Consumer price index U.S. and city averages.

The consumer price index (CPI) measures the rate at which prices of consumer goods and services change over time. It is used as a key indicator of economic performance, as well as in the setting of monetary and socio-economic policy such as indexation of wages and social security benefits, purchasing power parities and inflation measures. This manual contains methodological guidelines for statistical offices and other agencies responsible for constructing and calculating CPIs, and also examines underlying economic and statistical concepts involved. Topics covered include: expenditure weights, sampling, price collection, quality adjustment, sampling, price indices calculations, errors and bias, organisation and management, dissemination, index number theory, durables and user costs.

The worldwide community of solar-terrestrial scientists has embarked on an exciting and intellectually rewarding project - to understand quantitatively the linkage from the Sun through the interplanetary medium and into the depths of our surrounding geospace. The variety and complexity of the physical processes involved in these linkages have stood as a challenge to mankind's understanding for centuries. Through a concerted global effort, the Solar-Terrestrial Energy Program (STEP) has begun to use remarkable new observational tools and modelling capabilities to achieve an unprecedented comprehension of our solar-terrestrial system. STEP has been designed to study the flow of energy starting from the Sun, tracking that energy as it progressed through the interplanetary medium into the magnetosphere-ionosphere system and ultimately through the thermosphere and middle atmosphere to regions adjacent to the Earth's surface. This volume contains a selection of articles presented at the first major STEP Symposium on The Initial Results from the STEP Facilities and Theory Campaigns, and represents the state-of-the-art in the comprehension of solar-terrestrial environments.

Building climate resilience for food security and nutrition

This manual gives a complete, detailed and up-to-date description of the Eurostat-OECD PPP Programme, including its organisation, the various surveys carried out by participating countries and the ways PPPs are calculated and disseminated. It also provides guidance on the use of PPPs. Profiling hundreds of space programmes and their different technologies, Jane's Space Directory enables you to identify thousands of different commercial and defence applications. Key objectives, developments and technical specifications of available vehicles and systems are reviewed, including the new generation of launch vehicles. Structured around the categorisation of functions and presented for quick comparison and

Solar-terrestrial Energy Program

This first comprehensive review of airborne measurement principles covers all atmospheric components and surface parameters. It describes the common techniques to characterize aerosol particles and cloud/precipitation elements, while also explaining radiation quantities and pertinent hyperspectral and active remote sensing measurement techniques along the way. As a result, the major principles of operation are introduced and exemplified using specific instruments, treating both classic and emerging measurement techniques. The two editors head an international community of eminent scientists, all of them accepted and experienced specialists in their field, who help readers to understand specific problems related to airborne research, such as immanent uncertainties and limitations. They also provide guidance on the suitability of instruments to measure certain parameters and to select the correct type of device. While primarily intended for climate, geophysical and atmospheric researchers, its relevance to solar system objects makes this work equally appealing to astronomers studying atmospheres of solar system bodies with telescopes and space probes.

This book makes the case for the development and implementation of environmental and sustainability rating systems (ESRSs) in new industry contexts, including energy, heavy and light industries, manufacturing, transportation, mining, and oil and gas.

Si può registrare un colore come marchio? Chi è il titolare di un brevetto per invenzione, se questa è stata sviluppata da un lavoratore dipendente? È possibile utilizzare un archivio informatizzato con i dati dei propri utenti per scopi diversi da quelli per cui è stato creato? La soluzione a questi e ad altri quesiti si trova nella Guida "Il Diritto industriale", a cura dello Studio Trevisan & Cuonzo. La

Guida affronta con taglio multidisciplinare tutti gli aspetti relativi alla disciplina della proprietà industriale e intellettuale (IP) e dell'“information technology” (IT), esaminando il ruolo “duale” della proprietà industriale nell'impresa contemporanea. Da un lato una “barriera all'entrata”, cioè diritti di monopolio che hanno la funzione di tenere lontani i concorrenti da aree di esclusiva; dall'altro assets aziendali in grado di generare flussi finanziari attraverso cessioni e licenze. Questa ambivalenza si riflette nella valutazione economica di questi diritti che spesso dipende dall'esito di complessi contenziosi internazionali, con implicazioni che possono essere anche di natura fiscale, regolatoria e antitrust. Particolarmente interessanti sono le metodologie di “case management” e controllo dei costi, quindi la negoziazione di accordi vantaggiosi con gli studi legali esterni e l'utilizzazione di e-billing. Con l'emergere della new economy, infine, sempre più rilevanti sono le regole dell'IT: la protezione della proprietà intellettuale in rete, le responsabilità degli operatori e dei service providers, la tutela delle opere multimediali, oltre alle interconnessioni fra IP e IT e le nuove problematiche che il giurista d'impresa si trova ad affrontare nell'universo di internet. Arricchiscono e completano il volume case history, esempi, schemi riepilogativi, focus, casistica, approfondimenti, clausole contrattuali ed un dettagliato indice analitico.

STRUTTURA DEL VOLUME

Capitolo 1 - DISCIPLINA DELLA CONCORRENZA SLEALE 1. Inquadramento 2. Presupposti oggettivi e soggettivi 3. Atti di concorrenza sleale: profili generali 4. Le fattispecie previste dall'art. 2598, n. 1 c.c. 5. Le fattispecie previste dall'art. 2598, n.2 c.c. 6. Le fattispecie previste dall'art. 2598, n. 3 c.c.

Capitolo 2 - L'IDENTITÀ DELL'IMPRESA: I SEGNI DISTINTIVI 1. Inquadramento 2. Registrazione del marchio 3. Segni suscettibili di costituire valido marchio: gli impedimenti assoluti 4. Gli impedimenti relativi alla registrazione 5. I diritti conferiti dalla registrazione 6. L'esaurimento del diritto 7. Nullità e decadenza 8. I marchi collettivi 9. Indicazioni geografiche 10. I marchi antipirateria 11. I segni non registrati 12. I nomi a dominio

Capitolo 3 - RICERCA E INNOVAZIONE 1. Invenzioni industriali 2. Brevetto 3. Brevetto italiano 4. Brevetto europeo 5. Titolari dei diritti 6. Ambito di protezione 7. Contraffazione 8. Limitazioni del diritto di brevetto 9. Estinzione del diritto di brevetto 10. Nullità del brevetto 11. Trasferimento coattivo dei diritti 12. Invenzioni biotecnologiche 13. Modelli di utilità 14. Topografie di prodotti a semiconduttori 15. Segreto industriale 16. Varietà vegetali

Capitolo 4 - DISEGNI E MODELLI 1. Inquadramento 2. I requisiti di validità 3. Il prodotto complesso e le parti staccate di prodotto 4. Ambito di tutela 5. Giurì del design

Capitolo 5 - LA TUTELA DELLA CREATIVITÀ 1. Fonti 2. Aspetti generali 3. Le banche dati 4. Il software 5. Opere del disegno industriale 6. Il diritto d'autore nell'attività dell'impresa

Capitolo 6 - LA TUTELA GIUDIZIARIA DEI DIRITTI IP 1. Le fonti 2. Le Sezioni Specializzate in materia di Impresa 3. Le azioni 4. Condizioni di procedibilità/azionabilità 5. Rapporti tra procedure amministrative e procedimenti giudiziari 6. La giurisdizione internazionale 7. Competenza 8. Azioni di nullità e decadenza 9. Rivendica 10. Azione per il riconoscimento della paternità 11. Azione di contraffazione/violazione/concorrenza sleale 12. L'onere della prova 13. L'istruttoria nei giudizi IP 14. Le misure cautelari 15. Il giudizio di merito 16. Le sanzioni civili 17. Risarcimento del danno 18. Spese legali 19. Responsabilità processuale aggravata 20. Azioni di decadenza e di nullità innanzi all'UAMI 21. L'arbitrato 22. Esecuzione sui titoli di proprietà industriale 23. La trascrizione 24. I diritti di garanzia 25. L'espropriazione 26. La pirateria 27. Il monitoraggio doganale 28. Altre forme di tutela – rinvio 29. La tutela penale 30. Profili processuali

Capitolo 7 - INFORMATION TECHNOLOGY 1. Privacy e nuove tecnologie 2. La proprietà intellettuale nella società dell'informazione 3. Privacy e

fruizione di opere protette da diritti: limiti di fruizione Capitolo 8 - LA COMUNICAZIONE PUBBLICITARIA 1. La comunicazione pubblicitaria 2. La pubblicità ingannevole 3. La pubblicità comparativa 4. Le normative settoriali 5. Il contenzioso pubblicitario Capitolo 9 - DIRITTI IP E DISCIPLINA ANTITRUST 1. I rapporti tra diritto della concorrenza e proprietà intellettuale 2. Le fonti del diritto della concorrenza ed i rapporti tra diritto interno e diritto europeo 3. Mercato rilevante e diritti IP 4. Esercizio dei diritti IP e divieto di intese restrittive della concorrenza: breve analisi dell'articolo 101 TFUE 5. Gli accordi di trasferimento di tecnologia 6. I pool tecnologici 7. Gli accordi transattivi nel settore farmaceutico 8. Gli accordi aventi ad oggetto diritti IP non "tecnologici" 9. Abuso di posizione dominante ed esercizio di diritti IP: breve analisi dell'art. 102 TFUE 10. Le singole fattispecie di abuso connesse all'esercizio di diritti IP Capitolo 10 - ACQUISIZIONI SOCIETARIE 1. Caratteristiche generali delle acquisizioni "IP driven" 2. La fase pre-negoziale 3. La due diligence 4. Struttura e contenuti del contratto di acquisizione 5. Signing, closing e completion Capitolo 11 - CONTRATTI E IP 1. La circolazione dei diritti IP 2. Il trasferimento dei segni distintivi 3. La licenza dei segni distintivi: licenza di marchio 4. Il trasferimento di tecnologia 5. Trasferimento e licenza di diritti d'autore

High Performance Embedded Architectures and Compilers

Potter & Perry's Essentials of Nursing Practice, 1sae, E Book

Telephone Directory

Consumer Price Index Manual

Each issue includes a classified section on the organization of the Dept.

This book constitutes the refereed proceedings of the Fourth International Conference on High Performance Embedded Architectures and Compilers, HiPEAC 2009, held in Paphos, Cyprus, in January 2009. The 27 revised full papers presented together with 2 invited keynote paper were carefully reviewed and selected from 97 submissions. The papers are organized in topical sections on dynamic translation and optimisation, low level scheduling, parallelism and resource control, communication, mapping for CMPs, power, cache issues as well as parallel embedded applications.

Lists citations with abstracts for aerospace related reports obtained from world wide sources and announces documents that have recently been entered into the NASA Scientific and Technical Information Database.

Airborne Measurements for Environmental Research

PC Mag

Get a solid foundation in essential nursing principles, concepts, and skills! Potter & Perry's Essentials of Nursing Practice, First South Asia Edition combines everything you need from your fundamentals course and streamlines it into a format that's perfect for busy nursing students. The South Asia edition retains many classic features, including chapter case studies, procedural guidelines, and special considerations for various age groups, along with new content including a chapter on Complementary and Alternative Therapies, a new Reflective Learning section, and QSEN activities to encourage active learning. Thoroughly reviewed by nursing clinical experts and educators, this new edition ensures you learn nursing Essentials with the most accurate, up-to-date, and easy-to-understand book on the market.

For more than 40 years, Computerworld has been the leading source of technology news and information for IT influencers worldwide. Computerworld's award-winning Web site (Computerworld.com), twice-monthly publication, focused conference series and custom research form the hub of the world's largest global IT media network.

This book constitutes the refereed proceedings of the 7th Annual European Symposium on Algorithms, ESA '99, held in Prague, Czech Republic, in July 1999. The 44 revised papers presented were carefully reviewed and selected from a total of 122 submissions. All areas of algorithmic research are covered, in particular approximation algorithms, combinatorial optimization, computational mathematics, computational science, databases and information retrieval, graph computations, network algorithms, online algorithms, pattern matching, data compression, parallel algorithms, distributed algorithms, and sequential algorithms.

2005 Article IV Consultation—Staff Report and Public Information Notice on the Executive Board Discussion

Collection of the monthly climatological reports of the United States by state or region, with monthly and annual national summaries.

New evidence this year corroborates the rise in world hunger observed in this report last year, sending a warning that more action is needed if we aspire to end world hunger and malnutrition in all its forms by 2030. Updated estimates show the number of people who suffer from hunger has been growing over the past three years, returning to prevailing levels from almost a decade ago. Although progress continues to be made in reducing child stunting, over 22 percent of children under five years of age are still affected. Other forms of malnutrition are also growing: adult obesity continues to increase in countries irrespective of their income levels, and many countries are coping with multiple forms of malnutrition at the same time – overweight and obesity, as well as anaemia in women, and child stunting and wasting. Last year's report showed that the failure to reduce world hunger is closely associated with the increase in conflict and violence in several parts of the world. In some countries, initial evidence showed climate-related events were also undermining food security and nutrition. This year's report goes further to show that climate variability and extremes – even without conflict – are key drivers behind the recent rise in global hunger and one of the leading causes of severe food crises and their impact on people's nutrition and health. Climate variability and exposure to more complex, frequent and intense climate extremes are threatening to erode and reverse gains in ending hunger and malnutrition. Furthermore, hunger is significantly worse in countries where agriculture systems are highly sensitive to rainfall, temperature and severe drought, and where the livelihood of a high proportion of the population depends on agriculture. The findings of this report reveal new challenges to ending hunger, food insecurity and all forms of malnutrition. There is an urgent need to accelerate and scale up actions that strengthen resilience and adaptive capacity of people and their livelihoods to climate variability and extremes. These and other findings are detailed in the 2018 edition of *The State of Food Security and Nutrition in the World*.

This 2005 Article IV Consultation highlights that recent accession to the European Union and gains in growth performance reinforced the Czech Republic's position as one of the most open and developed economies among the new member states. Thanks to substantial foreign direct investment, its manufacturing sector is closely integrated into cross-border production networks, and foreign-owned firms now account for most of industrial exports. Banking sector indicators are positive, and bank lending—led by credit to households—continue to rebound. Past restructuring and improved risk management have also strengthened banks.
