

## B Come Basta!

This substantial volume comprises almost fifty Semitic and Assyriological studies dedicated to Pelio Fronzaroli, professor of Semitic philology at the University of Florence, written by colleagues and students. This Dictionary contains over 50,000 proverbs, in some 70 European languages and dialects, arranged in 2,500 sets. It is the fruits of over 40 years of collection and research, the only collection of anything like this scale ever to be published anywhere in the world. Emanuel Strauss has trawled through innumerable collections of proverbs in all languages, from early printed books and rare theses and journals, and grouped together many thousands of proverbs in sets of equivalent meaning. Comprehensive indexes for each language provide access to any proverb by way of its key words. The bibliography musters some 500 items, from incunabula to the current decade.

Information Structure in Spoken Arabic

Il Foro veneto

This book summarizes the latest advances in sponge science through a concise selection of studies presented at the VIII World Sponge Conference. The collection of articles reflects hot, ongoing debates in molecular research, such as the monophyletic versus paraphyletic nature of the sponge group, or the new awareness on pros and cons of standard barcodes and other markers in sponge taxonomy and phylogeny. It also features articles showing how the new sequencing technologies reveal the functional and phylogenetic complexity of the "microbial universe" associated to sponge tissues. The ecological interactions of sponges, the effects of nutrients and pollutants, the variability in reproductive patterns, and the processes generating genotypic and phenotypic variability in sponge populations are covered in several contributions. Zoogeography, population structure and dynamics are also approached with both traditional and molecular tools. The effect of anthropogenic disturbance on the natural environment finds its place in this volume with papers dealing with metal accumulation and the potential role of sponges as biomonitors. Biodiversity data from unexplored tropical and deep sea areas are presented. We hope readers will enjoy the selection of papers, which we believe represent collectively a significant contribution to our current understanding of sponges. Previously published in *Hydrobiologia*, vol. 687, 2012

This book explores speakers' intentions, and the structural and pragmatic resources they employ, in spoken Arabic – which is different in many essential respects from literary Arabic. Based on new empirical findings from across the Arabic world this book elucidates the many ways in which context and the goals and intentions of the speaker inform and constrain linguistic structure in spoken Arabic. This is the first book to provide an in-depth analysis of information structure in spoken Arabic, which is based on language as it is actually used, not on normatively-given grammar. Written by leading experts in Arabic linguistics, the studies evaluate the ways in which relevant parts of a message in spoken Arabic are encoded, highlighted or obscured. It covers a broad range of issues from across the Arabic-speaking world, including the discourse-sensitive properties of word order variation, the use of intonation for information focussing, the differential role of native Arabic and second languages to encode information in a codeswitching context, and the need for cultural contextualization to understand the role of "disinformation" structure. The studies combine a strong empirical basis with methodological and theoretical issues drawn from a number of different perspectives including pragmatic theory, language contact, instrumental prosodic analysis and (de-)grammaticalization theory. The introductory chapter embeds the project within the deeper Arabic grammatical tradition, as elaborated by the eleventh century grammarian Abdul Qahir al-Jurjani. This book provides an invaluable comprehensive introduction to an important, yet understudied, component of spoken Arabic.

Dictionary of Antibiotics & Related Substances

Focusing for the first time on more than 25,000 marine-specific natural products, Dictionary of Marine Natural Products with CD-ROM indexes each product by chemical name, organism type, and product type. Following a similar format to the Chapman & Hall Chemical Database, this comprehensive volume is mirrored on an accompanying CD-ROM that is fully text and structure-searchable. Each entry includes biological source, chemical structure, physical properties, biological activity, and literature references. This new tool offers immediate access to information essential to the development of pharmaceuticals, pesticides, and marine anti-fouling agents derived from unique molecular structures of marine natural products.

This collection traces this long revolution over a fifty-year period for the first time, from William Stanley Jevons' *The Theory of Political Economy* (1871), to Eugen Slutsky's *On the Theory of the Consumer* (1915)

Johan Philip Braun (1697-1767), son of Johann Jost Braun, was born in Udenheim, Hessen, Germany. He immigrated to New York in 1709 with his family. He later settled in Pennsylvania. His wife, Elisabeth Magdalena Losch (1699-1763), was the daughter of John Balthaser Losch and Susanna Phillippina Gerina. Descendants lived in Pennsylvania, Ohio, Ontario, Iowa, Minnesota, and elsewhere. In its 114th year, Billboard remains the world's premier weekly music publication and a diverse digital, events, brand, content and data licensing platform. Billboard publishes the most trusted charts and offers unrivaled reporting about the latest music, video, gaming, media, digital and mobile entertainment issues and trends.
