The New Rules for Creating Success, Freedom, and Abundance on Your Terms

Admiral Stavridis, a leader in military, international affairs, and national security circles, shares his love of the sea and some of the sources of that affection. The Sailor's Bookshelf offers synopses that illustrate the history, importance, lore, and lifestyle of the oceans and of those who "go down to the sea in ships." Stavridis colors those descriptions with glimpses of his own service—"sea stories" that not only clarify his choices but show why he is held in such high esteem among his fellow sailors. Divided into four main categories—The Oceans, Explorers, Sailors in Fiction, and Sailors in Nonfiction—Stavridis' choices will appeal to "old salts" and to those who have never known the sights of the ever-changing seascape nor breathed the tonic of an ocean breeze. The result is a navigational guide through the realm of sea literature, covering a spectrum of topics that range from science to aesthetics, from history to modernity, from solo sailing to great battles. Among these eclectic selections are classic and navigation, classic fiction that pits man against the sea, ecological and strategic challenges, celebrations of great achievements and the lessons that come with failure, economic competition, and explorations of the deep, and poetry that beats with the pulse of the wave. Some of the included titles are familiar to many, while others, are likely less well-known but are welcome additions. Admiral Stavridis has chosen some books that are relatively recent, and he recommends other works which have been around much longer and deserve recognition.

When a company's workers are literally dying on the job, when their business model relies on preying on local businesses and even their own vendors, when their CEO is the richest person in the world, how do you make low wages with impossible quotas... wouldn't you want to resist? Danny Caine, owner of Raven Book Store in Lawrence, Kansas has been an outspoken critic of the seemingly unstoppable world: Amazon. In this book, he lays out the case for shifting our personal money and civic investment away from global corporate behemoths and to small, local, independent businesses. We cover the history of big box stores, the big political drama of delivery, and the perils of warehouse work. He shows how Amazon's ruthless discount strategies mean authors, publishers, and booksellers lose money on every book sold. And he spells out a clear path to resistance, in a world where consumers are struggling to get by. In-depth research is interspersed with charming personal anecdotes, making this a readable, fascinating, essential book for the 2020s.

Joel pictured having to go camping and fix a car and use a hammer and throw a football and watch professionals throw footballs and figure out whether to be sad or happy about the results of said football throwing. So begins his quest to confront his effete nature whether he likes it or not (he doesn't), by doing a twenty-four-hour shift with L.A. firefighters, going hunting, rebuilding a house, driving a Lamborghini, enduring three days of boot camp with the U.S. Army, day-trading with \$100,000, and going into the ring with UFC Hall of Famer Randy Couture. Seeking help from a panel of experts, including his manly father-in-law, Boy Scouts, former NFL star Warren Sapp, former MLB All-Star Shawn Green, Adam Carolla, and a pit bull named Hercules, he expects to learn that masculinity is defined not by the size of his muscles, but by the size of his heart (also, technically, a muscle). This is not at all what he learns.
