

*illnesses; and for personal injury or medical malpractice lawyers who are representing ill clients who are struggling with "The Most Common, The Most Deadly" fungal infections. This book is introduced as a landmark to inspire people including cancer patients and healthcare providers about the anciently misdiagnosed illness "Cancer," which is caused by parasitic fungi, is misdiagnosed as flu or a cold in the beginning, and is erroneously treated with wrong medications in the middle of the progress only to discover that the cancer is treated by antifungal medications in the end. This book is intended to educate readers about parasitic fungi that mutate fungal genes to survive in the hosts yielding cancerous cells and that the parasitic fungi are the cause of autoimmune diseases. The main goal of this book is to help children and families who are left behind without treatments under the guise of a false psychological theory "Munchausen Syndrome By Proxy (faking illness)." This book is intended to enlighten readers about risks of parasitic fungi that destruct health, homes, offices, schools, hospitals, and further family relationships, and that construct expensive lawsuits, social distrusts, unnecessary public and medical expenses and secondary victims. This book is aimed at past, present, and future patients who are programmed to fail to get a medical help for early cancer test and treatment under the present insurance policies, immunity laws, and medical malpractice laws that govern millions of health insurance policyholders, healthcare providers, and government-funded medical facilities. The author discusses why GMO (Genetically Modified Organism) Vitamins cause antifungal and antibiotic resistances and why GMO Vitamins may initiate or exacerbate autoimmune diseases. This book discusses "causes and effects" and "possible treatments" of autoimmune diseases that are caused by an untreated fungal infection. This book explains why the early signs of autoimmune diseases are neglected either by patients or by healthcare providers, how autoimmune diseases are initiated by a fungal mutation, why the autoimmune diseases respond to antifungal agents, and how curable diseases turn to incurable diseases. This book explains why fungal disruptions in human metabolisms result in "the various names of illnesses" in the beginning and "autoimmune diseases" in the end. This book suggests that a high level of LDL Cholesterol (known as bad Cholesterol) of patients may be a consequence of chronic and acute fungal infections and the LDL Cholesterol may be a fungal sterol that was horizontally transferred from the parasitic fungi that mutate their genes in the hosts to survive from the hosts' antibodies. This book explains how harmful acids are produced when parasitic fungi are hosted by humans and animals, how alcohol (fungal urine) and tobaccos may chemically make more Ergosterol or Lanosterol in the hosts and how patients can repair their damaged cells. This book explains how cancer tumors and cysts can be treated and how female patients can resume their menopause and become pregnant. This book is not a substitute of a medical diagnosis or a prescription to treat their illness.*

*Formed out of the Royal Irish Constabulary at the time of Partition, the RUC's history is predictably a turbulent one right through to its replacement in 2001 by the Police Service of Northern Ireland.*

*Few police forces in the world have suffered so grievously as the RUC and this book is a fitting memorial to the sacrifices made in the interests of the civil population it was determined to protect.*

*Throughout its history, it has not only had to perform normal police duties but contain the ever present IRA threat. In 1969, the climate changed and ushered in a new and even more violent era of sectarian strife. The emergence of extreme nationalist organizations posed grave problems and, with the RUC in a prime role, the position of the Chief Constable was hugely important. This book tells the story of a remarkable police force without fear or favor. Ironically its reward for containing a hugely challenging internal security situation and at the same time policing the community traditionally was its disbandment.*

'You go to work and you might be shot dead. You imagine being horribly maimed in a bomb blast. You come home and wonder if you'll be shot at the door. You go to bed with a revolver on the bedside cabinet. At times you wonder if this is really part of the UK' This was the world inhabited by Richard Latham during his service with the Royal Ulster Constabulary - a force that remains an institution of contradictions and intrigue to many outside observers. Considered by some to be one of the finest police forces in the world, its officers are looked upon by others as the evil storm-troopers of Unionism and the British Government. The RUC is now a force undergoing sweeping change in response to Republican demands, yet for 30 years it stood alongside the British Army in a war with Republicans that killed over 300 policemen and injured thousands more. For 14 years Latham, an Englishman, served as a police officer, both in England and in Ulster, transferring from the English Special Branch to the RUC in 1991. Deadly Beat is his raw and hard-hitting story, giving a unique insight into the grim reality of policing Ulster. Latham charts the dedication and restraint of officers who witnessed their colleagues die, yet were obliged to play within the rules of the law - rules so loaded in favour of the killers that comparatively few were brought to justice. This book exposes incidents of racism and religious bias experienced by the author himself. It looks behind the scenes to reveal the extremes of behaviour, alcohol abuse, womanising and petty corruption that the heady cocktail of stress, big pay packets and a sense of 'living for the day' bring to many of the men who don the RUC uniform. Deadly Beat is an open, warts-and-all view of the RUC by a man who makes intuitive comparisons between policing on the mainland and serving in Ulster.

The epic adventures Evelyn creates over the course of a lifetime will leave every reader mesmerized. This wildly addictive journey of a reclusive Hollywood starlet and her tumultuous Tinseltown journey comes with unexpected twists and the most satisfying of drama.

Possibly the darkest and most shocking six scary short stories yet ever created from bestselling author Stephen R. King. An instinct of passion and disrespect for decency and humanity fill this volume of life experiences we mostly keep in the back of our conscience, never wanting to bring to the forefront. Its truly sick!

Protein Kills

With chronic illness, obesity, and Cancer at all time highs, it's not an overstatement to proclaim that something is wrong! Cancer has tripled since 1980, two-thirds of Americans are overweight, and half are taking prescription pills for chronic issues. While we can point our fingers at many causes, the one that indiscreetly goes under the radar is protein. This raises important questions. What is protein exactly? How does it truly affect the human body? How much of it do you actually need? And the most famous health question of all time; Where do you get your protein from? In Protein Kills, Chronic Illness Specialist and Health Coach, Kevin W. Reese clearly and concisely tackles the most controversial topic in health. With fun examples and analogies he goes inside the human body to to present seven reasons why a high-protein diet can be deadly.

"[Volume 1] Traces the social issues, technological advances, and combative encounters of the international naval race from 1890 through WWI, as the largest industrial nations (U.S, Great Britain, Japan, and Germany) scrambled to secure global markets and empire, using their battleship navies as pawns of power politics"--Provided by publisher.

The exposure of two senior republicans as informers for British intelligence in 2005 led to a popular perception that the IRA had 'lost' the intelligence war and was pressurised into peace. In this first in-depth study across the entire conflict, Thomas Leahy re-evaluates the successes and failures of Britain's intelligence activities against the IRA, from the use of agents and informers to special-forces, surveillance and electronic intelligence. Using new interview material alongside memoirs and Irish and UK archival materials, he suggests that the IRA was not forced into peace by British intelligence. His work sheds new light on key questions in intelligence and security studies. How does British intelligence operate against paramilitaries? Is it effective? When should governments 'talk to terrorists'? And does regional variation explain the outcome of intelligence conflicts? This is a major contribution to the history of the conflict and of why peace emerged in Northern Ireland.
