When a friendly hedgehog visits the farm, the chickens build an enormous wall to keep out "prickly invaders," in a humorous tale, with colorful and appealing illustrations, that poses profound questions about fear and the ways we view strangers.

TE - Michigan Fourth Grade Social Studies (MI-04-SS-EN-TS-V2)

Supplement your social studies curriculum with 180 days of daily geography practice! This essential classroom resource provides teachers with weekly geography units that build students' geography knowledge, and are easy to incorporate into the classroom. In a world that is becoming more connected and globalized, 21st century students must have the skills necessary to understand their world and how geography affects them and others. Students will develop their map and spatial skills, learn how to answer text-and photo-dependent questions, and study the 5 themes of geography. Each week covers a particular topic and introduces students to a new place or type of map. The first two weeks consist of a mini-unit that focuses entirely on map skills. For additional units, students will study various places, and how culture and geography are related. With a focus on US states, students will explore various types of maps including physical maps, political maps, topographic maps, thematic maps, climate maps, and various topics including scale, legends, cardinal directions, latitude and longitude, and more. Aligned to state standards and National Geography Standards, this resource includes digital materials.

Based on new research and combining multiple scholarly approaches, these twelve essays tell new stories about the civil rights movement in the state most resistant to change. Wesley Hogan, Françoise N. Hamlin, and Michael Vinson Williams raise questions about how civil rights organizing took place. Three pairs of essays address African Americans' and whites' stories on education, religion, and the issues of violence. Jelani Favors and Robert Luckett analyze civil rights issues on the campuses of Jackson State University and the University of Mississippi. Carter Dalton Lyon and Joseph T. Reiff study people who confronted the question of how their religion related to their possible involvement in civil rights activism. By studying the Ku Klux Klan and the Deacons for Defense in Mississippi, David Cunningham and Akinyele Umoja ask who chose to use violence or to raise its possibility. The final three chapters describe some of the consequences and continuing questions raised by the civil rights movement. Byron D'Andra Orey analyzes the degree to which voting rights translated into political power for African American legislators. Chris Myers Asch studies a Freedom School that started in recent years in the Mississippi Delta. Emily Crosby details the conflicting memories of Claiborne County residents and the parts of the civil rights movement they recall or ignore. As a group, the essays introduce numerous new characters and conundrums into civil rights scholarship, advance efforts to study African Americans and whites as interactive agents in the complex stories, and encourage historians to pull civil rights scholarship closer toward the present.

The Great Plains were once among the greatest grasslands on the planet. But as the United States and Canada grew westward, the Plains were plowed up, fenced in, overgrazed, and otherwise degraded. Today, this fragmented landscape is the most endangered and least protected ecosystem in North America. But all is not lost on the prairie. Through lyrical photographs, essays, historical images, and maps, this beautifully illustrated book gets beneath the surface of the Plains, revealing the lingering wild that still survives and whose diverse natural communities, native creatures, migratory traditions, and natural systems together create one vast and extraordinary whole. Three broad geographic regions in Great Plains are covered in detail, evoked in the unforgettable and often haunting images taken by Michael Forsberg. Between the fall of 2005 and the winter of 2008, Forsberg traveled roughly 100,000 miles across 12 states and three provinces, from southern Canada to northern Mexico, to complete the photographic fieldwork for this project, underwritten by The Nature Conservancy. Complementing Forsberg's images and firsthand accounts are essays by Great Plains scholar David Wishart and acclaimed writer Dan O'Brien. Each section of the book begins with a thorough overview by Wishart, while O'Brien—a wildlife biologist and rancher as well as a writer—uses his powerful literary voice to put the Great Plains into a human context, connecting their natural history with man's uses and abuses. The Great Plains are a dynamic but often forgotten landscape—overlooked, undervalued, misunderstood, and in desperate need of conservation. This book helps lead the way forward, informing and inspiring readers to recognize the wild spirit and splendor of this irreplaceable part of the planet.

Brighter Child(R) Spanish for Grade 2 helps students master beginning foreign language skills. Practice is included for learning number words, neighborhood words, classroom words, and more. School success starts here! Workbooks in the popular Brighter Child(R) series are packed with plenty of fun activities that teach a variety of essential school skills. Students will find help for math, English and grammar, handwriting, and other important subject areas. Each book contains full-color practice pages, easy-to-follow instructions, and an answer key.

"... a curriculum geared toward helping students gain skills in consciously regulating their actions, which in turn leads to increased control and problem solving abilities. Using a cognitive behavior approach, the curriculum's learning activities are designed to help students recognize when they are in different states called "zones," with each of four zones represented by a different color. In the activities, students also learn how to use strategies or tools to stay in a zone or move from one to another. Students explore calming techniques, cognitive strategies, and sensory supports so they will have a toolbox of methods to use to move between zones. To deepen students' understanding of how to self-regulate, the lessons set out to teach students these skills: how to read others' facial expressions and recognize a broader range of emotions, perspective about how others see and react to their behavior, insight into events that trigger their less regulated states, and when and how to use tools and problem solving skills. The curriculum's learning activities are presented in 18 lessons. To reinforce the concepts being taught, each lesson includes probing questions to discuss and instructions for one or more learning activities. Many lessons offer extension activities and ways to adapt the activity for individual student needs. The curriculum also includes worksheets, other handouts, and visuals to display and share. These can be photocopied from this book or printed from the accompanying CD."--Publisher's website.

Fans of Kate DiCamillo and Linda Urban will love The Thing About Georgie, a warm and humorous story starring an unforgettable young boy with dwarfism, from acclaimed author Lisa Graff. As far as Georgie is concerned, everyone has a "thing." The thing about poodles is that Georgie Bishop hates to walk them. The thing about Jeanie the Meanie is that she would rather write on her shoe than help Georgie with their Abraham Lincoln project. The thing about Andy's nonna is that she kisses Georgie's cheeks and doesn't speak one word of English. The thing about Georgie's mom is that she's having a baby—a baby who will probably be taller than Georgie very, very soon. The thing about Georgie . . . well, what is the thing about Georgie?

"Upstanders is about helping young people question the world, build knowledge, become skilled researchers, and communicate thoughtfully-in the service of humanity, not just themselves." -Harvey "Smokey" Daniels and Sara Ahmed How can we meet today's elevated academic goals and engage middle school kids-but not simply replicate our competitive, winner-take-all society? How can our students achieve an even higher standard-demonstrating the capacity and the commitment to bend the world toward justice? In a word, inquiry. Welcome to the classroom of Sara Ahmed. With Smokey Daniels as your guide you'll see exactly how Sara uses inquiry to turn required curricular topics into questions so fascinating that young adolescents can't resist investigating them. Units so engaging that they provide all the complexity the standards could ever expect, while helping students grow from bystanders to Upstanders. Smokey and Sara describe precisely how to create, manage, and sustain a classroom built around choice, small-group collaboration, and critical thinking. You'll be inspired by what Sara's students accomplish, but you'll also come away from Upstanders with a can-do plan for teaching your own classes thanks to: a developmental look at what makes middle school kids special, challenging, and fun specific lessons that develop collaboration, self-awareness, and compassion a toolbox filled with teaching strategies, structures, tools, and handouts "Point-Outs" from Smokey that highlight key teaching moves "Game-Time Decisions" from Sara that reveal in-the-moment instructional choices narratives that document the incredible work that inquiry allows kids to do ambitious, engaging, and important units on commonly taught middle school themes. What kind of classroom do we want for our middle schoolers? How about one that develops the skills the standards demand and prepares kids to take action in the world right now? We can do it-if we help kids become Upstanders.

Scott Foresman Social Studies (2005) components for Growth of a Nation.

The Lewis and Clark Corps of Discovery is often presented as an exciting adventure story of discovery, friendship, and patriotism. However, this same period in U.S. history can be understood quite differently when viewed through anticolonial lens and the Doctrine of Discovery. How might educators critically interrogate the assumptions that underlie this adventure story through their teaching? This book challenges dominant narratives and packaged curriculum about Lewis and Clark to support more responsible social studies instruction. The authors provide a conceptual framework, ready-to-use lesson plans, and teaching resources to address oversimplified versions of the Lewis and Clark expedition. Indigenous perspectives, along with contemporary issues, are embedded in each lesson to encourage active and critical engagement with history and the legacies of conquest those living in what is now called the United States have inherited. Book Features: Offers a new look at social studies curriculum about the Corps of Discovery—and Manifest Destiny—through the Doctrine of Discovery. Includes examples of how Indigenous peoples have long engaged in philosophical, legal, and political challenges to the principles of the Doctrine.Provides social studies lesson plans for elementary and secondary classrooms.Offers useful curriculum materials to help teachers present a deeper examination of this topic.
