A “constantly captivating...well-researched and often moving” (The Wall Street Journal) history of Checkpoint Charlie, the famous military gate on the border of East and West Berlin where the United States confronted the USSR during the Cold War. In the early 1960s, East Germany committed a billion dollars to the creation of the Berlin Wall, an eleven-

foot-high barrier that consisted of seventy-nine miles of fencing, 300 watchtowers, 250 guard dog runs, twenty bunkers, and was operated around the clock by guards who shot to kill. Over the next twenty-eight years, at least five thousand people attempt to smash through it, swim across it, tunnel under it, or fly over it. In 1989, the East German leadership buckled in the face of a civil revolt that culminated in half a million East Berliners demanding an end to the ban on free movement. The world's media flocked

to capture the moment which, perhaps more than any other, signaled the end of the Cold War. Checkpoint Charlie had been the epicenter of global conflict for nearly three decades. Now, “in capturing the essence of the old Cold War [MacGregor] may just have helped us to understand a bit more about the new one” (The Times, London)—the mistrust, oppression, paranoia, and fear that gripped the world throughout this period. Checkpoint Charlie is about the nerve-wracking confrontation between the West and USSR, highlighting

The shotgun formation. The West Coast Offense. The 4-3 defense. We expect to see these things when we watch football, but without Tom Landry and Bill Walsh, it's possible we wouldn't see any of that. This is the story of how two independent thinkers molded football in general -- and championship football in particular. And they didn't just change the sport's Xs and Os; they changed its style. The story of

their combined influence is unusual because neither man's ideas seriously affected the other's. This story also is the tale of many football greats: Joe Montana, Roger Staubach, Jerry Rice, Tony Dorsett, Ronnie Lott, Bob Lilly, Roger Craig, Ed "Too Tall" Jones and numerous others. What's more, the story of these coaches is one of great opponents: Dan Marino, Fran Tarkenton, Don Shula, Chuck Noll, Mike Ditka and Lawrence Taylor, to name a few. Most of all, this is the story of two icons: Landry, the cerebral, stoic,

impeccably-dressed engineer, and Walsh, the creative, professorial, somewhat sensitive artiste. Their greatest moments rank among football's seminal moments. Fittingly, each coach's most famous play was a pass. For Landry, it was the Hail Mary that beat the Vikings in the 1975 playoffs. And for Walsh, it was, of course, The Catch, which came at the expense of the Landry Cowboys. These stories and many others comprise the larger narrative of how these men shaped the game we see today. PRAISE FOR TOM

DESCRIPTION: Read the story that turned children into warriors, and warriors into legends. The Dairne-Reih haven't been seen in Dionia for generations-their kind and their king, Morgui, banished long ago from haunting paradise. But when creation shows signs of deterioration, the kings of the seven realms converge in the sacred Gvindollion gathering to arrive at one inexplicable conclusion: Morgui has returned. 700 Opening Traps is a unique collection of chess moves which set up the opponent to fall into a mating trap. The games have been derived from practical play, from amateur to Grandmaster level. Opening traps are useful in blitz play, Internet play, and usually with players who do not study opening theory. And at one time or another all players, from Grandmaster to novice, have fallen for a chess trap or sprung one on some unsuspecting opponent. This book contains basic chess instructions for the novice as well as hundreds of chess positions.

THE family from which I am derived is not an ignoble one, but hath descended all along from the priests; and as nobility among several people is of a different origin, so with us to be of the sacerdotal dignity, is an indication of the splendor of a family. Now, I am not only sprung from a sacerdotal family in general, but from the first of the twenty-four courses; and as among us there is not only a considerable difference between one family of each course and another, I am of the chief family of that first course also; nay, further, by my mother I am of the royal blood; for the children of Asamoneus, from whom that family was derived, had both the office of the high priesthood, and the dignity of a king, for a long time together. I will accordingly set down my progenitors in order. Aeterna

When it comes to evolution, most people are thumbs up, thumbs down, or even thumbs sideways. No matter where your thumb is pointing, you must ask the question: what is evolution? The U.S. Court System has witnessed seemingly endless litigation over this topic, yet it has used the term in major cases without clearly outlining a consistent and scientifically agreed upon definition. Public schools are required to teach it, but have also not outlined a scientifically agreed upon definition. State and federal educational agencies that create standard curricula frameworks have failed to offer a consistent and scientifically agreed upon definition of biological evolution. Public educators are free to teach evolution based on the direction their thumbs are

pointed. This reality has placed the future of science at risk. How logical is it for our nation's educational framework to require biological evolution, but not require a standard definition? If Theodosius Dobzhansky is correct in saying that "nothing in biology makes sense except in the light of evolution," then what is evolution?

hundreds of meetings, and interviewed tens of thousands of individuals. Separate chapters of this report discuss crime in America, juvenile delinquency, the police, the courts, corrections, organized crime, narcotics and drug abuse, drunkenness offenses, gun control, science and technology, and research as an instrument for reform. Significant data were generated by the Commission's National Survey of Criminal Victims, the first of its kind conducted on such a scope. The survey found that not only do Americans experience far more crime than they report to the police, but they talk about crime and the reports of crime engender such fear among citizens that the basic quality of life of many Americans has eroded. The core conclusion of the Commission, however, is that a significant reduction in crime

can be achieved if the Commission's recommendations (some 200) are implemented. The recommendations call for a cooperative attack on crime by the Federal Government, the States, the counties, the cities, civic organizations, religious institutions, business groups, and individual citizens. They propose basic changes in the operations of police, schools, prosecutors, employment agencies, defenders, social workers, prisons, housing authorities, and probation and parole officers.
