

## Le Politiche Dell'Unione Europea

***The book examines the economic crisis in the European Union and its consequences for European integration and the member states. Discussing the provisions introduced by the Treaty of Lisbon, from the effects of macroeconomic monitoring to the restraints produced by the Fiscal Compact, it offers an analysis of the European Union's current situation and the effects of the measures adopted to manage the crisis, also making reference to how Europe is perceived by its citizens. Moreover, the chapters offer thoughts on the European integration process, in particular the effects that the policies adopted to tackle the crisis have had on the economic and financial sovereignty of the member states. This detailed examination of the situation of the EU between the Treaty of Lisbon and the Fiscal Compact is characterized by an original multidisciplinary approach that offers an articulate reflection on the criticalities that affect the actions of both European and national institutions.***

**The concept of university language centres has changed in recent decades. Initially conceived as laboratories for practical and autonomous language-learning, they are now considered as places with more specific and complex functions in language teaching and learning. University language centres now constitute networks for exchanging knowledge and know-how in order to respond to ever-changing, multilingual and multicultural contexts. At the same time, the availability and acquisition of new technologies is contributing to the creation of new tools for the provision of appropriate services and training. This collection covers a wide range of topics related to the activities, experiences and applied research carried out in Italian university language centres. It provides further evidence of the important role university language centres play in**

***promoting language expertise, developing tools and adopting digital resources, and providing support and training for language teaching. Technology, creativity, methodologies and plurilingualism are key topics in the book as they constitute the essential ingredients for effective and successful language teaching and learning. The volume's thirty-three chapters provide multi-perspective approaches, showing how the real contexts of current language education need the integration of theoretical backgrounds with the best practices resulting from practical experience.***

This publication examines the Amsterdam Treaty negotiated by the Intergovernmental Conference (IGC) 1996–97. It looks at the preferences of the main actors, the Member States, the Commission and the European Parliament, as well as the

negotiation process that produced the Treaty. The book includes chapters on each of the main actors as well as the most important substantive issues: the changes in the Union's first pillar, mainly in respect to environment and employment policies, changes in the second pillar, the Common Foreign and Security Policy (CFSP), the creation of a new Area of Freedom, Security and Justice (AFSJ) as well as the introduction of new provisions on 'closer co-operation' or flexibility. Concluding chapters seek to confront the Treaty reform process with leading integration theories. The Commentary on the Treaty on the Functioning of the European Union (four volumes) is a major European project that aims to contribute to the development of ever closer conceptual and dogmatic standpoints with regard to the creation of "Europeanised research on Union law". Following on from the Commentary on the Treaty of the European Union, this book presents detailed explanations, article by article, of all the provisions of the TFEU, discussing the application of Union law in the national legal orders and

its interpretation by the Court of Justice of the EU. The authors are academics and practitioners from twenty-eight European states and different legal fields, some from a constitutional law background, others experts in the field of international law and EU law. Reflecting the various approaches to European legal culture, this book promotes a system concept of European Union law toward more unity notwithstanding its rich diversity grounded in national traditions.

Drawing on new research material from ten European countries, *Asylum Determination in Europe: Ethnographic Perspectives* brings together a range of detailed accounts of the legal and bureaucratic processes by which asylum claims are decided. The book includes a legal overview of European asylum determination procedures, followed by sections on the diverse actors involved, the means by which they communicate, and the ways in which they make life and death decisions on a daily basis. It offers a contextually rich account that moves beyond doctrinal law to uncover the gaps

and variances between formal policy and legislation, and law as actually practiced. The contributors employ a variety of disciplinary perspectives – sociological, anthropological, geographical and linguistic – but are united in their use of an ethnographic methodological approach. Through this lens, the book captures the confusion, improvisation, inconsistency, complexity and emotional turmoil inherent to the process of claiming asylum in Europe.

The book focusses on the enforcement of consumer law in order to identify commonalities and best practices across nations. It is composed of twenty-eight contributions from national rapporteurs to the IACL Congress in Montevideo in 2016 and the introductory comparative general report. The national contributors

are drawn from across the globe, with representation from Africa (1), Asia (5), Europe (15), Oceania (2) and the Americas (5). The general report proposes a general introduction to the question of enforcement and effectiveness of consumer law. It then proceeds to identify the variety of ways in which national legislatures approach this question and the diversity of mechanisms put in place to address it. The general report uses examples drawn from the reports to illustrate common approaches and to identify more original or distinct unique approaches, taking into account the reported strengths and weaknesses of each. The general report consistently points readers to particular national reports on specific issues, inviting readers to consult these individual contributions for more details. The national contributions deal with the following areas: the national legal framework for consumer protection, the general design of the enforcement mechanism, the number and characteristics of consumer complaints and disputes, the use of courts and specialized agencies for the enforcement of consumer law, the role of consumer organizations and of private regulation in the enforcement of consumer law, the place of collective redress mechanism and of alternative dispute resolution modes, the sanctions for breaches of consumer law and the nature of external relations or cooperation with other countries or international organizations. These enriching national and international

perspectives offer a comprehensive overview of the current state of consumer law around the globe.

The EU and the roles of member states is one of the major topics of political debate and academic discourse. The evolution of the political system in Brussels and the developments within the individual member states promise new insights into the European integration process. This book provides a country-by-country analysis of how European policy is made and applied in the member states. Its central focus is the involvement of national institutions in European policy-making: governments, parliaments, sub-national governments, the courts, and public administrations. Refuge in a Moving World draws together more than thirty contributions from multiple disciplines and fields of research and practice to discuss different ways

of engaging with, and responding to, migration and displacement. The volume combines critical reflections on the complexities of conceptualizing processes and experiences of (forced) migration, with detailed analyses of these experiences in contemporary and historical settings from around the world. Through interdisciplinary approaches and methodologies - including participatory research, poetic and spatial interventions, ethnography, theatre, discourse analysis and visual methods - the volume documents the complexities of refugees' and migrants' journeys. This includes a particular focus on how people inhabit and negotiate everyday life in cities, towns, camps and informal settlements across the Middle East and North Africa, Southern and Eastern Africa, and Europe.

Il Dizionario storico dell'integrazione europea (Dizie) è diviso in tre sezioni: la prima riguarda gli Stati membri dell'Unione europea, i paesi candidati all'adesione e quelli che hanno deciso di lasciare l'Unione; la seconda contiene un'ampia rassegna delle figure storiche e dei personaggi più rilevanti del processo di integrazione europea e della più recente vita politica dell'Unione europea; la terza infine riguarda le istituzioni, le normative e le politiche comunitarie Paesi La prima sezione contiene le voci che si riferiscono ai singoli paesi, volte a ripercorrere gli snodi fondamentali dell'iter di integrazione seguito da ciascuno di essi. Particolare attenzione è dedicata alla storia e ai dibattiti avvenuti in seno ai vari paesi, così come alle loro posizioni rispetto alle prospettive di allargamento e di integrazione.

Personaggi La seconda sezione riguarda le biografie dei principali attori politici e diplomatici. Oltre alle vicende politiche e istituzionali dei padri fondatori delle Comunità europea, particolare attenzione è dedicata alle biografie di quei diplomatici, funzionari comunitari, uomini politici, intellettuali e

pubblicisti, la cui storia personale si è variamente intrecciata con il processo di integrazione. Istituzioni, normative e politiche europee Nella terza sezione sono analizzati il funzionamento delle istituzioni, le normative e politiche comunitarie. Nelle voci ivi contenute, si ripercorrono i passaggi chiave che dai progetti di cooperazione internazionale hanno portato alla firma dei primi trattati e alle prime convenzioni. L'attenzione è rivolta quindi ai progetti di creazione di un'Assemblea costituente europea, alla nascita del Consiglio d'Europa e agli avvenimenti che hanno spinto gli Stati europei coinvolti a trasferire poteri e competenze a organismi sovranazionali. La nascita della Comunità europea del carbone e dell'acciaio (CECA), il fallimento della Comunità europea di difesa (CED), i trattati della Comunità economica europea (CEE) e della Comunità europea dell'energia atomica (CEEA o EURATOM) costituiscono il filo conduttore della ricostruzione proposta. Essa, inoltre, prenderà in considerazione la fusione degli organi esecutivi di queste istituzioni nonché l'analisi del contesto storico in cui furono presentate le prime domande di adesione che portarono all'ampliamento del gruppo dei fondatori, fino a includere gli odierni candidati. Il significato delle elezioni a suffragio universale diretto del Parlamento europeo, l'entrata in vigore del Sistema monetario europeo (SME), la firma dell'Atto unico europeo (AUE), il trattato di Maastricht, i referendum sulle ratifiche del trattato sull'Unione europea (UE), il trattato di Amsterdam, i vertici di Nizza e Lacken, il trattato di Lisbona sono presentati nell'ambito di un prospetto unitario che permetterà al lettore di cogliere gli elementi di continuità e rottura, i progressi compiuti e le battute d'arresto nel lungo percorso della costruzione dell'Europa unita.

Based on an analytical evaluation of both the weaknesses and strengths of the Italian political system, Italy in the European Union is the first book to offer a detailed and comprehensive description of Italy's contribution to European Union policy-making. The contributors to this volume systematically explore

the role played by Italian institutional and noninstitutional actors in several decision-making processes. They show how Italian institutional actors define and promote national policy preferences that are compatible with those of the other European member states. However, the book functions on two levels: it is both a nuanced picture of Italy's role in the EU and a study of the EU as it has been transformed by subsequent waves of enlargement. In a compound polity of twenty-seven member states the formation of stable hegemonic coalitions is implausible—the concept of national interest, which still informs much of the literature on the EU, is logically and empirically unusable in many EU policy realms. Combining empirical investigation and theoretical analysis, this book is indispensable for scholars, students, and practitioners who study or observe Italian politics. It is also necessary for those who want to understand the transformation of European politics and the European Union's increasing development as a compound polity. Contributions by: Marco Brunazzo, Maurizio Carbone, Sabrina Cavatorto, Vincent Della Sala, Alessia Donà, Sergio Fabbrini, Paolo Foradori, Giorgio Giraudi, Renata Lizzi, Simona Piattoni, Paolo Rosa, Stefano Sacchi, Alberta M. Sbragia, Daniela Sicurelli, and Luca Verzichelli Focusing on the multi-faceted topic of Eurolects, this volume brings together knowledge and methodologies from various disciplines, including sociolinguistics, legal linguistics, corpus linguistics, and translation studies. The legislative varieties of eleven EU official and working languages (Dutch, English, Finnish, French, German, Greek, Italian, Latvian, Maltese, Polish, Spanish) are analyzed using corpus methodologies in order to investigate the variational dynamics and translation-induced patterns of the different languages. The underlying assumption is that, within the sociolinguistic continua of the EU languages, it is possible to single out specific legislative varieties (Eurolects) that originate at a supranational level. This research hypothesis is strongly supported by the empirical findings derived from detailed corpus analyses of each language. This work represents the first systematic and comprehensive

linguistic research conducted on a wide range of EU languages using the same protocol and applying corpus methodologies to the extensive Eurolect Observatory Multilingual Corpus.

**This book presents the results of extensive international comparative research into the effects of the economic and financial crisis on democratic institutions and social cohesion policies. The collected studies describe and analyse the measures (often referred to as "reforms") adopted to counter the crisis and the effects of these measures. It investigates three areas: the impact on the functioning of institutions, with respect to the relationship between representative institutions and governments, and the organisational structure of administrations at national and local levels; the impact that the austerity policies on public spending have on social rights; and the impact on traditional instruments of public action (administrative simplification, public services delivering, the use of common assets). The general findings highlight the effect of reducing the administrative and government capacity of the democratic institutions: the public sector, rather than being innovative and made more effective, declines, offering increasingly poor public services and making bad decisions, fuelling substantive or formal**

**The major Commentary on the Treaty on European Union (TEU) is a European project that aims to contribute to the development of ever closer conceptual and dogmatic standpoints with regard to the creation of a “Europeanised research on Union law”. This publication in English contains detailed explanations, article by article, on all the provisions of the TEU as well as on several Protocols and Declarations, including the Protocols No 1, 2 and 30 and Declaration No 17, having steady regard to the application of Union law in the national legal orders and its interpretation by the Court of Justice of the EU. The authors of the Commentary are academics from ten European states and different legal fields, some from a constitutional law background, others experts in the field of international law and EU law professionals. This should lead to more unity in European law notwithstanding all the legitimate diversity. The different traditions of constitutional law are reflected and mentioned by name thus striving for a common framework for European constitutional law.**

**The purpose of this book is to showcase a diverse set of directions in empirical research on mediated discourse, reflecting on the state-of-the-art and the increasing intersection between Corpus-based Interpreting Studies (CBIS) and Corpus-based Translation Studies (CBTS). Undeniably, data from the European Parliament (EP) offer a great opportunity for such research. Not only does the institution provide a sizeable sample of oral debates held at the EP together with their simultaneous interpretations into all languages of the European Union. It**

**also makes available written verbatim reports of the original speeches, which used to be translated. From a methodological perspective, EP materials thus guarantee a great degree of homogeneity, which is particularly valuable in corpus studies, where data comparability is frequently a challenge. In this volume, progress is visible in both CBIS and CBTS. In interpreting, it manifests itself notably in the availability of comprehensive transcription, annotation and alignment systems. In translation, datasets are becoming substantially richer in metadata, which allow for increasingly refined multi-factorial analysis. At the crossroads between the two fields, intermodal investigations bring to the fore what these mediation modes have in common and how they differ. The volume is thus aimed in particular at Interpreting and Translation scholars looking for new descriptive insights and methodological approaches in the investigation of mediated discourse, but it may be also of interest for (corpus) linguists analysing parliamentary discourse in general.**

Activism and the role everyday people play in making a change in society are

increasingly popular topics in the world right now, especially as younger generations begin to speak out. From traditional protests to activities on college campuses, to the use of social media, more individuals are finding accessible platforms with which to share their views and become more actively involved in politics and social welfare. With the emergence of new technologies and a spotlight on important social issues, people are able to become more involved in society than ever before as they fight for what they believe. It is essential to consider the recent trends, technologies, and movements in order to understand where society is headed in the future. The Research Anthology on Citizen Engagement and Activism for Social Change examines a plethora of innovative research surrounding social change and the various ways citizens are involved in shaping society. Covering topics such as accountability, social media, voter turnout, and leadership, it is an ideal work for activists, sociologists, social workers, politicians, public administrators, sociologists, journalists, policymakers, social media analysts, government administrators, academicians, researchers, practitioners, and students.

This collection provides a balanced evaluation of multi-level governance. Written by international experts of policy-making in the European Union, each contribution builds on common conceptual definitions, critically debating their adaptation to policy-specific contexts and investigating their usefulness for conducting empirical research. This engaging text uses case studies to identify the specific changes that have occurred in power relations across different levels of the EU system. With varying emphasis on state and non-state actors, on country comparisons and international processes, the reader is invited to join a fruitful dialogue among the contributors about the symbiotic relationship of multi-level analysis with other conceptual innovations such as transnational regulation, network formation or market internationalization. This book confronts sophisticated theoretical reasoning with the actual realities of policy-making and is therefore essential reading for all those interested in the risks and opportunities of a comparative-interdisciplinary approach to European governance.

This book deals with the issue of Digital Participatory Platforms (DPPs) for urban governance. It explains the role and potential that ICTs play in the decision-making processes of the Public Administration and citizens' participation. The book also illustrates the main technologies that encourage innovation and social inclusion, with particular focus on use of DPPs in urban regeneration programs and projects. It presents international best practices from local to European level and it describes the process of creation, development and testing of a DPP project with reference to the Italian case. The book is divided into three parts: the first one gives a framework of neighborhood urban and civic engagement through ICTs, studying in depth the role of ICTs in support of Public Administration ' s processes and citizens participation; the second part investigates the topic of Digital Participatory Platforms (DPPs) with the description of their potentialities, the presentation of some international best practices and a specific focus on the Italian context; the third part draws the conclusions of this path by asking which are the main challenges in the adoption of Digital Participatory Platforms, in order to increase citizen participation and collaboration via technology.

Le Regioni e gli Enti locali sono da tempo una componente naturale del panorama sociale europeo. Il nostro continente, infatti, molto più di quanto si possa dire per altre aree geografiche, presenta una forte connotazione territoriale, e questo in termini: sociali, culturali, etnici, economici ed anche politici. Questa ultima componente è stata, ed in parte lo è ancora, alla base di una forte conflittualità interna rinvenibile in molti Stati del vecchio continente. L' Unione europea si è inserita in questo delicato confronto svolgendo un ruolo duplice ed apparentemente contraddittorio. Da una parte, ha rafforzato le identità

regionali e dall' altra, ne ha “ irreggimentato ” le dinamiche. Il risultato, raggiunto da ultimo con l' entrata in vigore del Trattato di Lisbona del 2009, è un' ulteriore emersione della componente territoriale nel percorso unionista, alla quale ha corrisposto un conseguente consolidamento anche sul piano interno. Il volume “ L' attuazione delle politiche dell' Unione europea a livello regionale e locale ” indaga alcuni aspetti di questo interessante processo, che non sembra aver esaurito la sua spinta propulsiva. I contributi presentati dimostrano come gli enti territoriali, oltre a proporsi quali attori – se non protagonisti, sicuramente non più semplici comparse – della Governance multilivello europea, svolgono compiti che appaiono indispensabili ad assicurare un' effettiva realizzazione degli obiettivi che le istituzioni europee puntano a raggiungere. Come risulta, in particolare, guardando alla politica ambientale ed energetica unionista e alla complessa azione europea volta ad innalzare la qualità della regolamentazione, sia sul piano europeo che su quello interno. Anche nel campo delle politiche a favore dell' occupazione e dello sviluppo economico, l' Unione, pur rimanendo priva di strumenti che le consentano di imporre percorsi comuni, trova nelle Regioni e negli Enti locali dei soggetti particolarmente attenti e ricettivi agli stimoli che provengono dall' Europa. Ambiente ed energia; Better regulation e trasparenza; politiche per l' occupazione, lo sviluppo e l' innovazione corrispondono alle tematiche sulle quali si sono incentrati gli studi e le attività didattiche durante i tre anni della Cattedra Jean Monnet (2017-2020), della quale questa opera costituisce il risultato finale.

This book offers a unique comparative assessment of the evolution of immigration detention systems in European Union member states since the onset of the “ refugee crisis. ” By applying an analytical framework premised on international human rights law in assessing domestic detention regimes, the book reveals the extent to which EU legislation has led to the adoption of laws and practices that may disregard fundamental rights and standards. While emphasizing policies and laws adopted in response to the “ refugee

crisis,” the volume also shows how these policies have evolved—and in many cases grown more restrictive—even as the “crisis” has begun to recede from the borders of many European countries. To sharpen awareness of contrasting developments across the region, the book’s country chapters are organised into geographic sections that reveal how variations in migration pressures have in some cases resulted in contrasting detention practices even as the EU directives have sought to harmonise immigration laws. A critical focus of the book are the evolving domestic norms related to grounds for detention, length of detention, non-custodial “alternatives to detention,” the treatment of children, and conditions of detention. With its systematic and comparative assessment of immigration detention regimes across the EU, the book will be helpful for both academics and practitioners who seek a comprehensive guide to the evolution of one of today’s more important human rights dilemmas—states’ efforts to control global migration.

Le politiche dell'Unione Europea. Ambiente, sviluppo locale e coesione

This handbook offers a comprehensive picture of the European activities of national parliaments in all 28 member states of the European Union. In the aftermath of the Lisbon Treaty, it assesses the extent to which national legislatures actually matter in European governance.

The European Union celebrated its 60th anniversary in 2017, but celebrations were muted by Brexit and the growing sense of a crisis of identity. However, as this seminal

work shows, the history and ambition of the European Union are considerable. Written by key stakeholders who, between them, acted as architects, adjudicators and arbitrators of the project, it presents the definitive history of the first two generations of the European Union. This book revisits the birth and consolidation of the great project of a united Europe and the political, institutional, judicial and economical frameworks of the European Union: from the process towards integration, to the advancements and the impasses in building a political union.

A cinquant'anni dalla firma dei Trattati di Roma, l'Unione Europea ha contribuito a creare uno spazio di sicurezza e stabilità, realizzando così l'obiettivo primario di pace e sviluppo perseguito dai sei Stati fondatori. Gli Stati membri sono ora ventisette e, attraverso l'allargamento a Est, le istituzioni comunitarie hanno ricomposto le profonde fratture prodotte dalla Guerra fredda. Negli stessi anni in cui si faceva carico dell'unificazione, l'Unione Europea si trovava impreparata di fronte a vecchie e nuove minacce: le guerre in Jugoslavia e Kosovo, le ripetute crisi in Medio Oriente, fino agli attentati terroristici a Madrid e Londra. Di fronte a sfide così vicine e urgenti, quali sono le potenzialità dell'Unione come security provider? Come superare i limiti di un apparato istituzionale macchinoso e ancora dominato da interessi nazionali contrastanti? E se anche l'Europa diventasse più forte e assertiva, come cambierebbero i suoi rapporti con il resto del mondo? Il volume risponde a queste domande attraverso la descrizione delle politiche finora messe in atto dall'Unione e
