

Dirt Biking: The World's Most Remarkable Dirt Bike Rides And Techniques (Passport To World Sports)

Chronicles the history of the Japanese corporation; profiles different types of models, including information about their speed, performance, and appearance; and discusses motocross racing.

Hodaka motorcycles were some of the most creatively marketed and designed motorcycles in America. The bike of choice for the hip young racer, the street-savvy urbanite, or the 14-year-old boy's favorite poster, these machines had colorful logos, creative advertising and terrific names. The Combat Wombat, Road Toad, Dirt Squirt and the fantastic Super Rat are just a few of the models produced by Hodaka. More than 15 years in the making, this exhaustively-researched tome contains all the details about the machines as well as a treasure trove of photographs, advertisements, and graphics. Written by Ken Smith, the editor of VMX Magazine, and created with the help of Paul Stannard of Strictly Hodaka and many of the people who designed and sold Hodakas back in the day, this book is a captivating, colorful look at one of the wildest, most popular motorcycles of the 1960s and 1970s.

The Kawasaki name is one that has been associated with high-quality, top performance motorcycles. An important continental work that brings Canadian, American, and Mexican perspectives on the role of regional planning and conservation of protected areas. The first book of its kind to provide a tri-nation perspective on protected areas (and the role of regional planning), including marine parks. Some areas discussed include: Yellowstone National Park, Tijuana River National Estuarine, Yukon, Sky Islands Wildlands, Baja California. This timely collection of essays presents new protected area theory, method, and practice as an explicit part of regional planning. With a North American focus, these essays consider the history of ecology, policy, and planning of protected areas in the context of the fundamental need for a linkage with ongoing regional planning. Includes an important chapter on the Commission on Environmental Co-Operation (CEC), set up under NAFTA, that refers to a major marine program for North America.

At nineteen, Ashley Fiolek is already the top female competitor in a tough men's sport: motocross, a form of off-road motorcycle racing that is one of the most competitive and dangerous extreme sports in the world. Since going pro in late 2007, Fiolek has taken gold at the X Games, won the American Women's Motocross Championship twice, and become the first woman in American motocross history to be signed to a factory team—the highest echelon of industry backing. But Fiolek's rise has not come without obstacles. Fiolek was born profoundly deaf, a handicap that makes everyday life difficult—and competition on the track downright dangerous. Originally misdiagnosed as "mildly retarded," she was a painfully shy and introverted child—until her parents introduced her to the world of dirt bikes, which helped her escape the silence in her head and connect with others who shared her passion. She began racing at seven, and as her successes grew through hard work and no small number of broken bones, so did her confidence. Fiolek has never believed her disability should stand in the way of her dreams. Nor has she allowed her gender to limit her career—motocross historically has been a men's sport, but with the love and support of her dirt-obsessed family, including her "Grandpa Motorcycle," her little brother, Kicker, and her dogs, Turbo and Rocco, Ashley has emerged as one of the sport's most talked-about stars, changing the way the entire industry views women. Armed with her extraordinary talent, contagious grin, and deep faith in God, Fiolek continues to venture into unknown territory, relentlessly pushing herself—and women's motocross—to ever-greater heights. Kicking Up Dirt is a remarkable, inspiring tale of a young woman's courage and determination to succeed in the face of truly challenging obstacles. Did you know that the top motocross best trick riders can fly off jumps without holding on to their bikes? At the X Games best trick competition, you might see stunts like no-handers, can cans, and no-footers. Some pro

best trick riders can even pull off a double backflip!

Catastrophic Injuries in Sport and Recreation is an essential reference guide to safe participation in a wide variety of sports and recreational activities. A masterful achievement of methodology, it is the first complete epidemiological study and analysis of all catastrophic injuries in all sports and recreational activities that occurred within a large defined geographical area with a large population: ten million people within the province of Ontario between 1986 and 1995.

Concentrating on injuries that resulted in death or long term disability, the contributors identify both the personal risk factors for participants and the societal risk factors that are important causes for these kinds of injuries. Providing detailed analysis of 2154 case studies, the contributors demonstrate what went wrong in each event, and show how each injury could have been prevented.

Recommending specific prevention strategies for a wide range of injuries, Catastrophic Injuries in Sport and Recreation is a practical medical reference for athletes and doctors alike.
