department, although her superiors are unaware that her lover Freysa, is a leader in the Replicant Underground. While investigating a report of a rogue Replicant, Ash discovered that a Nexus 6 Replicant, Yotun, whom she had failed to retire 12 years previously, had somehow become the leader of a Replicant guerrilla army. Yotun ordered his army to launch an all-out terrorist attack upon Los Angeles and compelled all Replicants in the city to revolt against their masters. Freysa seemingly joined Yotun's crusade in an effort to stop him, however, he blinded her in one eye when he discovered her subterfuge. Ash rescued her lover and set out to bring Yotun down, once and for all. However her superiors have become suspicious of Ash's motives. Meanwhile, Yotun has started to succumb to the ravages of time, and even the regular blood transfusions from his loyal supporters that he was using to rejuvenate himself have started to fail. Convinced that an old diary of Eldon Tyrell holds the key to his survival, Yotun sent Pekka and another Replicant off to retrieve the journal from a maximum security vault. There Pekka was killed by Blade Runner Marlowe

After her brush with death at Ian Crane's compound, Talia Lyons feels like a prisoner, confined in her childhood home. Plagued with seizures- the result of an unidentified drug injected in her neck by Crane's men- Talia must put her dream of becoming a Hunter on hold. So when Agency Director McDonough asks Talia to go undercover at the School for the Talented, to find the spy who set the trap for her in Nevada, Talia jumps at the opportunity. Soon she learns that her new-found freedom comes with a price- working with Donavon on a daily basis. As if that isn't awkward enough, her former teammate, Erik, also shows up at the School. But at least Talia has the unexpected company of her best friend Penny; to not only assist her in uncovering the spy, but also to deal with the complications that the guys create. As Talia becomes more entrenched in her assignment, she quickly learns the lengths that the Agency and Mac will go in the name of war. With Crane's influence spreading, Talia learns that there are few Operatives without ties to the Coalition. HUNT/On a (4 letters) Forced to face hard truths and dangerous conclusions, Talia realizes that it is those closest to her who are hiding the biggest secrets. As the task of finding the traitor becomes more problematic, desperation and frustration rule Talia's world. It becomes clear that Talia can't do this alone. But who can she trust, when everyone around her is lying?

I never thought I'd be singing happy birthday to myself in a dungeon. And yet when a sinfully sexy demon crashes happy hour, that's exactly what happens. He's known as the Lord of Chaos, he's mistaken me for my succubus doppelgänger. Happy birthday to me. When he tastes my blood, he finally understands I'm mortal. And I realize we have something in

common: we both crave revenge. So we make a deal: I can stay in the forbidden city to hunt for my mom's killer. In return, I'll help him get the vengeance he craves. I just have to pose as a sexy succubus. One problem--he's my number one suspect. And that's increasingly hard to remember as he teaches me my role: seduction. With each heated touch I drift further into peril. And if I fall under his seductive spell, death awaits me. "I flew through this book... Hot demon lord-check. Action-check. Romance-check. And there's spice! If you love my books, you definitely want to read this one." -Laura Thalassa

The collection provides insights on developments in post-traditional religiosity (especially 'New Age' and 'Neo-Paganism') through studies of rave's Gnostic narratives of ascensionism and re-enchantment, explorations of the embodied spirituality and millennialist predispositions of dance culture, and investigations of transnational digital-art countercultures manifesting at geographic locations as diverse as Goa, India, and Nevada's Burning Man festival. Contributors examine raving as a new religious or revitalization movement; a powerful locus of sacrifice and transgression; a lived bodily experience; a practice comparable with world entheogenic rituals; and as evidencing a new Orientalism. Rave Culture and Religion will be essential reading for advanced students and academics in the fields of sociology, cultural studies and religious studies. He discusses the reliability of oral evidence in comparison with other sources and considers the social context of its development. He looks at the relationship between memory, the self and identity. He traces oral history through its own past and weighs up the recent achievements of a movement which has become international, with notably strong developments in North America, Europe, Australia, Latin America, South Africa and the Far East, despite resistance

from more conservative academics. This new edition combines the classic text of *The Voice of the Past* with many new sections, including especially the worldwide development of different forms of oral history and the parallel memory boom, as well as discussions of theory in oral history and of memory, trauma and reconciliation.

*Euler's Formula is the most beautiful equation in mathematics. Yet it's much more. It governs the universe and defines the soul! Euler's Formula perfectly complements Leibniz's Monadology. They form the most powerful*

*intellectual combination ever, capable of establishing a true grand unified theory of everything, including religion. It provides a rational explanation of near-death and out-of-body experiences, and homeopathy. It overturns Einstein's principle of relativity, providing the same results via an absolute framework that restores the reality principle. In this groundbreaking book, we provide the solution to the Cartesian mind-body problem via the Fourier transform – which has the Euler Formula as its engine. We present the Riemann sphere, which works in perfect harmony with the Euler Formula, as the ideal working model of the human soul. And we give the first ever technical explanation of the process of reincarnation. The Euler equation is everything you thought – and more. It's divine.*

How does a scientist go about solving problems? How do scientific discoveries happen? Why are cold fusion and parapsychology different from mainstream science? What is a scientific worldview? In this lively and wide-ranging book, Gregory Derry talks about these and other questions as he introduces the reader to the process of scientific thinking. From the discovery of X rays and semiconductors to the argument for continental drift to the invention of the smallpox vaccine, scientific work has proceeded through honest observation, critical reasoning, and sometimes just plain luck. Derry starts out with historical examples, leading readers through the events, experiments, blind alleys, and thoughts of scientists in the midst of discovery and invention. Readers at all levels will come away with an enriched appreciation of how science operates and how it connects with our daily lives. An especially valuable feature of this book is the actual demonstration of scientific reasoning. Derry shows how scientists use a small number of powerful yet simple methods--symmetry, scaling, linearity, and feedback, for example--to construct realistic models that describe a number of diverse real-life problems, such as drug uptake in the body,

the inner workings of atoms, and the laws of heredity. Science involves a particular way of thinking about the world, and Derry shows the reader that a scientific viewpoint can benefit most personal philosophies and fields of study. With an eye to both the power and limits of science, he explores the relationships between science and topics such as religion, ethics, and philosophy. By tackling the subject of science from all angles, including the nuts and bolts of the trade as well as its place in the overall scheme of life, the book provides a perfect place to start thinking like a scientist.

It began with a key. One afternoon in 1956, in the home of the Hitchings family in Battersea, south London, a small silver key appeared on Shirley Hitchings' bed. This seemingly insignificant event heralded the beginning of one of the most terrifying, incredible and mysterious hauntings in British history. The spirit, who quickly became known as 'Donald', began to communicate, initially via tapping sounds, but over time - and with the encouragement of psychical researcher Harold Chibbett, whose case-files appear here - by learning to write. Soon, the spirit had begun to make simply incredible claims about his identity, insisting that he was one of the most famous figures in world history - but what was the truth? Here, for the first time, is the full story, told by the woman right at the heart of it all - Shirley herself.

Pepper was once worth its weight in gold. Onions have been used to cure everything from sore throats to foot fungus. White bread was once considered too nutritious. From hunting water buffalo to farming salmon, *A Movable Feast* chronicles the globalization of food over the past ten thousand years. This engaging history follows the path that food has taken throughout history and the ways in which humans have altered its course. Beginning with the days of hunter-gatherers and extending to the present world of genetically modified chickens, Kenneth F. Kiple details the far-reaching adventure of food. He investigates food's global impact, from the Irish potato famine to the birth of McDonald's. Combining fascinating facts with historical evidence, this is a sweeping narrative of food's place in the world. Looking closely at geographic, cultural and scientific factors, this book reveals how what we eat has transformed over the years from fuel to art.
