*Have you ever noticed how many parents tend to encourage their kids to behave during the Christmas season because Santa is watching, and taking notes of who's good and who's naughty? Well this is the story of how Santa Claus, Frosty, and Peter Cottontail all decided to work together, not in seasonal shifts, as per the norm, but rather all year round to encourage children everywhere to behave all throughout the year because Santa now has his buddies helping to keep his lists updated. Although the story is filled with holiday characters, this was intended to be neither a holiday nor Christian book; instead, the author thought it was important to give kids a new perspective on the importance of good behavior and obedience, and to also help spread God's name to anyone who may have never heard of Jesus or his guardian angels. The author wanted a very colorful story that would encourage kids to explore their imagination and curiosity, and with adults in mind who simply enjoy reading to their little ones. The author is an Air Force veteran who was*

*reminded how important family is, and wanted to give back in a fun and exciting way; a way in which he had hoped would help bring the family closer together in the more traditional sense, as opposed to all the distracting and mind-numbing electronics of today...good, old fashioned, story time.*

From the author of The Four Paws and a Tale trilogy comes this insightful and compelling Christmas story. Santa is worried that people do not believe they are responsible for destroying the delicate balance of the North Pole, home to the elves, reindeer, starflowers, arctic berries, northern lights, and some very special animals. The elves in the workshop are sick, and so are the reindeer, the flowers and berries have not blossomed, the Christmas crystals have not appeared, there is no snow in the arctic lands, and the northern lights cannot be seen. It seems that the magic of Christmas might be lost forever. One Christmas Eve, Santa appears in the dreams of children and asks for their help. Old St. Nicks of yesteryears also visit parents and grandparents as they sleep. St. Nicks of the past hint to the older generation that they have failed to preserve the magic of Christmas by allowing technology and progress to disturb the arctic lands. Human activity in and around the north pole will spell a very dismal future for the world. Santa does, however, reveal a promising future, where children and parents are engaged and active in protecting the forests, glaciers, oceans, rivers, lakes, and animals. He implores the young and the old to leave this beautiful world a little better than they found it and begins to enlist the help of some very special humans to live and work in the North Pole. Through conservation efforts and under the guidance of Father Christmas and Sugar Shot, the chief woodland elf, they begin to preserve and restore the arctic lands so that the magic of Christmas would endure for all generations.

A Wonderful Christmas Story Book of Santa telling 18 stories from Santa's Village. Ho, ho, ho! Hello children and welcome to the world of Santa and all of his magical helpers. I bet you have all heard of Santa Clause, in fact I know you have because of all the millions of letters I receive each year from you all, but I imagine that most of you do not know very much about where I live and all of the creatures who live with me in the North Pole and help me make Christmas so special. I was concerned that it is only ever Rudolph and I that seem to get the credit but the truth is that here in my Village we work together as a team so that the children of the world receive their gifts on Christmas morning. Why there are elves, gnomes, snowmen, reindeer, talking Christmas trees to name just a few. Read this Book and you will enjoy the magic of Christmas- Merry Christmas Santa

Seventeen-year-old Matt Bowden is convinced that his uncle didn't commit suicide. Matt believes his favorite uncle's murder has something to do with the book he was writing about Southwest mines and treasures. Matt is determined to find out who killed Uncle Jonas and why. Matt returns to his uncle's house and searches for a clue. He copies all of his uncle's computer files on the new book he was writing and also finds a phone message from a man named Art Fogle, a university history professor. Matt soon learns that Fogle was killed in a hit-and-run accident, only hours before Matt found his murdered uncle. Just a coincidence, or is there a connection between Art Fogle's and Uncle Jonas' deaths? Matt asks the soon-to-retire homicide detective, John Pawlowski, for help. From his uncle's files, Matt learns that Uncle Jonas borrowed a valuable Spanish document--alluding to a fortune in gold and silver--from a Mrs. Garcia. Matt goes to see the Mexican woman and meets her granddaughter, Susan Martinez. With his uncle dead and the Spanish document missing, Matt agrees to help Susan find her grandmother's treasure document. The trail leads Matt and Susan to a man named Phil Simpson, a local authority on Southwest mines and treasures. After their visit, Simpson dies mysteriously, when his house burns down. Detective John Pawlowski is now convinced that all three deaths are tied to the missing Spanish document. All Matt, Susan and John have to do now is stay one step ahead of the killer and find the Spanish treasure before anyone else is murdered.

*Over six billion dollars in developmental assistance is funneled annually through non-governmental organizations (NGOs), yet little is understood about the nature of their relationship with communities and the real impact of their work. This book examines what role NGOs really play in fighting poverty in Latin America. Expert NGO professionals and scholars explore grass-roots relationships between international religious and secular NGOs and poor communities. They probe the power structures, cultural assumptions, dangers and possibilities that underlie NGOs' work. While fighting poverty is the mission of many NGOs, most are aware that they often fail to make things better, and, in fact, may make things worse. By providing a forum for Northern and Southern NGOs, donors, scholars, and poor people themselves, this book explores the causes and cures of poverty, and presses at the boundaries of our understanding of participatory development. It identifies both internal and external factors that influence the success of NGO projects, and moves beyond standard best-practice theory to probe more deeply the relationships that underlie poverty and how these relationships can be shifted to achieve solutions.*

Presents papers which were discussed at the Arden House Conference—a conference held to establish a working relationship between sociologists at the Russell Sage Foundation and journalists of the Graduate School of Journalism of Columbia University. Both behavioral science and journalism have for a long time been concerned with some of the same major national social problems—juvenile delinquency, urban problems, race and minority group relations, international tensions, and labor relations. These papers touch on some of the barriers to communication and point to possible ways of breaking through those barriers.
