Criminal Law Revision Pack 2018

*Whether or not wrongdoers show remorse and how they show remorse are matters that attract great interest both in law and in popular culture. In capital trials in the United States, it can be a question of life or death whether a jury*

*believes that a wrongdoer showed remorse. And in wrongdoings that capture the popular imagination, public attention focuses not only on the act but on whether the perpetrator feels remorse for what they did. But who decides when remorse should be shown or not shown and whether it is genuine or not genuine? In contrast to previous academic studies on the subject, the primary focus of this work is not on whether the wrongdoer meets these expectations over how and when remorse should be shown but on how the community reacts when these expectations are met or not met. Using examples drawn from Canada, the United States, and South Africa, the author demonstrates that the showing of remorse is a site of negotiation and contention between groups who differ about when it is to be expressed and how it is to be expressed. The book illustrates these points by looking at cases about which there was conflict over whether the wrongdoer should show remorse or whether the feelings that were shown were sincere. Building on the earlier analysis, the author shows that the process of deciding when*

*and how remorse should be expressed contributes to the moral ordering of society as a whole. This book will be of interest to those in the fields of sociology, law, law and society, and criminology.*

*Foundational Principles of Contract Law not only sets out the principles and rules of contract law, it places more emphasis on what the principles and rules of contract law should be, based on policy, morality, and experience. A major premise of the book is that the best way to grasp contract law is to understand it from a critical perspective as an organic, dynamic subject. When contract law is approached in this way it is much easier to grasp and learn than when it is presented simply as a static collection of principles and rules. Professor Eisenberg covers almost all areas of contract law, including the enforceability of promises, remedies for breach of contract, problems of assent, form contracts, the effect of mistake and changed circumstances, interpretation, and problems of performance. Although the emphasis of the book is on the principles and*

**In the US, one out of every 138 residents is incarcerated. The size of the prison population has quadrupled since 1980. Approximately 2.4% of Americans are either on probation and parole. The US has the highest rate of criminal punishment in the Western world. The problem with American criminal law, as the philosopher of law Douglas Husak and many others see it, is that there is simply too much of it. Recent years have seen a dramatic expansion in the amount of criminal statutes, and in the resulting reliance on punishment for convictions under those laws. Husak argues that this is regrettable for several reasons,**

**but most importantly, he says that much of the resulting punishment is unjust, excessive, and disproportionate. He also claims that it is destructive to the rule of law and undermines the principle of legality. What should be done? Husak's goal in this book is formulate a normative theory of criminalization that will allow us to distinguish which criminal laws are justified, and which are not--something he sees this as essential in order to reverse the trend towards too many criminal laws. The first part of his book makes the case that there is both too much criminal law and too much punishment, and clarifies the relationship between the two using empirical data. He then provides examples of dubious criminal laws enacted by legislatures, in particular statutes on drugs possession and guns. The latter part of the book develops his theory, which establishes principles that should set limits (both external and internal to the criminal law) on what we can and should criminalize.**

This book provides an accessible and systematic restatement of the desert model for criminal sentencing by one of its leading academic exponents. The desert model emphasises the degree of seriousness of the offender's crime in deciding the severity of his punishment, and has become increasingly influential in recent penal practice and scholarly debate. It explains why sentences should be based principally on crime-seriousness, and addresses, among other topics, how a desert-based penalty scheme

can be constructed; how to gauge punishments' seriousness and penalties' severity; what weight should be given to an offender's previous convictions; how non-custodial sentences should be scaled; and what leeway there might be for taking other factors into account, such as an offender's need for treatment. The volume will be of interest to all those working in penal theory and practice, criminal sentencing and the criminal law more generally.

**Law students often find criminal law to be one of the most interesting, but**

**also one of the most difficult courses. Even the fundamental elements of criminal liability can be hard to learn and even harder to apply on exams. The study of criminal law demands that students juggle a mix of common law principles, modern judicial decisions, statutory text, the Model Penal Code, and philosophies of justice to address the enduring dilemmas that comprise criminal law. In *Criminal Law: Model Problems and Outstanding Answers*, Kathryn Christopher and Russell Christopher deftly guide students in applying criminal law. Their interesting and accessible fact patterns explore important principles surrounding homicide and rape, attempt and conspiracy, accomplice liability and defenses, and devote special attention to difficult doctrines like impossible attempt and felony murder. This book includes clear introductions to the major topics in criminal law, provides hypotheticals that students can expect to see on exams, and offers model answers to those hypotheticals. It then gives students the opportunity to evaluate their own work with a comprehensive self-analysis section. This book prepares students by challenging them to use the law they learn in class while also explaining the best way to express sophisticated answers on their exams. *Model Problems and Outstanding Answers* is an innovative new series by Oxford University**

*This handbook explores criminal law systems from around the world, with the express aim of stimulating comparison and discussion. General principles of criminal liability receive prominent coverage in each essay—including discussions of rationales for punishment, the role and design of criminal codes, the general structure of criminal liability, accounts of mens rea, and the rights that criminal law is designed to protect—before the authors turn to more specific offenses like homicide, theft, sexual offenses, victimless crimes, and terrorism. This key reference covers all of the world's major legal systems—common, civil, Asian, and Islamic law traditions—with essays on sixteen countries on six different continents. The introduction places each country within traditional distinctions among legal systems and explores noteworthy similarities and differences among the countries covered, providing an ideal entry into the fascinating range of criminal law systems in use the world over.*

*'EU Law' covers both the institutions of the EU and the substantive law they produce. The new constitution is introduced, its aims and the reasons for its negotiation.*

*Two centuries ago, American criminal justice was run primarily by laymen. Jury trials passed moral judgment on crimes, vindicated victims and innocent defendants, and denounced the guilty. But since then, lawyers have gradually taken over the process, silencing victims and defendants and, in many cases, substituting plea bargaining for the voice of the jury. The public sees little of how this assembly-line justice works, and victims and defendants have largely lost their day in court. As a result, victims rarely hear defendants express remorse and apologize, and defendants rarely receive forgiveness. This lawyerized machinery has purchased efficient, speedy processing of many cases at the price of sacrificing softer values, such as reforming defendants and healing wounded victims and relationships. In other words, the U.S. legal system has bought quantity at the price of quality, without recognizing either the trade-off or the great gulf separating lawyers' and laymen's incentives, values, and powers. In *The Machinery of Criminal Justice*, author Stephanos Bibas surveys the developments over*

Ideas range from requiring convicts to work or serve in the military, to moving power from prosecutors to restorative sentencing juries. Bibas argues that doing so might cost more, but it would better serve criminal procedure's interests in denouncing crime, vindicating victims, reforming wrongdoers, and healing the relationships torn by crime.*
