 when unemployment was below one million; when governments built millions of council houses and flats; when electricity, telephones, and gas were supplied by nationalised monopolies; when income and wealth inequality were narrowing; and when the UK was not a member of the European Economic Community. Moving through the inflation, rising

unemployment, and rapid contraction of the manufacturing industry from the mid- 1970s, *Changing Times* examines the transfer of assets which was effected in the privatisation of public housing and nationalised industries from the early 1980s. The role of the State changed as public investment fell. The financing of old-age care, of state pensions, and of the National Health Service became of increasing concern and were less politically amenable to the approach of using private finance (the Private Finance Initiative and tuition fees) to fund former public obligations. Changes were made to the system of taxation, but public expenditure changed little as a share of national income, although the government now built little. Difficulties

emerged in ensuring adequate housing for a growing population, and uncertainty grew as to where future investment in necessities like electricity supply would come from. Having narrowed in the Golden Age, inequality of income and wealth widened. Environmental concerns also grew, from the local smogs of the 1950s, through the concern with acid rain from the 1960s, to the current global concern with climate change. The financial crash of 2008 and the decision to 'Brexit' in the referendum of 2016 reduced economic growth and highlighted the extent of economic change since 1951. This is a study of that change.
