

## Horse Anatomy (Dover Nature Coloring Book)

***What are the silliest things that YOUR horse does? Does your horse hang his tail over the stall gate to poop in aisle? Does he dip his hay in his water bucket and sploosh it all over? Does he open his stall and then set his pals loose, too? All those who ride and keep horses have tons of great stories of the hilarious habits of our horses. This book is dedicated to that fact: HORSES ARE SILLY! (Which only makes us love them all the more!) In this coloring book, equestrian sports artist Ellen Sallas drew the funniest quirks collected from her horse friends and then provided a quote from the horse owners to match. I wonder if you'll find your silly horse among them! 30 hand-drawn original art coloring pages plus bonus horse art at the end from Ms. Sallas's other Equestrian Coloring Books. Be sure to click the author's profile to see all 14 (and counting) horse coloring books drawn ESPECIALLY FOR EQUESTRIANS. No matter what discipline you ride, you will see the difference in the artwork when it comes from a fellow rider! GRAB***

***A COPY for yourself or a riding friend, & let's color & giggle!***

***Forty-six accurate, authentic renderings of fighters, bombers, transports, etc.***

***Includes "Enola Gay," Japanese Zero, British Spitfire, German Komet jet fighter, many others. Captions include detailed coloring information, military role and affiliation of plane,***

***manufacturer, other data. All illustrations copyright-free. 13 planes in color on covers. Publisher's Note.***

***Thirty detailed illustrations portray giant squid, great white shark, double-crested crocodile, other real animals, as well as such fanciful beasts as the tusked pig whale, Bardfysse, and Loch Ness monster.***

***Former Disney animator offers expert advice on drawing animals both realistically and as caricatures. Use of line, brush technique, establishing mood, conveying action, much more.***

***Construction drawings reveal development process in creating animal figures. Many chapters on drawing individual animal forms — dogs, cats, horses, deer, cows, foxes, kangaroos. 53 halftones, 706 line illustrations.***

Covering every horsey topic children could possibly want to explore - from discovering the different horse and pony breeds, to understanding how different cultures live with horses, and finding out exactly how horse-lovers ride these magnificent animals - DK's Horses & Ponies is the first-stop for all equine knowledge. With the help of this photographic guide, any horse-lover can become a genius in identifying the many different horse and pony breeds. They will find out about all the useful ways horses are a part of our lives across different cultures, from transportation to sports to ceremonies, and even their role in police work. This book will answer all those questions that may be burning in the minds of horse-mad kids, including: What's the difference between horses and ponies? Along the way, young readers will learn how to take care of their equine friends.

Detailed and accurate black-and-white line drawings depict the lush beauties of 37 botanical gardens throughout the United States and Canada. Educational fun for nature lovers of all ages. Captions.

In today's world, there are few animals that weigh in at a ton or more. But millions of years ago, massive creatures roamed the earth. This fascinating and educational coloring book focuses on the bigger, taller, and heavier mega dinosaurs that scientists are constantly bringing to light. Along with recently discovered species, it features old favorites like the mighty Tyrannosaurus rex. Each of the 44 illustrations includes descriptive captions plus a small silhouetted image of the dinosaur that compares its size to that of a human being.

My First Book about the Brain

**Including the red-winged blackbird, painted bunting, wood duck, great blue heron, ruby-throated hummingbird, purple finch, and blue jay, 46 different species of birds from all parts of the United States are included in this book. The pictures have been faithfully redrawn by Paul E. Kennedy from originals by John James Audubon (1785-1851), the most famous American painter-naturalist. For each species, the caption supplies the modern common and scientific names and the current range (by general region). No distinction is made between breeding range and winter range. Only the area of the United States, exclusive of Alaska and Hawaii, is considered. The birds shown are usually adult males when the caption does not give the information on age and sex. Audubon's original plates, numbered to correspond to the pages of the book, have been reproduced in color on the covers. If you follow them, you will not only have a great deal of coloring pleasure, but you will also learn how to identify many important birds.**
