Life and Death in the Valley of the Kings' has written an enthralling account of Nefertiti, one of Egypt's most compelling and mysterious figures. Wife of the controversial pharaoh Akhenaten, she lived through perhaps the most tumultuous period in the country's long history. The so-called Amarna Period has long held a fascination - not just for the enormous changes it brought to the religion, art and administration of Egypt, but for the many mysteries which surround it.

Mysteries, that is, until now. Leading Egyptologist Dr Joann Fletcher has taken a fresh eye to the evidence and arrived at one of the most dramatic discoveries in recent times. Working with a team of leading experts, she has identified a long-forgotten mummy as the body of a female pharaoh of the Amarna Period, whom she believes is Nefertiti herself. Lying for over three thousand years in an unused side chamber of Tomb KV.35 in the Valley of the Kings, it tells a story which will forever

change the way in which we view Nefertiti - and indeed women throughout Egyptian history. Now at last we see the full significance of her role as co-regent and later Pharaoh of Egypt, as well as understanding the astonishing luxury and decadence of her life in Amarna - a life she led as the country around her began to disintegrate.

of scholarship in both England and the United States. In this in-depth exploration of the relationship between Puritans in England and New England, Francis J. Bremer challenges the view that the colonists turned away from English Puritans in the 1640s. Rather, he convincingly demonstrates that the two communities retained a complex, symbiotic connection - a communion - throughout the seventeenth century, and that the clergy on both sides of the Atlantic saw themselves as closely linked in their spiritual mission. Focusing on the interaction between social experience and

the shaping of belief, Bremer thoroughly analyzes how Puritan clergymen of a congregational persuasion came together in a godly communion and examines how that communion sustained them in times of trouble and physical dispersal. He explains the social forces that led to the articulation of early Congregationalism and details the significance of trans-Atlantic religious exchanges through correspondence, associations, publications, and other devices. Bremer traces the first-generation Puritans from their formative years at Cambridge University through

the creation of a network of clerical friendships, through the flight to Holland and to New England, to the death of Oliver Cromwell and the beginnings of division within Congregationalism. This thought-provoking volume makes a solid contribution to Puritan studies and offers a basis for further discussions of the trans-Atlantic aspects of the Congregational community.

Cosmos explores the sociocultural significance of more than three hundred Middle Preclassic Maya figurines uncovered at the site of Nixtun-Ch'ich' on Lake Petén Itzá in northern Guatemala. In this careful, holistic, and detailed analysis of the Petén lakes figurines—hand-modeled, terracotta anthropomorphic fragments, animal figures, and musical instruments such as whistles and ocarinas—Prudence M. Rice engages with a broad swath of theory and comparative data on Maya ritual practice. Presenting original data,

Anthropomorphizing the Cosmos offers insight into the synchronous appearance of fired-clay figurines with the emergence of societal complexity in and beyond Mesoamerica. Rice situates these Preclassic Maya figurines in the broader context of Mesoamerican human figural representation, identifies possible connections between anthropomorphic figurine heads and the origins of calendrics and other writing in Mesoamerica, and examines the role of anthropomorphic figurines and zoomorphic musical instruments in Preclassic Maya ritual. The

volume shows how community rituals involving the figurines helped to mitigate the uncertainties of societal transitions, including the beginnings of settled agricultural life, the emergence of social differentiation and inequalities, and the centralization of political power and decision-making in the Petén lowlands. Alopecia and Female Pattern Hair Loss (AGA/FPHL). These are probably the most common adult (18-50 yrs.) health disorders besides dental caries, accounting for over 98% of hair loss cases in males and over 70% cases in females. The present volume, the first of three related volumes, is structured in 4 sections: 22 dedicated chapters, ranging from basic science (Biology, Anatomy, Physiology, Embryology), the etiology of adult, childhood & adolescent AGA/FPHL, diagnostic steps and evaluation, to related disorders and comorbidities. For the first time in the scientific literature, all pathogenic contributors of AGA/FPHL,

The effects of every hormone on AGA/FPHL, as well as the psychological impact of the condition, are explored in depth. An extensive chapter on childhood and adolescent AGA/FPHL, a more common than previously thought condition, is another unique feature. Finally, two extremely detailed sections are included on the pathogenic links of AGA/FPHL to life-threatening comorbidities: cardiovascular disease, metabolic syndrome, hypertension, insulin resistance, and prostatic disorders,

The Codrus Painter was a painter of cups and vases in fifth-century B.C.E. Athens with a distinctive style; he is named after Codrus, a legendary Athenian king depicted on one of his most characteristic vases. He was active as an artist during the rule of Pericles, as the Parthenon was built and then as the troubled times of the

Peloponnesian War began. In contrast to the work of fellow artists of his day, the vases of the Codrus Painter appear to have been created almost exclusively for export to markets outside Athens and Greece, especially to the Etruscans in central Italy and to points further west. Amalia Avramidou offers a thoroughly researched, amply illustrated study of the Codrus Painter that also comments on the mythology, religion, arts, athletics, and daily life of Greece depicted on his vases. She evaluates his style and the defining characteristics of his own hand and of the minor painters associated with him. Examining the subject matter, figure types, and

motifs on the vases, she compares them with sculptural works produced during the same period. Avramidou's iconographic analysis not only encompasses the cultural milieu of the Athenian metropolis, but also offers an original and intriguing perspective on the adoption, meaning, and use of imported Attic vases among the Etruscans.
