If you can't stand the heat, get into the kitchen! This cookbook helps children learn about making food by themselves--a skill that will last them a lifetime. The recipes in this "no-cook" cookbook will help children to gain independence in the kitchen and understand how to make healthy, yet very tasty meals with simple ingredients and no heat. The No-Cook Cookbook is a photographic cookbook with recipes that kids can make all by themselves. No cooking means that kids can use this recipe ebook to learn the basic skills needed to be successful in the kitchen by themselves. This ebook teaches children how to use tools such as a grater, peeler, and zester safely, and will explain kitchen safety rules. Kids will also find out how to grow their own herbs and vegetables at home, and then use these to prepare delicious meals. Helping young food lovers turn into budding chefs!

'No Cook' Children's Recipe Book is full of simple recipes for children to make on their own or with just a little help from an adult. All learning should be fun and learning about food is no exception. So, although there are some healthy options to choose from in this book and a few recipes that need the help of an adult (for dealing with hot stuff), I have included a lot of fun recipes a child can make absolutely independent of adults. You can encourage your children to make finger food for family get-togethers or prepare nibbles for a sleep-over or play date with minimum help from adults. You can encourage your children to make a selection of the candies from this book and put them into a cellophane bag tied with pretty ribbon for handmade gifts for family and friends. Children just love to give gifts and are so proud if they've made them themselves. You provide the ingredients, the tools and suggestions - then stand back and watch the fun!

It's hard to get excited about making food that is one of the five recipes you've been making over and over for the past ten years, so it's time to expand your recipe library. That's probably been hard to do though, especially if you're looking for easy recipes that are simple to prepare, cook, and taste delicious. Have no fear, this book is here. Moms On The Go cookbook series is aimed at busy moms with minimal time, cooking experience and/or patience to prepare elaborate meals for their families all the time.

The No-Cook Cookbook

It has become common knowledge that childhood obesity rates are increasing every year. But the rates continue to rise. And between busy work schedules and the inconvenient truth that kids simply refuse to eat vegetables and other healthy foods, how can average parents ensure their kids are getting the proper nutrition and avoiding bad eating habits? As a mother of three, Jessica Seinfeld can speak for all parents who struggle to feed their kids right and deal nightly with dinnertime fiascos. As she wages a personal war against sugars, packaged foods, and other nutritional saboteurs, she offers appetizing alternatives for parents who find themselves succumbing to the fastest and easiest (and least healthy) choices available to them. Her modus operandi? Her book is filled with traditional recipes that kids love, except they're stealthily packed with veggies hidden in them so kids don't even know! With the help of a nutritionist and a professional chef, Seinfeld has developed a month's worth of meals for kids of all ages that includes, for example, pureed cauliflower in mac and cheese, and kale in spaghetti and meatballs. She also provides revealing and humorous personal anecdotes, tear-out shopping guides to help parents zoom through the supermarket, and tips on how to deal with the kid that "must have" the latest sugar bomb cereal. But this book also contains much more than recipes and tips. By solving problems on a practical level for parents, Seinfeld addresses the big picture issues that surround childhood obesity and its long-term (and ruinous) effects on the body. With the help of a prominent nutritionist, her book provides parents with an arsenal of information related to kids' nutrition so parents understand why it's important to throw in a little avocado puree into their quesadillas. She discusses the critical importance of portion size, and the specific elements kids simply must have (as opposed to adults) in order to flourish now and in the future: protein, calcium, vitamins, and Omega 3 and 6 fats. Jessica Seinfeld's book is practical, easy-to-read, and a godsend for any parent that wants their kids to be healthy for a long time to come.

Use These Guidelines Of Super Healthy Food Consumption And Start Treating Your Body How It Deserves Today! Nature gifted us her most valuable resources and we should value them as they are, without trying to transform them. For many years, humans lived on the natural nutrients that nature provides us with, but unfortunately, only in the last century food experiments were conducted and implemented to produce crazy amounts of food. Today, it's increasingly harder to find an ingredient that has naturally grown under the sun. Instead, the food industry giants are continually looking for cheaper ways of producing more and more food for larger profits thus introducing many artificial ingredients into our food. What does this mean for us? The sad thing is that, as our schedules become tighter and tighter, most of us are opting for empty-calorie, ready-to-eat foods from these food giants that only require to be popped in the microwave for 3 minutes and voila! Dinner is ready! Should the ever-increasing cases of lifestyle diseases such as cancer, diabetes, heart diseases, and the like then come as a surprise to us? I will tell you with certainty, NO! If we all stop just for a few seconds and pay attention to what our bodies are saying and respect that, only then will we understand that our bodies need real food to function and heal. This is where the whole food diet comes in; healthy living is a lifestyle and starting with the whole food diet is the first step to success. When undertaking the whole food diet, you should emphasize on dark green leafy veggies, plant obtained foods and other natural foods that have undergone zero or minimal processing. We are going to look at the whole food diet approved foods, complete with over 100 healthy whole food recipes in this guide. With the popularity of this diet, what's your excuse for not giving it a shot? Is it the cost, being too busy to make any diet work or the fact that you have a raging sweet tooth? We've all been here so I totally get it. But, with a lot of determination and some planning and keeping things simple, the whole food diet is totally possible. We are going to look at some delicious recipes made using every day healthy ingredients so don't worry about cost or using too much time cooking.
