Horror films divide opinion. It wasn't until 1973 that a horror film (The Exorcist) was nominated for an Oscar for Best Picture and many respected critics still regard it with amused condescension. The public's view is also sharply divided. Some cinema goers revel in the thought of being made very, very afraid, while some just don't like horror films because they don't want to be frightened. This guide, which is for both the fan and the more faint-hearted, steers an illuminating path through a genre that has, since the early days of cinema, split off into many sub-divisions - folk horror, slasher movies, Hammer, sci-fi horror, psychological thrillers, zombie movies, among others. Times change but movie-makers can always find a way to tap into what we fear and dread, whether it's blood-sucking vampires or radioactive mutations, evil children or the living dead. This book also gives concise biographies of the many actors and directors who saw their careers – for better or worse – defined by their association with horror movies, and who created a genre that is instantly recognisable in all its forms and continues to find new and ingenious ways of scaring us in the dark.

Early Readers are stepping stones from picture books to reading books. A blue Early Reader is perfect for sharing and reading together. A red Early Reader is the next step on your reading journey. Henry's class are on a spooky school trip to the local museum, but could there be a terrifying zombie vampire on the loose? It: Chapter Two-now a major motion picture! Stephen King's terrifying, classic #1 New York Times bestseller, "a landmark in American literature" (Chicago Sun-Times)-about seven adults who return to their hometown to confront a nightmare they had first stumbled on as teenagers-an evil without a name: It. Welcome to Derry, Maine. It's a small city, a place as hauntingly familiar as your own hometown. Only in Derry the haunting is real. They were seven teenagers when they first stumbled upon the horror. Now they are grown-up men and women who have gone out into the big world to gain success and happiness. But the promise they made twenty-eight years ago calls them reunite in the same place where, as teenagers, they battled an evil creature that preyed on the city's children. Now, children are being murdered again and their repressed memories of that terrifying summer return as they prepare to once again battle the monster lurking in Derry's sewers. Readers of Stephen King know that Derry, Maine, is a place with a deep, dark hold on the author. It reappears in all of his books, including Bag of Bones, Hearts in Atlantis, and 11/22/63. But it all starts with It. "Stephen King's most mature work" (St. Petersburg Times), "It will overwhelm you-to be read in a well-lit room only" (Los Angeles Times)..

From the author of How We Die, the extraordinary story of the development of modern medicine, told through the lives of the physician-scientists who paved the way. How does medical science advance? Popular historians would have us believe that a few heroic individuals, possessing superhuman talents, lead an unselfish quest to better the human condition. But as renowned Yale surgeon and medical historian Sherwin B. Nuland shows in this brilliant collection of linked life portraits, the theory bears little resemblance to the truth. Through the centuries, the men and women who have shaped the world of medicine have been not only very human, but also very much the products of their own times and places. Presenting compelling studies of great medical innovators and pioneers, Doctors gives us a fascinating history of modern medicine. Ranging from the legendary Father of Medicine, Hippocrates, to Andreas Vesalius, whose Renaissance masterpiece on anatomy offered invaluable new insight into the human body, to Helen Taussig, founder of pediatric cardiology and co-inventor of the original "blue baby" operation, here is a volume filled with the spirit of ideas and the thrill of discovery.
