With vivid colours and energetic kid-friendly animal illustrations, this concept book doubles up the learning opportunities by including numbers and descriptive words matched to Dutch artist Mies van Hout's striking art. Little ones can count the fish's stripes and the monkey's fingers, or learn the letters in words such as whiskers, wings, and ears. Rendered in bold hues that appeal to babies and pre-schoolers alike, this sturdy counting book will be a reading-time favourite.

**How Many Kisses?** begins by inviting the reader to give one kiss to the cat, two kisses to the dogs, three kisses to the flowers and so on, following a classic counting technique until readers reach the number ten. The book then takes wild jumps up to seventeen, sixty-four, 823, and finally 'millions', prompting a riotous explosion of kisses from the reader. By encouraging the child to interact physically with the book, each reading becomes like a game that celebrates all the things in a child's life that they love, while familiarizing them with numbers and counting. The unique twist in the counting narrative gives physical expression to numbers too large for younger children to quantify, while inspiring an enjoyment of counting.

Describes a variety of hugs, including people hugs, blanket hugs, and birthday hugs, and presents facts and hints about hugs.
