The children who find the tickets will be taken on a tour of Wonka’s chocolate factory, led by none other than Willy Wonka himself. Charlie miraculously finds a ticket, along with four other children. This Novel Study provides a teacher and student section with a variety of activities, chapter questions, crossword, word search, and answer key to create a well-rounded lesson plan.

It’s been over 55 years since Roald Dahl’s classic “Charlie and the Chocolate Factory” hit bookshelves across the world and yet continues to be one of the most sought-after children’s novels. The book was adapted into a movie in 1971 with Gene Wilder in the titular role. The story follows the adventures of five lucky children who win Golden Tickets to visit the magical Chocolate Factory set up by Willy Wonka. The factory is full of surprises and one that leaves onlookers amused! Willy decides to open the doors of his factory to 5 young children for a once in a lifetime experience. Charlie Bucket, one of the main protagonists of the movie, lives with his parents and grandparents in a humble household. They belong to a financially backward community and have cabbage soup on most days. The Golden Ticket that Charlie wins is hidden inside one of Wonka’s famous chocolate bars, leaving his grandfather ecstatic! But before he wins his ticket, Augustus Gloop wins the first coveted Golden Ticket. He is an overweight kid who is often at the receiving end of jokes since he loves stuffing his mouth with food. The first girl who wins the ticket is Veruca Salt, an obnoxious kid who throws tantrums to get what she wants. Violet Beauregarde is the other one and an over-enthusiastic girl who ends up turning into a giant blueberry at the factory. Mike Teave is the fifth child to win the ticket and is eliminated from the factory after he jumps into the television. From chocolate fountains to wallpapers that taste like fruits, Wonka puts out brilliant chocolate/candy themed inventions. My personal favorite must be the three-course gum and giant Gummy Bears! In case you are wondering what I’m talking about, read on to find out more!

Candy is more than a sugary snack. With candy, you can become a scientific detective. You can test candy for secret ingredients, peel the skin off candy corn, or float an “m” from M&M’s. You can spread candy dyes into rainbows, or pour rainbow layers of colored water. You’ll learn how to turn candy into crystals, sink marshmallows, float taffy, or send soda spouting skyward. You can even make your own lightning. Candy Experiments teaches kids a new use for their candy. As children try eye-popping experiments, such as growing enormous gummy worms and turning cotton candy into slime, they’ll also be learning science. Best of all, they’ll willingly pour their candy down the drain. Candy Experiments contains 70 science experiments, 29 of which have never been previously published. Chapter themes include secret ingredients, blow it up, sink and float, squash it, and other fun experiments about color, density, and heat. The book is written for children between the ages of 7 and 10, though older and younger ages will enjoy it as well. Each experiment includes basic explanations of the relevant science, such as how cotton candy sucks up water because of capillary action, how Pixy Stix cool water because of an endothermic reaction, and how gummy worms grow enormous because of the water-entangling properties.

Willy Wonka’s famous chocolate factory is opening at last! But only five lucky children will be allowed inside. A dramatic adaptation of the story about Willy Wonka, his wondrous chocolate factory, and Charlie Bucket’s good fortune offers a script complete with stage directions and suggestions for lighting, scenery, and props.
