The guide describes the ground and operations covered by the British, French and US Expeditionary Forces deployed from France to the area North of Venice between November 1917 and Spring 1919. These Forces supported the Italians after their disastrous defeat at Caporetto and

helped stem the Austrian and German onslaught. This is the first guide to the Allied contribution and the Piave Defence line. It also covers the rear areas - supply and repair services, training and recreation, and describes the movement to Italy and subsequent service and care of the 16,000 British and 20,000 French horses and mules. The US contribution has never been adequately described before.

*Yellowstone National Park spans the states of Montana, Wyoming and Idaho in the USA. It is famous worldwide. Since their creation in 1872, most 'protected natural areas' have been considered as probably the greatest achievement of nature conservation. Many countries have such spaces within their territories and many visitors, native or foreign, use some of their free time to get to know them. In this sense these spaces undertake to conserve nature and educate society and give us a kind of cultural tourism that has grown considerably in recent decades. Cultural tourism today specifically includes, along with cities, museums, monuments and rural traditions, the aim of 'getting to know nature'. Protected natural areas are ideal for this. The tourism industry has realised this and so the value of the landscape and natural resources is becoming increasingly recognised. This is a welcome development and represents a challenge for tourism management, for environmental education and for dissemination of nature and conservation. This volume of the series *Tourism Today* considers the evolving relationship between tourism and protected natural areas.*

Contributors from the tourist industry, economics, and environmental sciences consider issues raised by an increased desire of tourists to see nature and experience exotic cultures rather than visit famous ruins and cities, and the growing acknowledgment that tourism degrades those very attractions. Only the authors are indexed.

The Veneto region offers travelers all manner of adventures from the cultural, intellectual sort right down to the seat-of-your-pants thrilling variety. Whether planning your itinerary entirely around a particular activity like a week-long cycling holiday or a language immersion course, or if you're trying to offset your museum and church-heavy itinerary with some off-the-beaten track activities, there are a tremendous number of opportunities to help you broaden your experiences, live the culture and acquaint yourself with the locals. This book focuses on exploring the Veneto's wine zones while highlighting cultural adventures, sports adventures, adventures for the soul, family adventures, driving adventures and many other types of activities to help you discover more about the land, and about yourself. Writers, painters, historians and philosophers have long been inspired by the dramatic landscapes of the Veneto Region and, by translating astute observations on canvas or in print, have captured the beauty of a land and a people that have evolved over many centuries. Situated in Italy's northernmost zone, few other regions boast such diverse landscapes. From the low sandy coastline where the Veneto meets the Adriatic Sea, to the mighty Alpine peaks, rolling hills, thermal springs and lagoon systems, the varied landscape makes for lively getaways any season of the year. Veneto, a name that derives from Veneti, a pre-Roman people who once inhabited the area, is divided into seven provinces: Belluno, Padua, Rovigo, Treviso, Venice, Verona and Vicenza. During Venice's golden age, aristocrats brought their wealth to the Veneto countryside and commissioned architects to build agricultural estates and country homes. Today, more than 4,000 villas remind us of that period, the most famous of which were designed by 16th-century architect Andrea Palladio. The Veneto's depth, however, extends far beyond its artistic treasures. Vineyard-clad hills throughout the Veneto produce internationally acclaimed wines including Valpolicella, Soave, Bardolino and Custoza. From grappa, Bassano del Grappa's distilled liquor, and Valdobbiadene's sparkling Prosecco wine, to Asiago's cheese from mountain dairies, and seafood from the lagoon, the Veneto is a food- and wine-lovers' delight. This guide tells you about the wine-growing regions especially: the Euganean Hills, Prosecco, Soave, Cistoza, Bardolino, Valpolicella, Bassano del Grappa - how to visit the vineyards, taste the wines, trying the best restaurants, and the best places to stay in each region. All of the details you need to know are here so your trip will be unforgettable.

The Rough Guide to Venice & the Veneto is the essential travel guide with clear maps and coverage of the regions unforgettable attractions. From the spiraling Scala de Bevalo to Europe's biggest collection of contemporary art in the Dogana di Mare, The Rough Guide to Venice & the Veneto unearths the best sites, hotels, restaurants, cafés and nightlife across every price range. You'll find the lowdown on the now-trendy Rialto area and the latest news on the flood barrier and Venice's other conservation projects as well as the little-known nooks and crannies you should be exploring. The Rough Guide to Venice & the Veneto includes sections on the city's beautiful water-lapped palaces and lively festivals with specialist coverage of Venetian painting, sculpture and architecture and detailed information on the best markets and shopping-spots. Explore all corners of the region with authoritative background on everything

from San Marco to the palazzi of the Canal Grande, relying on the clearest maps of any guide. Make the Most of Your Time with The Rough Guide to Venice & the Veneto. The world's favorite expert on la dolce vita (Under the Tuscan Sun author) guides readers through Italy's iconic regions, replete with lavish National Geographic images. This lush guide, featuring more than 350 glorious photographs from National Geographic, showcases the best Italy has to offer from the perspective of two women who have spent their lives reveling in its unique joys. In these illuminating pages, Frances Mayes, the author of Under the Tuscan Sun and many other bestsellers, and New York Times travel writer Ondine Cohane reveal an Italy that only the locals know, filled with top destinations and unforgettable travel experiences in every region. From the colorful coastline of Cinque Terre and the quiet ports of the Aeolian Islands to the Renaissance architecture of Florence and the best pizza in Rome, every section features insider secrets and off-the-beaten-path recommendations (for example, a little restaurant in Piedmont known for its tajarin, a pasta that is the perfect bed for the region's celebrated truffles). Here are the best places to stay, eat, and tour, paired with the rich history of each city, hillside town, and unique terrain. Along the way, you'll make stops at the country's hidden gems--art galleries, local restaurants, little-known hiking trails, spas, and premier spots for R&R. Inspiring and utterly unique, this vivid treasury is a must-have for anyone who wants to experience the best of Italy.

Italy's northernmost zone, the Veneto includes Padua, Verona, Vicenza, plus Venice itself, which once ruled the area. Renaissance villas still stand, many by Palladio. A food-and wine-lover's paradise, it's also the most artistically rich and the most romantic, with the art of Giotto and Mantegna in Padua, the Roman ruins in Verona, the canals and itself, Bellini, Tintoretto, Veronese and Titian worked here. Experience their art and be part of their world, with the insider. Every detail is here about the foods, the sights, the best places to stay and eat.

- First woman—and only the fourth climber ever—to summit all fourteen 8,000-meter peaks without supplemental altitude porters
- Though the two climbers are friends, Kaltenbrunner's path to high places has been very different from Pasaban's record-breaking feat
- Positive, uplifting account of a remarkable athlete Effusive, charismatic, tough, Gerlinde Kaltenbrunner is one of the world's most successful high-altitude mountaineers and the first woman to climb all fourteen 8,000-meter peaks without supplemental oxygen—and she also eschews high-altitude porters. Mountains in My early years learning to climb in Austria, her personal life, her training as an oncology nurse, and her ever-present passion for mountains, especially the Himalaya. Her love of being in the mountains shines through in her writing: For Gerlinde the thing was not the race to be the first woman to climb the 8,000-meter peaks, but rather to experience the mountains in her self-sufficient style. Self-sufficiency did not, however, mean climbing without her husband, Ralf Dujmovits; in 2011 he became her twelfth and his fourteenth 8,000-meter peak! Kaltenbrunner shares the challenges, dangers, and euphoria of high-altitude climbs, detailing medical emergencies and her own feelings about being high in the mountains. Her writing is captivating, and unrestrained.

"Eclissato dal potenziale ammaliatore di Venezia e poco propenso per carattere alle luci dalla ribalta, il Veneto vi stupisce con i paesaggi dalla bellezza a volte clamorosa, un patrimonio artistico di prim'ordine e la vivacità delle sue piazze" (Andrea Bocca, Autore Lonely Planet). Availability of and adequate accessibility to freshwater and energy are two key technological and scientific problems of global significance. At the end of the 20th century, the deficit of water for human consumption and economic application forced us to focus on rational use of resources. Increasing the use of renewable energy sources and improving energy efficiency is a challenge for the 21st century. Geothermal energy is heat energy generated and stored in the Earth, accumulated in hydrothermal systems or in dry rocks within the Earth's crust, in amounts which constitute the energy resources. The sustainable management of geothermal energy resources should be geared towards optimization of energy recovery, but also towards rational management of water resources since geothermal water serves both as energy carrier and also as valuable raw material. Geothermal waters, depending on their hydrogeothermal characteristics, the lithology of the rocks involved, the depth at which the resources occur and the sources of water supply, may be characterized by very diverse physicochemical parameters. This factor largely determines the technology to be used in their exploitation and the way the geothermal water can be used. This book is focused on the effective use of geothermal water and renewable energy for future needs in order to promote modern, sustainable and effective management of water resources. The research field includes crucial new areas of study: • an improvement in the management of freshwater resources through the use of residual geothermal water; • a review of the technologies available in the field of geothermal water treatment for its (re)use for energetic purposes and freshwater production, and • the development of balneotherapy. The book is aimed at professionals, academics and decision makers worldwide, water sector representatives and administrators, business enterprises specializing in renewable energy management and water treatment, working in the areas of geothermal energy usage, water resources, water supply and energy planning. This book has the potential to become a standard text used by educational institutions and research & development establishments involved in the geothermal water management.

Written by Terry Stevens. The Stories Behind 50 of the World's Great Destinations. This book will give tourists and travelers a description of each of the 50 destinations with a personal explanation giving an insight as to why, and how, these destinations consistently deliver high quality visitor experiences. It aims to show the visitor how good management and an understanding of the importance of hospitality underpins the success of each destination. Tourists are now very interested in knowing more about how the places they visit are organized and how they get things right. For the tourism professional and future destination managers and marketers, the Professional Edition will have the same core content as the Consumer Edition, exploring the destinations plus a detailed analysis of international best practice in destination management written with deep insight and research supported by extensive bibliography. It will be a major reference book on successful destination management based on my 40 years working in the industry in over 55 countries. - This is not a typical language-driven, promotional bucket-list guidebook. Stevens gives these destinations real world context. He tells us its personality, its mood and not just the reason for being but its reason for resilience, perseverance and ultimate success.'
