Generazione sex. La guida felice al sesso ancora pi ù feliceGuide to Getting it onA Book about the Wonders of Sex

Una generazione cresciuta "nella rete": prendendo le mosse da uno dei fenomeni tipici del nostro tempo, gli autori si interrogano sui criteri per distinguere un uso adattivo dei social e dei videogiochi da un sintomo di malessere o dipendenza. Cyberbullismo, sexting, gioco d'azzardo e, in modo particolare, ritiro sociale sono alcuni dei comportamenti analizzati in questo testo, denso di riflessioni sui motivi della loro diffusione e sulle possibili modalità di intervento. La rivoluzione digitale ha creato ambienti espressivi nei quali non solo gli adolescenti sperimentano nuove possibilità di realizzazione, ma trovano rifugio in occasione di profonde crisi evolutive, in una forma di autoricovero che esprime sia il dolore sia un tentativo di alleviarlo o superarlo. In particolare, alla luce dell'esperienza maturata negli ultimi quindici anni, gli autori inquadrano la psicodinamica del ritiro sociale, oggi la pi ù significativa manifestazione del disagio giovanile, e presentano gli orientamenti clinici che guidano la presa in carico dell'adolescente in una prospettiva evolutiva.

The theme of the conference this year was Critical CALL, drawing inspiration from the work carried out in the broader field of Critical Applied Linguistics. The term 'critical' has many possible interpretations, and as Pennycook (2001) outlines, has many concerns. It was from these that we decided on the conference theme, in particular the notion that we should question the assumptions that lie at the basis of our praxis, ideas that have become 'naturalized' and are not called into question. Over 200 presentations were delivered in 68 different sessions, both in English and Italian, on topics related specifically to the theme and also more general CALL topics. 94 of these were submitted as extended papers and appear in this volume of proceedings.

Marco Pellitteri examines the growing influence of Japanese pop culture in European contexts in this comprehensive study of manga, anime, and video games. Looking at the period from 1975 to today, Pellitteri discusses Super Mario, Pokémon, kawaii, Sonic, robots and cyborgs, Astro Boy, and Gundam, among other examples of these popular forms. Pellitteri divides this period into two eras ("the dragon" and "the dazzle") to better understand this cultural phenomenon and means by which it achieved worldwide distribution.

Community seed banks first appeared towards the end of the 1980s, established with the support of international and national non-governmental organizations. This book is the first to provide a global review of their development and includes a wide range of case studies. Countries that pioneered various types of community seed banks include Bangladesh, Brazil, Ethiopia, India, Nepal, Nicaragua, the Philippines and Zimbabwe. In the North, a particular type of community seed bank emerged known as a seed-savers network. Such networks were first established in Australia, Canada, the UK and the USA before spreading to other countries. Over time, the number and diversity of seed banks has grown. In Nepal, for example, there are now more than 100 self-described community seed banks whose functions range from pure conservation to commercial seed production. In Brazil, community seed banks operate in various regions of the country. Surprisingly, despite 25 years of history and the rapid growth in number, organizational diversity and geographical coverage of community seed banks, recognition of their roles and contributions has remained scanty. The book reviews their history, evolution, experiences, successes and failures (and reasons why), challenges and prospects. It fills a significant gap in the literature on agricultural biodiversity and conservation, and their contribution to food sovereignty and security.

This book investigates one concrete compounding pattern in present-day Italian within a larger overview of Italian compounding. Various accounts and classifications of Noun + Noun combinations in Italian are reviewed, with special focus on the status of the lexical integrity hypothesis. The author sets out to propose an integrated approach to the Noun + Noun compounding pattern, rigorously based on large representative data sets that were extracted from the Italian web corpus ItWaC as both automatically and manually post-processed frequency lists. On the basis of such data, it is aimed to show the behaviour of various subtypes of Noun + Noun compounds. Starting out with the Bisetto-Scalise classification, the author carefully examines the status of coordinate compounds, ATAP compounds (i.e., the group comprising attributive and appositive structures) and subordinate compounds (comprising verbal-nexus and grounding compounds), discussing both theoretical and empirical implications of this classification scheme. Moreover, the original Bisetto-Scalise model is supplemented with further classification levels in order to capture specific compounding types such as relational (i.e. inherently trinominal) compounds. A major merit of the present study lies in the quantitative dimension of the data it deals with. In light of this data, the author emphasizes the gradient nature of the traditional dichotomy between syntax and compounding. The book will thus appeal not only to the linguists interested specifically in Italian word-formation, but also to a larger community of scholars who seek a more general view of the word-formation phenomena.

**The best-selling author of BRINGING UP BÉBÉ investigates life in her forties, and wonders whether her mind will ever catch up with her face. When Pamela Druckerman turns 40, waiters start calling her "Madame," and she detects a new message in mens' gazes: I would sleep with her, but only if doing so required no effort whatsoever. Yet forty isn't even technically middle-aged anymore. And there are upsides: After a lifetime of being clueless, Druckerman can finally grasp the subtext of conversations, maintain (somewhat) healthy relationships and spot narcissists before they ruin her life. What are the modern forties? What do we know once we reach them? What makes someone a "grown-up" anyway? And why didn't anyone warn us that we'd get cellulite on our arms? Part frank memoir, part hilarious investigation of daily life, There Are No Grown-Ups diagnoses the in-between decade when... • Everyone you meet looks a little bit familiar. • You're matter-of-fact about chin hair. • You can no longer wear anything ironically. • There's at least one sport your doctor forbids you to play. • You become impatient while scrolling down to your year of birth. • Your parents have stopped trying to change you. • You don't want to be with the cool people anymore; you want to be with your people. • You realize that everyone is winging it, some just do it more confidently. • You know that it's ok if you don't like jazz. Internationally best-selling author and New York Times contributor Pamela Druckerman leads us on a quest for wisdom, self-knowledge and the right pair of pants. A witty dispatch from the front lines of the forties, THERE ARE NO GROWN-UPS is a (midlife) coming-of-age story--and a book for anyone trying to find their place in the world.**

**Seventeen-year-old Mercedes Ayres has an open-door policy when it comes to her bedroom, but only if the guy fulfills a specific criteria: he has to be a virgin. Mercedes lets the boys get their awkward fumbling first times over with, and all she asks in return is that they give their girlfriends the perfect first time-the kind Mercedes never had herself. Keeping what goes on in her bedroom a secret has been easy - so far. Her mother isn't home nearly enough to know about Mercedes' extracurricular activities, and her uber-religious best friend, Angela, won't even say the word "sex" until she gets married. But Mercedes doesn't bank on Angela's boyfriend finding out about her services and wanting a turn - or on Zach, who likes her for who she is instead of what she can do in bed. When Mercedes' perfect system falls apart, she has to find a way to salvage her own reputation -and figure out where her heart really belongs in the process. Funny, smart, and true-to-life, Laurie Elizabeth Flynn's Firsts is a one-of-a-kind young adult novel about growing up.**

This comprehensive resource provides readers with the tools necessary to perform analysis of various waveforms for use in radar systems. It provides information about how to produce synthetic aperture (SAR) images by giving a tomographic formulation and implementation for SAR imaging. Tracking filter fundamentals, and each parameter associated with the filter and how each affects tracking performance are also presented. Various radar cross section measurement techniques are covered, along with waveform selection analysis through the study of the ambiguity function for each particular waveform from simple linear frequency modulation (LFM) waveforms to more complicated coded waveforms. The text includes the Python tool suite, which allows the reader to analyze and predict radar performance for various scenarios and applications. Also provided are MATLAB® scripts corresponding to the Python tools. The software includes a user-friendly graphical user interface (GUI) that provides visualizations of the concepts being covered. Users have full access to both the Python and MATLAB source code to modify for their application. With examples using the tool suite are given at the end of each chapter, this text gives readers a clear understanding of how important target scattering is in areas of target detection, target tracking, pulse integration, and target discrimination.

In Sleepless Nights a woman looks back on her life—the parade of people, the shifting background of place—and assembles a scrapbook of memories, reflections, portraits, letters, wishes, and dreams. An inspired fusion of fact and invention, this beautifully realized, hard-bitten, lyrical book is not only Elizabeth Hardwick's finest fiction but one of the outstanding contributions to American literature of the last fifty years.

"When, why and how was it first believed that the corpse could reveal 'signs' useful for understanding the causes of death and eventually identifying those responsible for it? The Body of Evidence. Corpses and Proofs in Early Modern European Medicine, edited by Francesco Paolo de Ceglia, shows how in the late Middle Ages the dead body, which had previously rarely been questioned, became a specific object of investigation by doctors, philosophers, theologians and jurists. The volume sheds new light on the elements of continuity, but also on the effort made to liberate the semantization of the corpse from what were, broadly speaking, necromantic practices, which would eventually merge into forensic medicine"--

In many European languages the National Standard Variety is converging with spoken, informal, and socially marked varieties. In Italian this process is giving rise to a new standard variety called Neo-standard Italian, which partly consists of regional features. This book contributes to current research on standardization in Europe by offering a comprehensive overview of the re-standardization dynamics in Italian. Each chapter investigates a specific dynamic shaping the emergence of Neo-standard Italian and Regional Standard Varieties, such as the acceptance of previously non-standard features, the reception of Old Italian features excluded from the standard variety, the changing standard language ideology, the retention of features from Italo-Romance dialects, the standardization of patterns borrowed from English, and the developmental tendencies of standard Italian in Switzerland. The contributions investigate phonetic/phonological, prosodic, morphosyntactic, and lexical phenomena, addressed by several empirical methodologies and theoretical vantage points. This work is of interest to scholars and students working on language variation and change, especially those focusing on standard languages and standardization dynamics.

***Jungian Child Analysis brings together ten certified Child & Adolescent Analysts (IAAP) to discuss how healing with children occurs within the analytical framework. While the majority of Jung's corpus centered on the collective aspects of the adult psyche, one can find in Jung's earliest work clinical observations and ideas that reflect an uncanny prescience of the psychological research that would later emerge regarding the self and the mother-infant relationship. This book discusses and illustrates in very practical ways how one uses an analytical attitude and works with the symbolic: this includes illustrations of analytical play therapy, dream analysis, sandplay, work with special populations and work with the parents and families of the child. Not only will the book capture your interest and further your development in working with children and adolescents, but also will enhance your work with adults. Jungian Child Analysis, edited by Audrey Punnett; foreword by Wanda Grosso; contributors include Margo M. Leahy, Liza J. Ravitz, Brian Feldman, Lauren Cunningham, Patricia L. It also covers recent innovative developments and addresses the key issues and major challenges that qualitative migration research may face at different stages i.e. crafting the research questions, defining approaches, developing concepts and theoretical frameworks, mapping categories, selecting cases, dealing with concerns of self-reflection, collecting and processing empirical evidence through various techniques, including visual data, dealing with ethical issues, and developing policy-research dialogues. Each chapter discusses relative strengths and limitations of qualitative research. The chapters also identify the main drivers for qualitative research development in migration studies. This first novel by the acclaimed author of Demonology and The Ice Storm traces a group of friends in Haledon, New Jersey, through one Spring in their rocky passage towards adulthood. The kids are out of school, trying to start a band, trying to find work: looking for something in their suburban hometown. Garden State starkly captures the lyricism of their lives in an intense and unforgettable story of friendship and betrayal.

The European Union and the single currency have given Europe more stability than it has known in the past thousand years, yet Europe seems to be in perpetual crisis about its global role. The many European empires are now reduced to a multiplicity of ethnicities, traditions, and languages. How can Europe survive as a union it will have to become a federation of "islands" both distinct and connected. Though drawing on philosophers of Europe's past, Cacciari calls not to resist Europe's sunset but to embrace it. Europe will have to open up to the possibility that in few generations it will again change all we know about the European legacy. Though scarcely alive in today's politics, the political unity of Europe is still a necessity, however impossible it seems to achieve.
