

Hidden Pictures 2005, Volume 4

This study, part of a series on OECD countries, considers how a tax/benefit and childcare policies and workplace practices help determine parental labour market outcomes and may impinge on family formation in Canada, Finland, Sweden and the UK.

The main objective of this textbook is to show cultural aspects and their influence of conducting business internationally. The authors aimed at providing information which can be useful in the process of making business decisions by taking into consideration the existing cultural diversification. This is why the theoretical discourse is accompanied by numerous examples, bringing to the book also a practical dimension. The book is addressed to a wide circle of readers – those interested in the phenomena occurring in the world economy and the dimensions of contemporary culture, as well as students of international business relations. It may also interest entrepreneurs, both those already present in international markets, and those who are at the planning stage of such future activities.

The fourth volume on Advances and Applications of Dezert-Smarandache Theory (DSmT) for information fusion collects theoretical and applied contributions of researchers working in different fields of applications and in mathematics. The contributions (see List of Articles published in this book, at the end of the volume) have been published or presented after disseminating the third volume (2009, http://fs.gallup.unm.edu/DSmT-book3.pdf) in international conferences, seminars, workshops and journals.

Here are Hidden Pictures--everyone's favorites--with added fun geared to the youngest readers. Young children will love these three new Hidden Pictures activity books from Highlights for Children. In every book, each of the twelve black-and-white illustrations comes with a set of full-color stickers, which are applied to the hidden objects on the page as the reader finds them. Each sticker sheet provides word and picture clues, and answer keys are provided in the back of each book.

Gender, Race, and Class in Media

Cartography in the European Enlightenment

Collected Works

Emergent Literacy

This book constitutes the refereed proceedings of the 14th International Multimedia Modeling Conference, MMM 2007, held in Kyoto, Japan, in January 2007. The 23 revised full papers and 24 revised poster papers were carefully reviewed and selected from more than 130 submissions. The papers are organized in topical sections that include material on media understanding, creative media, visual content representation, and video codecs, as well as media retrieval, audio and music.

Since its launch in 1987, the History of Cartography series has garnered critical acclaim and sparked a new generation of interdisciplinary scholarship. Cartography in the European Enlightenment, the highly anticipated fourth volume, offers a comprehensive overview of the cartographic practices of Europeans, Russians, and the Ottomans, both at home and in overseas territories, from 1650 to 1800. The social and intellectual changes that swept Enlightenment Europe also transformed many of its mapmaking practices. A new emphasis on geometric principles gave rise to improved tools for measuring and mapping the world, even as large-scale cartographic projects became possible under the aegis of powerful states. Yet older mapping practices persisted:

Enlightenment cartography encompassed a wide variety of processes for making, circulating, and using maps of different types. The volume ’s more than four hundred encyclopedic articles explore the era ’s mapping, covering topics both detailed—such as geodetic surveying, thematic mapping, and map collecting—and broad, such as women and cartography, cartography and the economy, and the art and design of maps. Copious bibliographical references and nearly one thousand full-color illustrations complement the detailed entries.

Early learners will love these 45 simple crossword puzzles, dot-to-dot pictures, word searches, mazes and more, sharpening their fine motor development, vocabulary, logical thinking, and number skills. Solutions included.

Private Equity Firms

From gender issues in Desperate Housewives, to race in Ugly Betty, gender biases in video games, and portrayals of the American family in Extreme Makeover, to analyzes of new genres like fandom and social media - no other book is so successful in engaging students in critical media scholarship. By encouraging students to critically analyze those media they already interact with for pleasure, and by editing the articles, Gail Dines and Jean Humez are able to make sophisticated concepts and theories accessible and interesting to undergraduate students.

This book explores the relationship between collecting Chinese ceramics, interior design and display in Britain through the eyes of collectors, designers and tastemakers during the years leading to, during and following the Second World War. The Ionides Collection of European style Chinese export porcelain forms the nucleus of this study – defined by its design hybridity – offering insights into the agency of Chinese porcelain in diverse contexts, from seventeenth-century Batavia to twentieth-century Britain, raising questions about notions of Chineseness, Britishness, and identity politics across time and space. Through the biographies of the collectors, this book highlights the role of collecting Chinese art objects, particularly porcelain, in the construction of individual and group identities. Social networks linking the Ionides to agents and dealers, auctioneers, and museum specialists bring into focus the dynamics of collecting during this period, the taste of the Ionides and their self-fashioning as collectors. The book will be of interest to scholars working

In the fields of art history, history of collections, interior design, Chinese studies, and material culture studies.

“Gajda’s chronicle reveals an enduring tension between principles of free speech and respect for individuals’ private lives. ...just the sort of road map we could use right now.”—The Atlantic “Wry and fascinating...Gajda is a nimble storyteller [and] an insightful guide to a rich and textured history that gets easily caricatured, especially when a culture war is raging.”—The New York Times An urgent book for today’s privacy wars, and essential reading on how the courts have—for centuries—often protected privileged men’s rights at the cost of everyone else’s: Should everyone have privacy in their personal lives? Can privacy exist in a public place? Is there a right to be left alone even in the United States? You may be startled to realize that the original framers were sensitive to the importance of privacy interests relating to sexuality and intimate life, but mostly just for powerful and privileged (and usually white) men. The battle between an individual’s right to privacy and the public’s right to know has been fought for centuries. The founders demanded privacy for all the wrong press-quashing reasons. Supreme Court Justice Louis Brandeis famously promoted First Amendment freedoms but argued strongly for privacy too, and presidents from Thomas Jefferson through Donald Trump confidently hid behind privacy despite intense public interest in their lives. Today privacy seems simultaneously under siege and surging. And that’s doubly dangerous, as legal expert Amy Gajda argues. Too little privacy leaves ordinary people vulnerable to those who deal in and publish soul-crushing secrets. Too much means the famous and infamous can cloak themselves in secrecy and dodge accountability. Seek and Hide carries us from the very start, when privacy concepts first entered American law and society, to now, when the law allows a Silicon Valley titan to destroy a media site like Gawker out of spite. Muckraker Upton Sinclair, like Nellie Bly before him, pushed the envelope of privacy and propriety and then became a privacy advocate when journalists used the same techniques against him. By the early 2000s we were on our way to today’s full-blown crisis in the digital age, worrying that smartphones, webcams, basement publishers, and the forever internet had erased the right to privacy completely.

An outstanding new military history of the first half of World War II, featuring a rich array of images, exclusive graphics, superb new maps, and expert analysis commissioned by the United States Military Academy to teach the art of war to West Point cadets. Since 1836, United States Military Academy texts have been the gold standard for teaching military history and the operational art of war. Now the USMA has developed a new military history series for the public featuring the story of World War II in two volumes, of which this is the first. The West Point History of World War II combines the expertise of preeminent historians with hundreds of maps and images, many created for this volume or selected from Army collections. The first volume offers a balanced narrative analyzing the rising tide of Axis conquest from 1939 to mid-1942, ranging from battlefield decisions to operational and strategic plans, all set in their proper political context. The closing chapter provides a thematic treatment of the mobilization of the warring nations’ economies and home fronts for the conduct of total war. The West Point History of World War II has been tested, checked, and polished by West Point cadets, faculty, and graduates to make this the best military history of its kind.

Advances in Multimedia Modeling

In this book the authors identify the basic concepts and recent advances in the acquisition, perception, coding and rendering of color. The fundamental aspects related to the science of colorimetry in relation to physiology (the human visual system) are addressed, as are constancy and color appearance. It also addresses the more technical aspects related to sensors and the color management screen. Particular attention is paid to the notion of color rendering in computer graphics. Beyond color, the authors also look at coding, compression, protection and quality of color images and videos. Individual chapters focus on the LMS specification, color constancy, color appearance models, rendering in synthetic image generation, image sensor technologies, image compression, and quality and secure color imaging. Ideal for researchers, engineers, Master ’s and PhD students, Digital Color: Acquisition, Perception, Encoding and Rendering offers a state of the art on all the scientific and technical issues raised by the different stages of the digital color process – acquisition, analysis and processing. Contents 1. Colorimetry and Physiology – The LMS Specification Françoise Viénot

and Jean Le Rohellec. 2. Color Constancy, Jean-Christophe Burie, Majed Chambeh and Sylvie Treuillet. 3. Color Appearance Models, Christine Fernandez-Maloinne and Alain Trémeau. 4. Rendering and Computer Graphics, Bernard Péroche, Samuel Delépouille and Christophe Renaud. 5. Image Sensor Technology, François Berry and Omar Al-Aider. 6. From the Sensor to Color Images, Olivier Lison and Eric Dineel. 7. Color and Image Compression, Abdelhakim Saadane, Mohamed-Chaker Larabi and Christophe Charrier. 8. Protection of Color Images, William Puech, Alain Trémeau and Philippe Carré. 9. Quality Assessment Approaches, Mohamed-Chaker Larabi, Abdelhakim Saadane and Christophe Charrier.

In 2011, after the popular uprising overthrow former President Zine al-Abidine Ben Ali, in Tunisia several issues came to the fore: among them, racism targeting “black” individuals. Few black rights associations emerged, and their struggle culminated in the promulgation of a law punishing racist acts and words in October 2019. The step is historical, and stems from Tunisia ’s foreshining policy concerning human and civil rights. In 1846, Tunisia was the first country to abolish slavery and the slave trade in the Ottoman Empire and in the Middle Eastern world. Becoming the ‘Abid addresses the issue of the legacy of slavery in a southern Tunisian governorate, where racism towards “black” individuals is still a painful experience and takes the form of professional, educational, and marital discrimination. Referring to the concept of “structural inequality”, the book goes beyond the simplistic idea that race is only related to phenotype, taking distance from the Western racial concepts, and highlights how processes of racialization are contextual, processual, and changing constructions.

In the 1970s and 1980s, the Disney animation studio redefined its creative vision in the wake of Walt Disney’s death. This latest volume from renowned Disney historian Didier Ghez profiles Ken Anderson and Mel Shaw, whose work defined beloved classic Disney characters from films like The Jungle Book, The Aristocats, Robin Hood, and The Rescuers. With vivid descriptions of passages from the artists’ autobiographies and interviews, accompanied by never-before-seen images of their art and process, this visually rich collection offers a rare view of the Disney leg-ends whose work helped shape the nature of character and story development for generations to come. The focus of the book Diagnostic Techniques and Surgical Management of Brain Tumors is on describing the established and newly-arising techniques to diagnose central nervous system tumors, with a special focus on neuroimaging, followed by a discussion on the neurosurgical guidelines and techniques to manage and treat this disease. Each chapter in the Diagnostic Techniques and Surgical Management of Brain Tumors is authored by international experts with extensive experience in the areas covered.

There are many books about liberalism, but no defence of radical critique that treats liberal theory with the depth, breadth and intensity of this work. Rigorously examining Rawls, Waldron, Larmore and Kymlicka, the book demonstrates that an adequate appreciation of the deep structural flaws of liberal theory presupposes the application of a critical philosophical methodology that has the power to reveal the systemic interconnections within and between the varieties of liberal inquiring practices.

Introduction Intellectual property rights foster innovation. But if, as it surely does, “intellectual property” means not just intellectual property rules—the law of patents, copyrights, trademarks, designs, trade secrets, and unfair competition—but also intellectual property institutions—the courts, police, regulatory agencies, and collecting soc- ties that administer these rules—what are the respective roles of intellectual property rules and institutions in fostering creativity? And, to what extent do forces outside intellectual property rules and institutions—economics, culture, politics, history—also contribute to innovation? Is it possible that these other factors so overwhelm the impact of intellectual property regimes that it is futile to expect adjustments in intellectual property rules and institutions to alter patterns of innovation and, ultimately, economic development? It was to address these questions in the most dynamic region of the world today, Asia, that we invited leading country experts to contribute studies that not only summarize the current condition of intellectual property regimes in countries ranging in economic size from Cambodia to Japan, and in population from Laos to China, but that also describe the historical sources of these laws and institutions; the realities of intellectual property enforcement in the marketplace; and the political, economic, educational, and scientific infrastructures that sustain and direct investment in innovative activity. A Critical Reader

West Point History of World War II, Vol. 1

This work analyzes the role of private equity firms (SCIs) in forming strategic alliances in the French private equity market. The subject is important because the formation of alliances and, more generally, the networking of SMEs, could be an alternative to the lack of medium-sized companies in France. For French SCIs, which are increasingly in a competitive situation, assistance in forming alliances for their holdings may represent a new activity and be a source of competitive advantage. The work is positioned transversally, touching the areas of corporate governance, entrepreneurial finance and strategy.

The two volume set LNCS 4351 and LNCS 4352 constitutes the refereed proceedings of the 13th International Multimedia Modeling Conference, MMM 2007, held in Singapore in January 2007. Based on rigorous reviewing, the program committee selected 123 carefully revised full papers of the main technical sessions and 33 revised full papers of four special sessions from a total of 392 submissions for presentation in two volumes.

The private single family house is still very much the preferred choice of home. Yet in recent years there have been many changes not only in the personal situations of the residents, their expectations and desires, but also in the rising costs of energy and raw materials. This has meant that issues such as multi-functionalism, the use of innovative building materials or energy-efficient building methods are increasing in significance. In this completely revised and expanded second edition these topical developments have been taken into consideration. The organisation and layout of the first volume, with its concise and detailed project documentation, has been retained. The authors introduce floor plan solutions using contemporary projects which bear in mind changing family structures. At the same time, the contributions provide an in-depth introduction to planning single family houses, from the design of the floor plan to useful tips for the realisation. In addition to this fundamental information, 22 projects are

documented, providing ideas and inspiration for planners, students and clients. The international selection of projects highlights current trends in planning and designing single family housing and reveals the tried and tested basics.

The ‘Arab Spring’ of 2011 has affected the countries of the region to varying degrees, including the Gulf Cooperation Council (GCC) members, comprising Saudi Arabia, Kuwait, Qatar, the United Arab Emirates, Oman and Bahrain. The GCC has become a significant regional bloc playing a vital economic and political role far beyond its shores, given its geopolitical strategic location, a preponderance of global energy reserves and a major international player through the use of accumulated financial reserves. A new Gulf is rising, one that is more self assertive, looking to expand its membership to other Arab countries such as Jordan and Morocco, while at the same time strengthening the bloc’s relationship with current and emerging trading and strategic partners in Europe, USA and Asia. Regional and international realities, especially the uncertainties unleashed by the ‘Arab Spring’, are forcing Gulf leadership to initiate new policies involving closer cooperation amongst GCC countries to address emerging challenges. This volume brings together thirty renowned academics and specialists to examine a range of multifaceted social, political and economic issues facing the GCC in key areas such as: Diversification from a high dependency on a narrow hydrocarbon base · Social transformation, youth employment and effective gender participation · Outward and inward foreign direct investment flows · Prospects for education reforms and e-learning. · Sustainable security in oil, renewable energy (including nuclear) and food · Corporate governance, transparency and enhancing the private sector’s operating environment · The role and governance of Gulf Sovereign Wealth Funds in investing their surpluses. The volume also offers insights for challenges facing the GCC in monetary union, expanding the regional debt market and Sukuk issuance, GCC intellectual property rights application, detailed assessments of individual GCC country risk analysis, as well as the sustainability of long term government fiscal stimulus programs at the expense of private sector involvement.

This volume of Wagadu: A Journal of Transnational Womens and Gender Studies launches its second printed edition. Wagaduthe Soninke name of the Ghana Empirecontrolled the present-day Mali, Mauritania and Senegal and was famous for its prosperity and power from approximately 300-1076 CE. It constituted the bridge between North Africa, the Mediterranean and Middle Eastern worlds and Sub-Saharan Africa. Ghana gave birth to the two most powerful West African Empires: Mali and Songhay. The modern country of Ghana (former British Gold Coast) derives its name from the Ghana Empire. Why Wagadu? Wagadu has come to be the symbol of the sacrifice women continue to make for a better world. Wagadu has become the metaphor for the role of women in the family, community, country, and planet. Duna taka siro no yagare npale The world does not go without women. This volume investigates the intersecting perspectives, grounded in or emanating from theoretical, discursive as well as experiential frameworks and positions specific to gender, disability and postcoloniality.

Building on the success of the author’s previous book Beyond the J Curve:Managing a Portfolio of Venture Capital and Private Equity Funds, this work covers new and additional material and offers advanced guidance on the practical questions faced by institutions when setting up and managing a successful private equity investment programme. Written from the practitioner’s viewpoint, the book offers private equity and venture capital professionals an advanced guide that will make high return targets more realistic and sustainable. Factors that can sometimes cause institutions to shy away from venture capital are the industry’s opaque track record, unclear valuations and risks, perceived lack of transparency as well as the significant entry barriers to overcome before tangible results show. These issues are all addressed in details with practical solutions to the problems. Among other topics J-Curve Exposure includes discussions of: Experiences with the adoption of the International Private Equity and Venture Capital Valuation Guidelines to address fair value under IFRS. Approaches for splitting and prioritizing distributions from private equity funds. Techniques for track record analysis and other tools to help limited partners in their due diligence. Approaches to dealing with uncertainty, the relevance of real options, and co-investments and side funds as advanced portfolio management techniques. Questions related to limited partner decision making fallacies and how to manage portfolios of VC funds. Securitization backed by portfolios of investments in private equity funds. Real life case studies illustrate the issues relevant for the practitioner.

Children's books from 0 to 3

This edited volume constitutes the first serious, sustained examination of the study of children's books for children aged from 0 to 3 with contributions by scholars working in different domains and attempting to assess the recognition of the role and influence of children's literature on the cognitive, linguistic, psychological and aesthetic development of young children. This collection achieves a balance between theoretical, empirical, historical and cross-cultural approaches by examining the broad range of children's books for children under three years of age, ranging from early-concept books through wimmelbooks and ABC books for small children to picture books that support the young child's acquisition of behavioral norms. Most importantly, the chapters proffer new insights into the strong relationship between children's books for young children and emergent literacy, drawing on current research in children's literature research, visual literacy, cognitive psychology, language acquisition, picture theory and pedagogy.

This volume examines how and to what extent security officers make use of legal tools. The work identifies these tools and draws on two case-study sites to illustrate how security officers make use of them as well as how they fit in broader security systems to secure compliance. The study also examines the occupational culture of security officers and links them into the broader systems of security that operate to police nodes of governance. The book provides insights for researchers and policy-makers seeking to develop policy for the expanding private security industry.

Quick and Popular Reads for Teens

How can cradling, handling, or rubbing a text be said, ethically, to have made something happen? What, as readers or interpreters, may come off in our hands in as we maculate or mark the books we read? For Adam Zachary Newton, reading is anembodied practice wherein “ethics” becomes a matter of tact—in the doubled sense of touch and regard. With the image of the book lying in the hands of its readers as insistent refrain, To Make the Hands Impure cuts a provocative cross-disciplinary swath through classical Jewish texts, modern Jewish philosophy, film and performance, literature, translation, and the material text. Newton explores the ethics of reading through a range of texts, from the Talmud and Midrash to Corrad ’s Nostromo and Pascal ’s La Mémorial, from works by Henry Darger and Martin Scorsese to the National September 11 Memorial and a synagogue in Havana, Cuba. In separate chapters, he conducts masterly treatments of Emmanuel Levinas, Mikhail Bakhtin, and Stanley Cavell by emphasizing their performances as readers—a trebled orientation to Talmud, novel, and theater/film. To Make the Hands Impure stages the encounter of literary experience and scriptural traditions—the difficult and the holy—through an ambitious, singular, and innovative approach marked in equal measure by erudition and imaginative daring.
