## **50 Astronomy Questions And Answers Bileteore**

Can You Play Cricket on Mars?  
answers questions like: is there a  
dark side to the Moon? What  
happens when a comet hits the  
Sun? Do the Martian canals  
have any water in them? Is the  
Moon hot inside? What would  
happen if the Sun were to collide  
with a black hole? Mars has  
polar ice caps: could polar bears  
live there? If I could go back to  
the time of the dinosaurs, would  
the sky look the same as it does  
today? and many more.

Astronomy and the Bible is a  
155-page paperback which

Bileteore

answers 100 intriguing questions about astronomy and science.

Written by Grace College professor Dr. Don B. DeYoung, it is subtitled Questions and Answers. The questions range across subjects such as the earth and the moon, the solar system, the stars, galaxies and the universe, and general science. Published by BMH Books, Winona Lake, Ind., the book includes a new, helpful series of seasonal star charts for the Northern Hemisphere, along with a general and a scripture index. DeYoung, who has taught at Grace College since 1972, is known internationally for his work

in creation science. He is president of the Creation Research Society and is the author of 17 books, including Pioneer Explorers of Intelligent Design, also published by BMH books. He and his wife, Sally, are members of the Winona Lake (Ind.) Grace Brethren church. Astronomy and the Bible's question-and-answer format makes it a practical tool for the classroom and home school. About the book, Christian Retailing magazine commented, "How refreshing and rare to find an astronomy book where God's Word, not scientific theory, finds pre-eminence." Bibliotheca

answering more than 1,000 questions, such as Is the universe infinite? What would happen to you if you fell onto a black hole? What are the basic concepts of Einstein's special theory of relativity? and Who was the first person in space?

A sweeping tour of the infrared universe as seen through the eyes of NASA's Spitzer Space Telescope. Astronomers have been studying the heavens for thousands of years, but until recently much of the cosmos has been invisible to the human eye. Launched in 2003, the Spitzer Space Telescope has brought the infrared universe into focus.

as never before. Michael Werner and Peter Eisenhardt are among the scientists who worked for decades to bring this historic mission to life. Here is their inside story of how Spitzer continues to carry out cutting-edge infrared astronomy to help answer fundamental questions that have intrigued humankind since time immemorial: Where did we come from? How did the universe evolve? Are we alone? In this panoramic book, Werner and Eisenhardt take readers on a breathtaking guided tour of the cosmos in the infrared, beginning in our solar system and venturing ever

outward toward the distant origins of the expanding universe. They explain how astronomers use the infrared to observe celestial bodies that are too cold or too far away for their light to be seen by the eye, to conduct deep surveys of galaxies as they appeared at the dawn of time, and to peer through dense cosmic clouds that obscure major events in the life cycles of planets, stars, and galaxies.

Featuring many of Spitzer's spectacular images, *More Things in the Heavens* provides a thrilling look at how infrared astronomy is aiding the search for exoplanets and
