things conceived with imagination, style, and often a good deal of humor. Anyone can do this—it has been the special province of Oriental children for centuries—by closely following the step-by-step directions. The result is the gradual yet magical materialization of a solid object which delights a child. It is not surprising that Origami is taught in many South American schools. Patience, control, and perseverance in following all directions closely—which are the requisites of Origami—are part of the mental discipline necessary for a child's growth into maturity. But adults enjoy Origami just as much."
