Literacy research has continued to develop at a rapid pace in these last five years of the millennium. New ideas about how children learn to read have led to a better understanding of the causes of progress and failure in the mastery of literacy, with repercussions for children's assessment and teacher education. These new discoveries also allow teachers to transcend the old debates in reading instruction (phonics versus whole language) and offer the path to a synthesis. At the same time, research with teachers about their own implementation of methods and the development of their own knowledge about the teaching of literacy has produced a fresh analysis of the practice of literacy teaching. Inspired by these developments, teachers, teacher educators and researchers worked together to produce this volume, which promotes the integration of literacy research and practice.

This textbook provides a framework for teaching children's language and literacy and introduces research-based tactics for teachers to use in designing their literacy programs for children. Exploring how sense-making occurs in contemporary literacy practice, Murphy comprehensively covers major topics in literacy, including contemporary multimodal literacy practices, classroom discourse, literacy assessment, language and culture, and teacher knowledge. Organized around themes—talk, reading and composing representation—this book comprehensively invites educators to make sense of their own teaching practices while demonstrating the complexities of how children make sense of and represent meaning in today's world. Grounded in research, this text features a wealth of real-world, multimodal examples, effective strategies and teaching tactics to apply to any classroom context. Ideal for literacy courses, preservice teachers, teacher educators and literacy scholars, this book illustrates how children become literate in contemporary society and how teachers can create the conditions for children to broaden and deepen their sense-making and expressive efforts.

This excellent resource provides a realistic and systematic process that educators can immediately implement for improving reading and writing while enhancing content knowledge and skills.

"In *Poetry Mentor Texts*, Lynne and Rose show teachers how to use poems in both reading and writing workshops and across content areas. Written in a friendly, conversational tone, this practical book explores a variety of poetic forms, including poems that inspire response, list poems, acrostic poems, persona poems, and poems for two voices--versatile forms of poetry that can be used in every grade. Each of these poetic forms has its own chapter featuring five poems with applications for both reading and writing classrooms. Reading connections present skills and strategies to move students forward as readers, helping them to build fluency, vocabulary, comprehension, phonemic awareness, and phonics. Writing connections help students and teachers discover their own voices and grow as poets and wordsmiths as they try out many poetic forms. Poems help students at all grade levels learn to better address complex reading texts, offering them a chance to dig deeper and use higher-order thinking skills. Additionally, Your Turn writing lessons provide a scaffold for seamlessly moving from modeling to the shared or guided experience and the transfer to independent work. The Treasure Chest offers a brief annotation of the poems discussed in each chapter as well as companion pieces that extend and enhance the work of the reading and writing classroom."--Publisher's description.

If you are a teacher of grades K-6, you might be asking, "Should I teach grammar in my class on a daily basis? How would I do this? And how can I teach grammar so it isn't boring to my kids?" In *Grammar Matters*, Lynne Dorfman and Diane Staerck answer these questions and more. Using mentor texts as the cornerstone for how best to teach grammar, this book is packed with almost everything they need to get kids not only engaged but excited about learning grammar. Divided into four parts--Narrative Writing, Informational Writing, Opinion Writing, and Grammar Conversations--this hand reference provides practical teaching tips, assessment ideas, grammar definitions, and specific mentor texts to help students learn about idioms, usage issues, and punctuation. Through "Your Turn Lessons," conversations, conferences, and drafting, revising exercises, students will learn not only specific concepts but also how to reflect upon and transfer what they have learned to writing tasks, no matter the subject. The "Treasure Chest of Children's Books" provides an extensive list of both fiction and nonfiction books that fit naturally into grammar instruction. Eight appendices provide even more resources, including homophones, using mentor texts to teach grammar and conventions, checklists, comma rules, help for ELL students, and a glossary of grammar terms. *Grammar Matters* links instruction to the Common Core State Standards and features quality, classroom-tested activities that help teachers provide their students with the gifts of grammar and literacy.

The first comprehensive research handbook of its kind, this volume showcases innovative approaches to understanding literacy learning in a variety of settings. Distinguished contributors examine how well adolescents are served by current practices and highlight ways to translate research findings more effectively into sound teaching and policymaking. The book also explores social and cultural factors in adolescents' approach to communication and response to instruction, and sections address literacy in and out of schools, including literacy expectations in the contemporary workplace. Detailed attention is given to individual and individual differences among learners. ?

In their first edition of *Mentor Texts*, authors Lynne Dorfman and Rose Cappelli helped teachers across the country use high-quality children's literature in their writing instruction. In *Mentor Texts: Teaching Writing Through Children's Literature*, 2nd Edition the authors continue to show teachers how to help students become confident, accomplished writers by using high-quality literature as their foundation. The second edition includes brand-new "Your Turn Lessons," built around the gradual release of responsibility model, offering suggestions for demonstrations and shared or guided writing. Reflection is emphasized as a necessary

understanding why mentor authors chose certain strategies, literary devices, sentence structures, and words. Dorfman offers new children's book titles in each chapter and in a carefully curated and annotated Treasure Chest. At the end of each chapter, the "Think About It--Talk About It--Write About It" section invites reflection and conversation with colleagues. The book is organized around the characteristics of good writing--focus, content, organization, style, and conventions. The authors write in a conversational style, employing numerous anecdotes to help teachers visualize the process, and offer strategies that can be immediately implemented in the classroom. This practical resource demonstrates the power of learning to read like a writer.

This accessible book will help elementary school teachers improve literacy instruction inside or outside the Common Core environment. The authors address teachers' instructional needs by introducing key concepts from current trends in literacy education—from high-level standards to the use of 21st-century literacies. Readers then follow teachers as they successfully implement the curriculum they developed to promote high-level thinking and engagement with disciplinary content. The text focuses on three disciplinary literacy units of instruction: a science unit in a 2nd-grade classroom, a social studies (history) unit in a 4th-grade classroom, and a mathematics unit in a 6th-grade classroom. Each unit revolves around a central inquiry question and includes research-based strategies for using reading, writing, and classroom talk as tools to foster disciplinary understandings. This unique, insider's look at how real teachers build and implement a Common Core-aligned curriculum will be an invaluable resource for teachers, schools, and districts as they move forward to align their own curricula. "I can't imagine a more timely book . . . a set of elegant principles and some stunning examples of how teachers can use reading, writing, and talk to enhance learning in the science, social studies, and mathematics classroom." —P. David Pearson, professor of language and literacy and human development, Graduate School of Education, University of California, Berkeley "If you're wondering how to integrate literacy across the content disciplines, this is the text you will want to keep and return to often." —Diane Lapp, distinguished professor of education, San Diego State University "Inspiring, and better still, infectious!" —Donald R. Bear, Iowa State University "Provides concrete ideas for teaching students to use literacy to think like scientists, historians, and mathematicians." —Douglas Fisher, professor of educational leadership, San Diego State University, and teacher leader, Health Sciences High and Middle College

Response-to-intervention (RTI) is a multi-tiered intervention process designed in part to identify students with specific learning disabilities ([SLD], Vaughn & Fuchs, 2003). The RTI is also designed to assist struggling readers as they access the general education curriculum. This research effort utilized a pre-test/post-test design to determine the effectiveness of RTI when implemented with struggling readers in middle school. The implementation of evidence-based intensive reading instruction was compared with the implementation of traditional 6th grade instruction. Participants in the research were 56, 6th grade students who scored "Far Below Basic" or "Below Basic" on the 2006-2007 English Language Arts (ELA) California Standards Test (CST) and who scored at 3rd grade level or below on four curriculum-based measurements (CBM). Over 25 different languages are spoken at the school site used in this research, and nearly all of the students are culturally and linguistically diverse (CLD). The sample included 61% Latinos, 30% African American, and 9% Indochinese. Of which, 86% were English Learners (ELs) and 20% of students had specific learning disabilities (SLD). The control group (n = 28) was provided with 6th grade traditional classroom instruction only, with no additional assistance. The intervention group (n = 28) received approximately 30 hours of intense reading instruction in 1:3 teacher-student homogeneous groups. Participants received intervention for one hour (three, 20-minute intervals), three times a week, for 10 weeks, using three out of four scientifically validated reading programs. The research design utilized both descriptive and inferential statistics to measure the effectiveness of interventions using analysis of covariance (ANCOVA) on students' reading scores, overall grade point average, and the effect on students' 2007-2008 ELA CST scores. This study also examined the nature of Tier 1 and Tier 2 learning environments and instruction as they relate to students' language and learning differences. Observations were conducted, followed by interviews with the participating teachers (n = 3) and interventionists (n = 3). The results from this mixed-methods study informs educators about the effects of evidence-based Tier 2 interventions and clarifies the nature of Tier 1 and Tier 2 responsive instruction for diverse student populations.

Turn any student into a bookworm with a few easy and practical strategies Donalyn Miller says she has yet to meet a child she can't turn into a reader. No matter how far behind Miller's students might be when they reach her 6th grade classroom, they end up reading an average of 40 to 50 books a year. Miller's unconventional approach dispenses with drills and worksheets that make reading a chore. Instead, she helps students navigate the world of literature and gives them time to read books they pick out themselves. Her love of books and teaching is both infectious and inspiring. In the book, you'll find: Hands-on strategies for managing and improving your own school library Tactics for helping students walk on their own two feet and continue the reading habit after they've finished with your class Data from student surveys and end-of-year feedback that proves how well the Miller Method works The Book Whisperer includes a dynamite list of recommended "kid lit" that helps parents and teachers find the books that students really like to read.

The Roadmap series works as a year-long companion to earning higher grades, as well as passing the high-stakes 6th Grade Reading and Writing Ohio Proficiency Test that is necessary for grade level promotion. This book has been designed according to the specific standards set forth by the state of Ohio. Now parents can work with their kids to both improve their grades and pass these important tests. The experts at The Princeton Review have analyzed the OPT, and this book provides the most up-to-date, thoroughly researched practice possible. TPR breaks the test down into individual skills and provides lessons modeled after the OPT to familiarize students with the test's structure, while increasing their overall skill level. The Princeton Review knows what it takes to succeed in the classroom and on tests. This book includes strategies that are proven to raise student performance. TPR provides:

- Content review, detailed lessons, and practice exercises modeled after the actual exam
- Proven test-taking skills and techniques such as paragraph labeling and outlining drafts
- 4 complete practice OPTs

Grounded in theory and best-practices research, this practical text provides teachers with 40 strategies for using fiction and non-fiction trade books to teach in five key content areas: language arts and reading, social studies, mathematics, science, and the arts. Each strategy provides everything a teacher needs to get started: a classroom example that models the strategy, a research-based rationale, relevant content standards, suggested books, reader-response questions and prompts, assessment ideas, examples of how to adapt the strategy for different grade levels (K-2, 3-5, and 6-8), and ideas for differentiating instruction for English language learners and struggling students. Throughout the book, student work samples and classroom vignettes bring the content to life.

Strategies in Learning and Using a Second Language examines what it takes to achieve long-term success in languages beyond the first language. Distinguishing language learning from language-use strategies, Andrew D. Cohen disentangles a morass of terminology to help the reader see what language strategies are and how they can enhance performance. Particular areas of research examined in the book include: - links between the use of task-specific strategies and language performance - how multilinguals verbalise their thoughts during language learning and use strategies that learners use in test-taking contexts In this fully revised and substantially rewritten second edition, every chapter has been reworked, with material either updated or replaced. Entirely new material has also been developed based on examples of specific strategies supplied by actual learners, mostly drawn from a website featuring these strategies in the learning of Spanish grammar. *Strategies in Learning and Using a Second language* will be an invaluable resource for language teachers and researchers, as well as for administrators of second language programmes and for students of applied linguistics.

"This book provides a comprehensive conceptual framework and hands-on practical tools for reading assessment. The authors present a clear roadmap for evaluating K-8 students' strengths and weaknesses in each of the basic competencies that good readers need to master. Teachers learn how to select, administer, and interpret a wide range of formal and informal assessments, and how to use the results to improve instruction. In a large-size format for easy photocopying, the book includes 30 reproducible assessment tools."

This timely book shows how award-winning secondary schools and districts are successfully using technology and making systemic changes to increase student engagement, improve achievement, and re-invigorate the teaching and learning process. Through in-depth case studies, we see how experienced school and district leaders use technology in curricular, administrative, and analytical ways to meet the needs of 21st-century learners, educators, and communities. These cases reveal important details addressed by the leadership of these schools and districts that go beyond what they did with technology to include changes in school culture, curriculum and teaching, uses of assessment data, financial considerations, infrastructure, and involvement with the community. Book Features: Successful models from schools/districts experienced with using technology as a lever for school improvement. Case studies from diverse schools/districts across the country that show "what works" and "how it works." A cross-case analysis that makes it easy to compare individual schools and identify common practices. Barbara B. Levin is a Professor in the Department of Teacher Education and Higher Education and Director of the Teachers Academy at the University of North Carolina at Greensboro. Lynne Schrum is Dean, College of Education and Human Services, West Virginia University. "Barbara B. Levin and Lynne Schrum offer their readers the distinct advantage of compressing into a single volume what it took me decades to learn. They not only present the big ideas of effective school leadership, but bring them alive through case studies that illustrate how those ideas manifest themselves in leaders' day-to-day behaviors. . . . I encourage you to use the ideas and practices you find here to leverage technology to create schools in which all students and adults thrive." —From the Foreword by Dennis Sparks, Emeritus Executive Director, National Staff Development Council (Learning Forward) Prepublication Reviews: "In *Leading Technology-Rich Schools*, the authors present a fascinating and exciting set of case studies that provide great insight into the ways leaders can support high-level innovation in schools. Importantly, their focus is on technology that enhances learning and teaching, rather than technology as an expensive school ornament. A must-read for those who study and practice educational leadership." —Jeffrey S. Brooks,

Associate Professor and Educational Leadership Program Coordinator, School of Education, Iowa State University, author of *Black School, White School: Racism and Educational (Mis)leadership* "This book is a precious gift for the vast majority of administrators who desperately need concrete examples of how to create, facilitate, and sustain technology-infused learning environments." —Scott McLeod, Associate Professor and Founding Director, CASTLE, University of Kentucky "These rich illustrations of technology leadership in secondary schools show how a number of complex variables must come together to produce the key outcome of positioning educational technology as a support to teaching and learning. Examples of leadership practices that coordinate team members for interdependent work and invite teachers' involvement should prove to be a valuable resource to practitioners and also provide insight to policymakers for how they can create supportive conditions for such work." —Sara Dexter, Associate Professor, Department of Leadership, Foundations, and Policy, Curry School of Education, University of Virginia "Leading Technology-Rich Schools is a key advance in understanding how technology can best be integrated in today's schools. These case studies of effective practice are sure to become required reading for those in leadership positions who are using technology for school improvement." —Glen L. Bull, Samuel Braley Gray Professor of Education, Curry School of Education, University of Virginia "The rubber meets the road in this well-researched book with detailed stories of exemplary schools and school leaders that have leveraged technology as a key tool to make significant reforms stick. Through these vivid case studies, Levin and Schrum illuminate a dynamic and complex set of lessons learned to help all school leaders undertake transformations of their schools." —L. How can teachers make content-area learning more accessible to their students? This text addresses instructional issues and provides a wealth of classroom strategies to help all middle and secondary teachers effectively enable their students to develop both content concepts and strategies for continued learning. The goal is to help teachers model, through excellent instruction, the importance of lifelong content-area learning. This working textbook provides students maximum interaction with the information, strategies, and examples presented in each chapter. This book is organized around five themes: Content Area Reading: An Overview The Teacher and the Text The Students The Instructional Program School Culture and Environment in Middle and High School Classrooms.

Pedagogical features in each chapter include: a graphic organizer; a chapter overview, Think Before, Think While and Think After Reading Activities - which are designed to integrate students' previous knowledge and experience with their new learnings about issues related to content area reading, literacy, and learning, and to serve as catalysts for thinking and discussions. This textbook is intended as a primary text for courses on middle and high school content area literacy and learning.

Teaching models that focus on blended and virtual learning have become important during the past year and have become integral for the continuance of learning. The i²Flex classroom model, a variation of blended learning, allows non-interactive teaching activities to take place without teachers' direct involvement, freeing up time for more meaningful teacher-student and student-student interactions. There is evidence that i²Flex leads to increased student engagement and motivation as well as better exploitation of teachers' and classroom time leading to the development of higher order cognitive skills as well as study skills for students' future needs related to citizenship, college, and careers. The Handbook of Research on K-12 Blended and Virtual Learning Through the i²Flex Classroom Model focuses not only on how to design, deliver, and evaluate courses, but also on how to assess teacher performance in a blended i²Flex way at the K12 level. The book will discuss the implementation of the i²Flex (isquareFlex), a non-traditional learning methodology, which integrates internet-based delivery of content and instruction with faculty-guided, student-independent learning in combination with face-to-face classroom instruction aiming at developing higher order cognitive skills within a flexible learning design framework. While highlighting new methods for improving the classroom and learning experience in addition to preparing students for higher education and careers, this publication is an essential reference source for pre-service and in-service teachers, researchers, administrators, educational technology developers, and students interested in how the i²Flex model was implemented in classrooms and the effects of this learning model.
