Perfect Phrases for Landlords and Property Managers arms readers with quick and easy phrases to deal with the countless challenges, decisions, and day-to-day responsibilities of being a landlord or property manager. It offers practical, need-to-know advice on everything from dealing with tenants and co-op boards to developing and executing a management plan. Each chapter includes several key principles and advice on the topic and provide hundreds of ready-to-use phrases for readers to go to no matter what the situation. Principles of Real Estate Practice by Mettling and Cusic is a modern learning tool for the student preparing to enter the real estate business as a licensed professional. The textbook contains the essentials of real estate law, principles, and practices taught in real estate schools and colleges across the country, including all those fundamentals that real estate educators, practicing professionals, national testing services, and state licensing officials agree are necessary for basic competence. Principles of Real Estate Practice covers the national requirements for the initial 30-90+ hours of classroom study, or its equivalent, mandated by state license laws across the country. Principles of Real Estate Practice is tailored to the needs of the pre-license student. The textbook is designed to make it easy for students to learn the material -prepare students for numerous career applications -stress practical, rather than theoretical, skills and knowledge. It is more streamlined, direct and to-the-point than other books. It includes more learning reinforcements. It has a student-oriented organization, both within each chapter and from chapter to chapter. Its examples and exercises are grounded in the authors' fifty combined years in real estate education. *Constructing test items for standardized tests of achievement, ability, and aptitude is a task of enormous importance. The interpretability of a test's scores flows directly from the quality of its items and exercises. Concomitant with score interpretability is the notion that including only carefully crafted items on a test is the primary method by which the skilled test developer reduces unwanted error variance, or errors of measurement, and thereby increases a test score's reliability. The aim of this entire book is to increase the test constructor's awareness of this source of measurement error, and then to describe methods for identifying and minimizing it during item construction and later review. Persons involved in assessment are keenly aware of the increased attention given to alternative formats for test items in recent years. Yet, in many writers' zeal to be 'curriculum-relevant' or 'authentic' or 'realistic', the items are often developed seemingly without conscious thought to the interpretations that may be garnered from them. This book argues that the format for such alternative items and exercises also requires rigor in their construction and even offers some solutions, as one chapter is devoted to these alternative formats. This book addresses major issues in constructing test items by focusing on four ideas. First, it describes the characteristics and functions of test items. A second feature of this book is the presentation of editorial guidelines for writing test items in all of the commonly used item formats, including constructed-response formats and performance tests. A third aspect of this book is the presentation of methods for determining the quality of test items. Finally, this book presents a compendium of important issues about test items, including procedures for ordering items in a test, ethical and legal concerns over using copyrighted test items, item scoring schemes, computer-generated items and more.*

*The Autobiography of James T. Kirk chronicles the greatest Starfleet captain's life (2233-2371), in his own words. From his birth on the U.S.S. Kelvin, his youth spent on Tarsus IV, his time in the Starfleet Academy, his meteoric raise through the ranks of Starfleet, and his illustrious career at the helm of the Enterprise, this in-world memoir uncovers Captain Kirk in a way Star Trek fans have never seen. Kirk's singular voice rings throughout the text, giving insight into his convictions, his bravery, and his commitment to the life—in all forms—throughout this Galaxy and beyond. Excerpts from his personal correspondence, captain's logs, and more give Kirk's personal narrative further depth.*

The Hard Bound Book Mind Control Language Patterns are spoken phrases that can act as "triggers" to the people who hear them. In short, they influence and control how we respond and cause us to be influenced to do things without our knowing. These language patterns are not fantasies but are based on documented uses that come from, psychology, hypnosis, Neuro Linguistic Programming and studies of human behavior. Mind Control Language Patterns can be used to help and hurt. One can use Mind Control Language Patterns to create positive and lasting change in people, as well as feelings of trust, love and affections. They can also be used to induce amnesia, fear, insecurity and doubt. These types of patterns are what we call "dark" pattern.

Real Estate Math Express is a concise, easy-to-study test preparation guide to help real estate students improve their real estate math scores to pass the state licensing test. The primary feature of Real Estate Math Express is that it contains all necessary formulas and practice questions in 70+ pages. This enables you to truly cram for the math portion of your state's licensure test, memorize key formulas, and walk into the exam site having all the essential material in your short-term memory! So, if you want a truly rapid review resource, Real Estate Math Express is for you. No frills, no lengthy explanations.....just key formulas, definitions, corresponding examples and practice questions. Real Estate Math Express can be broken down into 3 major parts: Math Formulary Math Questions Answer Key The math formulary is the section that introduces each major real estate math topic and its corresponding formula(s). Real Estate Math Express covers numerous topics ranging from basic math to capitalization rates to prorations and finally to closing cost calculations. Once the math formulas have been mastered, there are over 110 sample questions for you to practice with. Each question has both an answer and an explanation of the correct answer at the end of the book. For additional real estate licensing materials, please check out our Principles of Real Estate Practice and Real Estate License Exam Prep (RELEP) Series.

Features of California Real Estate License Express (CA-RELE): General Principles & Law Key Point Review (60 pages) California-Specific Principles and Laws (56 pages) Real Estate Math Key Formula Review & Practice (17 pages) General Real Estate Practice Tests (500 questions) California State-Level Practice Tests (90 questions) California Practice Exam (150 questions) We know the real estate licensing exam can be tough, and very nerve-wracking to prepare for. That's why we created the California Real Estate License Express (CA-RELE) the way we did. Since we have been managing real estate schools and developing curriculum for forty years, we know how all this works – or fails to work. CA-RELE is comprehensive in that it contains both key content review and testing practice. And the text review is California-specific – not just simplistic generic content, but terse, relevant and accurate state laws and regulations presented in a well-organized set of 'key point reviews' which are ideal for pre-test memorization. Finally, our real estate principles and practices content, as well as our question selection, is further tailored to the state testing outline promulgated by the California Department of Real Estate (DRE). Therefore, the selected legal points and test questions reflect the topic emphasis of your California license exam. A word about the test questions... CA-RELE's testing practice section consists of ten general practice tests, three California state law tests, and one state exam simulation test. The questions are direct, to the point, and designed to test your understanding. When you have completed a given test, you can check your answers against the answer key in the appendix. To enhance your learning and preparations, each question's answer is accompanied by a brief explanation, or "rationale" underlying the correct answer. In the end, as you know, it's all up to you. Unlike other publications, we are not going to tell you that using this book will guarantee that you pass your state exam. It still takes hard work and study to pass. But we have done our best here to get you ready. Following that, the most we can do is wish you the best of success in taking and passing your California real estate exam. So good luck!!

This comprehensive resource provides readers with the tools necessary to perform analysis of various waveforms for use in radar systems. It provides information about how to produce synthetic aperture (SAR) images by giving a tomographic formulation and implementation for SAR imaging. Tracking filter fundamentals, and each parameter associated with the filter and how each affects tracking performance are also presented. Various radar cross section measurement techniques are covered, along with waveform selection analysis through the study of the ambiguity function for each particular waveform from simple linear frequency modulation (LFM) waveforms to more complicated coded waveforms. The text includes the Python tool suite, which allows the reader to analyze and predict radar performance for various scenarios and applications. Also provided are MATLAB® scripts corresponding to the Python tools. The software includes a user-friendly graphical user interface (GUI) that provides visualizations of the concepts being covered. Users have full access to both the Python and MATLAB source code to modify for their application. With examples using the tool suite are given at the end of each chapter, this text gives readers a clear understanding of how important target scattering is in areas of target detection, target tracking, pulse integration, and target discrimination.

Every book is written with a certain reader in mind, and this book is no different: You may have some investments, but you're looking to develop a full-scale investment plan....You'd like to strengthen your portfolio....You want to evaluate your investment advisor's advice....You have a company-sponsored investment plan, like a 401(k), and you're looking to make some decisions or roll it over into a new plan....If one or more of these descriptions sound familiar, you've come to the right place.
