□Gripping, page-turning material . . . a new way of thinking about survival in a world filled with hazards and distractions.□ □Charles Duhigg, author of Smarter Faster Better and The Power of Habit A safety expert reveals why few of us are as careful as we think we are, and what we can do about it. As doctors and medical researchers work busily to extend our lives, more people each year are figuring out ways to cut them short. In fact, after a hundred years of steady decline, the rate at which people are being injured (or worse) in everyday accidents is increasing. Blame car crashes, pedestrian fatalities, home-improvement projects gone wrong, medical mistakes, home fires□not to mention all the crazy things that kids are into these days. And the problem seems to be spinning out of control. Steve Casner has devoted his career to studying the psychology of safety, and he knows there's not a safety warning we won't ignore or a foolproof device we can't turn into an implement of disaster. Casner details the psychological traps that prevent us from being more careful. They're the same whether you're a pilot, a Hollywood stuntwoman, a parent, or the owner of a clogged dishwasher you're trying to fix with a screwdriver. Then he shows us gripping real examples of how and when injuries happen, so we know exactly what we should really be worrying about. Careful arms readers with the latest science on how our sometimes fallible minds work, with countless takeaways to incorporate at home, at work, and everywhere in between. This book will help us keep our fingers attached in the kitchen, our kids afloat at the pool, and our teens safe behind the wheel, and demonstrates the many other ways we can maximize our chances of getting through the day in one piece.

The world can seem so perilous, especially where our children are concerned. But even very young children can learn basic skills for staying safe in ordinary situations and preparing for emergencies. Without scaring kids (or alarming adults), this book teaches little ones how to avoid potentially dangerous situations, ask for help, follow directions, use things carefully, and plan ahead. Includes questions, activities, and safety games that reinforce the ideas being taught.

The bestselling author of The O'Reilly Factor, The No Spin Zone, and Who's Looking Out for You? talks straight to kids this time. He is as demanding, direct, and wry as ever—but he's also more revealing too, sharing candid snapshots of his own childhood throughout. Bill O'Reilly, a former schoolteacher, now an award-winning broadcast news journalist, husband, and father of two, joins forces with an experienced educator to bring you, America's youth, a code of ethics by which to live. In this latest book, Bill takes to task bullies, cheaters, advertisers who target you irresponsibly, and parents who fight for their children to win undeserved honors instead of earning them on their own merit. He lays bare the unvarnished truths about sex, money, smoking, drugs, alcohol, and friends. What he has to say about these issues may very well surprise you. He offers coping devices for those enduring a divorce, struggling with teacher, parent, or sibling relationships, and planning their futures. He also shares wisdom on such subjects as death, politics, and God. Whether you take the tests he's provided, take the advice he doles out, or just take a cue from the personal stories he shares, you're bound to make smarter choices in your life, and that's all Bill asks for.

A New York Times bestseller If you work hard enough, if you want it enough, if you're smart and talented and "good enough," you can do anything. Except get pregnant. Her whole life, Lucy Knisley wanted to be a mother. But when it was finally the perfect time, conceiving turned out to be harder than anything she'd ever attempted. Fertility problems were followed by miscarriages, and her eventual successful pregnancy plagued by health issues, up to a dramatic, near-death experience during labor and delivery. This moving, hilarious, and surprisingly informative memoir, Kid Gloves, not only follows Lucy's personal transition into motherhood but also illustrates the history and science of reproductive health from all angles, including curious facts and inspiring (and notorious) figures in medicine and midwifery. Whether you've got kids, want them, or want nothing to do with them, there's something in this graphic memoir to open your mind and heart.

How and Why to Read and Create Children's Digital Books outlines effective ways of using digital books in early years and primary classrooms, and specifies the educational potential of using digital books and apps in physical spaces and virtual communities. With a particular focus on apps and personalised reading, Natalia Kucirkova combines theory and practice to argue that personalised reading is only truly personalised when it is created or co-created by reading communities. Divided into two parts, Part I suggests criteria to evaluate the educational quality of digital books and practical strategies for their use in the classroom. Specific attention is paid to the ways in which digital books can support individual children's strengths and difficulties, digital literacies, language and communication skills. Part II explores digital books created by children, their caregivers, teachers and librarians, and Kucirkova also offers insights into how smart toys, tangibles and augmented/virtual reality tools can enrich children's reading for pleasure. How and Why to Read and Create Children's Digital Books is of interest to an international readership ranging from trainee or established teachers to MA level students and researchers, as well as designers, librarians and publishers. All are inspired to approach children's reading on and with screens with an agentic perspective of creating and sharing. Praise for How and Why to Read and Create Children's Digital Books 'This is an exciting and innovative book – not least because it is freely available to read online but because its origins are in primary practice. The author is an accomplished storyteller, and whether you know, as yet, little about the value of digital literacy in the storymaking process, or you are an accomplished digital player, this book is full of evidence-informed ideas, explanations and inspiration.' Liz Chamberlain, Open University 'At a time when children's reading is increasingly on-screen, many teachers, parents and carers are seeking practical, straightforward guidance on how to support children's engagement with digital books. This volume, written by the leading expert on personalised e-books, is packed with app reviews, suggestions and insights from recent international research, all underpinned by careful analysis of digital book features and recognition of reading as a social and cultural practice. Providing accessible guidance on finding, choosing, sharing and creating digital books, it will be welcomed by those excited by the possibilities of enthusing children about reading in the digital age.' Cathy Burnett, Professor of Literacy and Education, Sheffield Hallam University

"You Can't Be Too Careful" is a novel written by H. G. Wells and first published in 1941. Herbert George Wells (1866 – 1946) was a prolific English writer who wrote in a variety of genres, including the novel, politics, history, and social commentary. Today, he is perhaps best remembered for his contributions to the science fiction genre thanks to such novels as "The Time Machine" (1895), "The Invisible Man" (1897), and "The War of the Worlds" (1898). "The Father of Science Fiction" was also a staunch socialist, and his later works are increasingly political and didactic. Although never a winner, Wells was nominated for the Nobel Prize in Literature a total of four times within his lifetime. Many vintage books such as this are becoming increasingly scarce and expensive. We are republishing this book now in an affordable, modern, high-quality edition complete with a specially commissioned new biography of the author.

Every day in Fawn Creek, Louisiana, is exactly the same—until Orchid Mason arrives. From Erin Entrada Kelly, the winner of the Newbery Medal for Hello, Universe and a Newbery Honor for We Dream of Space, this contemporary school story set in small-town Louisiana is about friendship, family, deception, and being true to yourself and your dreams. There are twelve kids in the seventh grade at Fawn Creek Middle School. They 've been together all their lives. And in this small factory town where everyone knows everything about everyone, that 's not necessarily a great thing. There are thirteen desks in the seventh-grade classroom. That 's because Renni Dean 's father got a promotion, and the family moved to Grand Saintlodge, the nearest big town. Renni 's desk is empty, but Renni still knows their secrets; is still pulling their strings. When Orchid Mason arrives and slips gracefully into Renni 's chair, the other seventh graders don 't know what to think. Orchid—who was born in New York City but just moved to Fawn Creek from Paris—seems to float. Her dress skims the floor. She 's wearing a flower behind her ear. Fawn Creek Middle might be small, but it has its tightly knit groups—the self-proclaimed "God Squad," the jocks, the outsiders—just like anyplace else. Who will claim Orchid Mason? Who will save Orchid Mason? Or will Orchid Mason save them? Newbery Medal and Newbery Honor winner Erin Entrada Kelly explores complex themes centered on family, friendships, and staying true to yourself. Those Kids from Fawn Creek will enchant fans of Thanh Hà Lai 's Inside Out & Back Again and Rebecca Stead 's The List of Things That Will Not Change.

The bestselling creators of the hilarious Penguin Problems, Jory John and Lane Smith, turn a giraffe's problematic long neck into an enviable advantage in this fun board book. Edward the giraffe can't understand why his neck is as long and bendy and, well, ridiculous as it is. No other animal has a neck this absurd. He's tried disguising it, dressing it up, strategically hiding behind bushes—honestly, anything you can think of. Just when he has exhausted his neck-hiding options and is about to give up, Cyrus the turtle ambles in (very slowly) and helps Edward understand that his neck has a purpose and, besides, looks excellent in a bow tie. Along with a heavy dose of humor comes a gentle reminder about the importance of acceptance.
