

**Fairie Ality: The Fashion Collection From The House Of Ellwand**

This follow-up to 'Fairie-ality' features dainty fairy furnishings and fashion inspired directly from nature with an introduction by David Ellwand. A parody of the Victorian obsessions with fairies and pressed flowers is presented in the form of a diary.

Featuring luminous photographs, this beautiful record book allows parents and other loved ones to celebrate their own baby's marvelous individuality. Every baby is unique - but never more so than to mothers, fathers, and others who eagerly anticipate their angel's appearance. Now the stunning photographs in David Ellwand's BABY UNIQUE have inspired a truly unique baby album, inviting loved ones to save for posterity such one-of-a-kind items as their newborn's handprints and footprints, special photos and names of family and friends, baby's "firsts" and "favorites," and parents' own hopes and feelings at this precious and too-fleeting time.

Presents pages from the catalog of the top designer of couture and accessories for the fairy world, interspersed with descriptions of the events to which these feather and flower creations will be worn.

**The History of Underclothes**

From Rachel's rascally rat to Gordon's glittering goldfish, none of the other children's pets is as big as Emma's enormous elephant.

Over 1,450 costumed figures in clearly detailed engravings – from the dawn of civilization to the end of the 19th century. Features many folk costumes. Captions.

The first monograph on renowned fashion illustrator David Downton. With a Foreword by Christian Lacroix, and an Afterword by Dita Von Teese, this book showcases around 150 of David's drawings, featuring celebrities, actors, models, and fashion designers. The illustrations are enlivened by fascinating anecdotes revealing behind-the-scenes stories from the world of fashion. David recounts his inspirations, and specially commissioned photographs show him at work in his residence at Claridge's Hotel in London, where the great and good sit for his portraits.

Continental philosophy has entered a new period of ferment. The long deconstructionist era was followed with a period dominated by Deleuze, which has in turn evolved into a new situation still difficult to define. However, one common thread running through the new brand of continental positions is a renewed attention to materialist and realist options in philosophy. Among the leaders of the established generation, this new focus takes numerous forms. It might be hard to find many shared positions in the writings of Badiou, DeLanda, Laruelle, Latour, Stengers, and i ek, but what is missing from their positions is an obsession with the critique of written texts. All of them elaborate a positive ontology, despite the incompatibility of their results. Meanwhile, the new generation of continental thinkers is pushing these trends still further, as seen in currents ranging from transcendental materialism to the London-based speculative realism movement to new revivals of Derrida. As indicated by the title The Speculative Turn, the new currents of continental philosophy depart from the text-centered hermeneutic models of the past and engage in daring speculations about the nature of reality itself. This anthology assembles authors, of several generations and numerous nationalities, who will be at the centre of debate in continental philosophy for decades to come."

**Fairie-Ality**The Fashion Collection from the House of EllwandCandlewick Press (MA)

Using a gorgeous array of natural elements, including feathers, flowers, stones, shells, and more, the creator of the internationally renowned Fairie-ality: The Fashion Collection from the House of Ellwand explores the limits of imagination in home design as well as haute couture. Original. Since precious few architectural drawings and no theoretical treatises on architecture remain from the premodern Islamic world, the Timurid pattern scroll in the collection of the Topkapi Palace Museum Library is an exceedingly rich and valuable source of information. In the course of her in-depth analysis of this scroll dating from the late fifteenth or early sixteenth century, Gülru Necipoğlu throws new light on the conceptualization, recording, and transmission of architectural design in the Islamic world between the tenth and sixteenth centuries. Her text has particularly far-reaching implications for recent discussions on vision, subjectivity, and the semiotics of abstract representation. She also compares the Islamic understanding of geometry with that found in medieval Western art, making this book particularly valuable for all historians and critics of architecture. The scroll, with its 114 individual geometric patterns for wall surfaces and vaulting, is reproduced entirely in color in this elegant, large-format volume. An extensive catalogue includes illustrations showing the underlying geometries (in the form of incised "dead" drawings) from which the individual patterns are generated. An essay by Mohammad al-Asad discusses the geometry of the muqarnas and demonstrates by means of CAD drawings how one of the scroll's patterns could be used to design a three-dimensional vault.

A major work by one of the more innovative thinkers of our time, Politics of Nature does nothing less than establish the conceptual context for political ecology--transplanting the terms of ecology into more fertile philosophical soil than its proponents have thus far envisioned. Bruno Latour announces his project dramatically: "Political ecology has nothing whatsoever to do with nature, this jumble of Greek philosophy, French Cartesianism and American parks." Nature, he asserts, far from being an obvious domain of reality, is a way of assembling political order without due process. Thus, his book proposes an end to the old dichotomy between nature and society--and the constitution, in its place, of a collective, a community incorporating humans and nonhumans and building on the experiences of the sciences as they are actually practiced. In a critique of the distinction between fact and value, Latour suggests a redescription of the type of political philosophy implicated in such a "commonsense" division--which here reveals itself as distinctly uncommonsensical and in fact fatal to democracy and to a healthy development of the sciences. Moving beyond the modernist institutions of "mononaturalism" and "multiculturalism," Latour develops the idea of "multinaturalism," a complex collectivity determined not by outside experts claiming absolute reason but by "diplomats" who are flexible and open to experimentation. Table of Contents: Introduction: What Is to Be Done with Political Ecology? 1. Why Political Ecology Has to Let Go of Nature First, Get Out of the Cave Ecological Crisis or Crisis of Objectivity? The End of Nature The Pitfall of "Social Representations" of Nature The Fragile Aid of Comparative Anthropology What Successor for the Bicameral Collective? 2. How to Bring the Collective Together Difficulties in Convoking the Collective First Division: Learning to Be Circumspect with Spokespersons Second Division: Associations of Humans and Nonhumans Third Division between Humans and Nonhumans: Reality and Recalcitrance A More or Less Articulated Collective The Return to Civil Peace 3. A New Separation of Powers Some Disadvantages of the Concepts of Fact and Value The Power to Take into Account and the Power to Put in Order The Collective's Two Powers of Representation Verifying That the Essential Guarantees Have Been Maintained A New Exteriority 4. Skills for the Collective The Third Nature and the Quarrel between the Two "Eco" Sciences Contribution of the Professions to the Procedures of the Houses The Work of the Houses The Common Dwelling, the Oikos 5. Exploring Common Worlds Time's Two Arrows The Learning Curve The Third Power and the Question of the State The Exercise of Diplomacy War and Peace for the Sciences Conclusion: What Is to Be Done? Political Ecology! Summary of the Argument (for Readers in a Hurry...) Glossary Notes Bibliography Index From the book: What is to be done with political ecology? Nothing. What is to be done? Political ecology! All those who have hoped that the politics of nature would bring about a renewal of public life have asked the first question, while noting the stagnation of the so-called "green" movements. They would like very much to know why so promising an endeavor has so often come to naught. Appearances notwithstanding, everyone is bound to answer the second question the same way. We have no choice: politics does not fall neatly on one side of a divide and nature on the other. From the time the term "politics" was invented, every type of politics has been defined by its relation to nature, whose every feature, property, and function depends on the polemical will to limit, reform, establish, short-circuit, or enlighten public life. As a result, we cannot choose whether to engage in it surreptitiously, by distinguishing between questions of nature and questions of politics, or explicitly, by treating those two sets of questions as a single issue that arises for all collectives. While the ecology movements tell us that nature is rapidly invading politics, we shall have to imagine – most often aligning ourselves with these movements but sometimes against them – what a politics finally freed from the sword of Damocles we call nature might be like.

*A conceptually innovative and visually stunning investigation of the interconnected worlds of high fashion and fairy tales*

*With exquisite original photos and boundless enthusiasm, David Ellwand offers a love song to film photography and the vintage cameras that capture it. From the pinhole to the Pentax, "Retro Photo: An Obsession" is a visual journey through the history of photography, highlighting some of the iconic cameras of the analog era. Appealing to those new to film photography as well as the seasoned professional wanting to explore new avenues, this beautiful keepsake volume showcases more than one hundred cameras from the collection of photographer and author David Ellwand, along with photographs he has taken with them. At once an accessible guide to vintage cameras, a highly personal take on photographic history, and a celebration of classic design, here is a book that takes the fear out of old-style photography and puts the fun back in.*

*Three of Marianne Williamson's previous bestsellers -- A Return to Love, A Woman's Worth, and Illuminata -- explored the issue of relationships. Now, in this deeply personal collection of essays, prayers, and self-reflection, she turns to romantic love. In Illuminata, Williamson wrote that "we experience God to the extent to which we love, forgive, and focus on the good in others and ourselves." Now, in Enchanted Love, she writes that "enchanted partnership begins with the conscious understanding, on the part of two people, that the purpose of their relationship is not so much material as spiritual, and the internal skills demanded by it are prodigious." High romance, she says, "is not about past or future. It is not about practicality. It is not about society or worldly routines. It is an audacious ride to the center of what is, at the heart of every person. It is a bold and masterful inquiry into what two people really are and how we might become, while still on earth, the angels who reside within us."*

From the body to the ever-present lens, the world is increasingly preoccupied with the visual. What exactly is the visual' and how can we interpret the multitude of images that bombard us every day? Reading the Visual takes as its starting point a tacit familiarity with the visual, and shows how we see even ordinary objects through the frameworks and filters of culture and personal experience. It explains how to analyse the mechanisms, conventions, contexts and uses of the visual in western cultures to make sense of visual objects of all kinds. Drawing on a range of theorists including John Berger, Foucault, Bourdieu and Crary, the authors outline our relationship to the visual, tracing changes to literacies, genres and pleasures affecting ways of seeing from the Enlightenment to the advent of virtual technology. Reading the Visual is an invaluable introduction to visual culture for readers across the humanities and social sciences. Eloquently written, admirably clear, passionately argued, Schirato and Webb have given us one of the best textbooks on the emergent field of visual culture. Smart, clear and relevant examples challenge readers to question their visual environments and become critics and creators themselves.' Professor Sean Cubitt, University of Waikato This is a splendid book. It is both intellectually sophisticated and written in an extremely accessible manner.' Professor Jim McGuigan, Loughborough University

This book treats the interpretation and value of visual artefacts with depth, while remaining highly accessible. It is very readable: written in a lively and engaging style with examples that are refreshing and up-to-date.' Professor Guy Julier, Leeds Metropolitan University The World of The Dark Crystal invites fans to delve into the creation and lore of the Jim Henson classic through the evocative illustrations of Brian Froud, concept designer on the original film. Since its original release in 1982, Jim Henson's brilliant film The Dark Crystal has gone on to become a beloved cult classic. The World of Dark Crystal—the original companion art book to the film—was created by Henson and internationally renowned artist Brian Froud to showcase the gorgeous conceptual artwork created for the film and delve deeper into the lore that underpins Thra, the magical world at the heart of the film. Now, for the first time in over a decade, The World of Dark Crystal is back in print, featuring an abundance of striking art and all of the bonus material from the 2003 Collector's Edition. Also included in this exclusive volume is a fascinating essay by Froud on the creative process behind the making of the film and a facsimile of a booklet presented to the film's early backers—a gorgeous overview of the story so rare only a few original copies exist.

Beautiful, imaginative, and powerful, The World of The Dark Crystal celebrates the landmark fantasy film that continues to win new fans more than three decades after its release. A pioneering examination of the folkloric qualities of the World Wide Web, e-mail, and related digital media. These studies show that folk culture, sustained by a new and evolving vernacular, has been a key, since the Internet's beginnings, to language, practice, and interaction online. Users of many sorts continue to develop the Internet as a significant medium for generating, transmitting, documenting, and preserving folklore. In a set of new, insightful essays, contributors Trevor J. Blank, Simon J. Bronner, Robert Dobler, Russel Frank, Gregory Hansen, Robert Glenn Howard, Lynne S. McNeill, Elizabeth Tucker, and William Westerman showcase ways the Internet both shapes and is shaped by folklore John Dewey's Democracy and Education addresses the challenge of providing quality public education in a democratic society. In this classic work Dewey calls for the complete renewal of public education, arguing for the fusion of vocational and contemplative studies in education and for the necessity of universal education for the advancement of self and society. First published in 1916, Democracy and Education is regarded as the seminal work on public education by one of the most important scholars of the century.

*Economic history states that money replaced a bartering system, yet there isn't any evidence to support this axiom. Anthropologist Graeber presents a stunning reversal of this conventional wisdom. For more than 5000 years, humans have used elaborate credit systems to buy and sell goods. Since the beginning of the agrarian empires, humans have been divided into debtors and creditors. Through time, virtual credit money was replaced by gold and the system as a whole went into decline. This fascinating history is told for the first time.*
