The story of the Burley-Demeritt Farm in Lee, NH spans over 250 years and is told in six sections with over 260 photos and illustrations. The farm was owned by seven generations of the Burley, Furber and Demeritt families before it was purchased by the University of New Hampshire in 1969 and is now operated by UNH as an organic dairy farm. Part I covers its history, dating back to the early 1700's. Parts II and III feature 86 short stories about Della Demeritt's memories of growing up on the Farm in the early 20th century and her children's remembrances of living there in the 1940's. Part IV covers UNH's continuing involvement with the Farm's operation and ongoing efforts by the surrounding community to restore the deteriorating farmhouse. Part V provides a brief section on the genealogy of the three families connected with the Farm's history. Part VI describes the history of the Burley-Demeritt Farmhouse, including a layout of its rooms with numerous photos of its interior as it existed in 2010.

Contrary to popular belief, a good living can be made on an organic farm. What's required is farming smarter, not harder. In The Organic Farmer's Business Handbook, Richard Wiswall shares advice on how to make your vegetable production more efficient, better manage your employees and finances, and turn a profit. From his twenty-seven years of experience at Cate Farm in Vermont, Wiswall knows firsthand the joys of starting and operating an organic farm—as well as the challenges of making a living from one. Farming offers fundamental satisfaction from producing food, working outdoors, being one's own boss, and working intimately with nature. But, unfortunately, many farmers avoid learning about the business end of farming; because of this, they often work harder than they need to, or quit farming altogether because of frustrating—and often avoidable—losses. In this comprehensive business kit, Wiswall covers: Step-by-step procedures to make your crop production more efficient Advice on managing employees, farm operations, and office systems Novel marketing strategies What to do with your profits: business spending, investing, and planning for retirement A companion CD offers valuable business tools, including easy-to-use spreadsheets for projecting cash flow, a payroll calculator, comprehensive crop budgets for forty different crops, and tax planners.

The Future of Family Farms

101 Weird Ways to Make Money

From Baseballs to Bombshells

A monumental transfer of farmland is occurring in the United States. The average American farmer is fifty-eight years old, and the 40 percent of farmland owners who lease their land to others are even older: sixty-six on average. Five times as many farmers are over sixty-five as are under thirty-five. What will happen to this land? Who will own it? What if one child wants to farm but can't afford to buy out the nonfarming siblings? What if keeping the farm in the family means foregoing the significant profits that could be earned from selling it? These sometimes painful and divisive questions confront many farmers and farmland owners today. How they answer them will shape their families and the land for generations to come. The Farm Legacy Letters project, developed by the member-driven nonprofit Practical Farmers of Iowa, is designed to help farmers and farmland owners think about their farm's future and talk about it with their families. An essential complement to handbooks on business succession, this book gathers the letters and stories of midwestern families about the land they cherish—how they acquired it, what they treasure most about it, and their hopes for its future. Some of the writers descend from families who have owned a particular patch of the earth since the 1800s, while others became farmland owners more recently—one as recently as 2015. Some are no longer farmland owners at all, because—after careful thought about what mattered most to them—they sold their land to the next generation of farmers. All of these writers hope that, by sharing their farmland legacies, they will encourage others to ponder and then write about the histories, accomplishments, challenges, and hopes for their farmland for the generations who come after they are gone.
