

## Lies, Damned Lies, And History (The Chronicles Of St Mary's Series Book 7)

The seventh book in the bestselling Chronicles of St Mary's series which follows a group of tea-soaked disaster magnets as they hurtle their way around History. If you love Jasper Fforde or Ben Aaronovitch, you won't be able to resist Jodi Taylor. Rules are meant to be broken, aren't they? 'I've done some stupid things in my time. I've been reckless. I've broken a few rules. But never before have I ruined so many lives or left such a trail of destruction behind me.' Max has never been one for rules. They tend to happen to other people. But this time she's gone too far. And everyone at St Mary's is paying the price. With the History Department disintegrating around her and grounded until the end of time, how can she ever put things right? Readers love Jodi Taylor: 'Once in a while, I discover an author who changes everything... Jodi Taylor and her protagonista Madeleine "Max" Maxwell have seduced me' 'A great mix of British proper-ness and humour with a large dollop of historical fun' 'Addictive. I wish St Mary's was real and I was a part of it' 'Jodi Taylor has an imagination that gets me completely hooked' 'A tour de force'

Business leaders rely on accounting data such as profit and calculated costs as a guide to whether they are making money. Should they? Accounting was designed to report financial performance not model cash flow. Accruals can disconnect cash flow from the timing and extent to which it occurs. Statements of cash flow do not provide insight into what was bought and how efficiently it was used. Costs and profits are not absolute, they change based on the model you use to calculate them. To manage cash, you must manage what you buy and how effectively you use it. The largest expenditure for most companies is capacity; space, labor, materials, equipment, and technology. Unless you model and manage capacity effectively, you will not achieve the cash flow results you seek. This book introduces capacity management, describes cash flow dynamics, and offers ideas about how to manage both. After reading it, you be able to see, understand, and manage cash flow as never before.

From a therapist and expert in emotional eating, the first book to explore the link between weight gain and women who do too much, complete with proven techniques for dropping pounds. Many women put too much on their plates, both literally and figuratively. In Nice Girls Finish Fat, psychotherapist Karen R. Koenig explains the link between the two and gives overweight women detailed advice on how to lose their extra baggage—both emotional and physical—by becoming more assertive in every aspect of life. For the millions of overweight women in America, diet and exercise just aren't cutting it. That's because many of these women have emotional issues buried deep beneath those stubborn pounds, issues that must be dealt with first if weight loss plans are to succeed. In this illuminating book, based on decades of professional experience, Karen Koenig offers on-the-page psychotherapy to help readers attack the roots of their food problems. With her engaging personal style, she teaches women about the biological connections between repressed emotions and eating, revealing the ways many women use food to stuff their anger, control their aggression, and assuage their feelings of guilt—all in the pursuit of being “nice.” Giving “good girls” permission to love themselves first, Koenig offers thought-provoking quizzes and questions to help readers identify and overcome the habits that have been holding them back. Empowering readers to gain the confidence they need to lose weight, Nice Girls Finish Fat not only shows women how to stop obsessing about food and develop healthy eating habits, it teaches readers skills to improve every aspect of their lives.

Definitive biography of one of the most significant journalists of the twentieth century. Reporting from such varied locations as postcolonial Africa, revolutionary Iran, the military dictatorships of Latin America and Soviet Russia, the Polish journalist and writer Ryszard Kapuściński was one of the most influential eyewitness journalists of the twentieth century. During the Cold War, he was a dauntless investigator as well as a towering literary talent, and books such as The Emperor and Travels with Herodotus founded the new genre of ‘literary reportage’. It was an achievement that brought him global renown, not to mention the uninvited attentions of the CIA. In this definitive biography, Artur Domośzawski shines a new light on the personal relationships of this intensely charismatic, deeply private man, examining the intractable issue at the heart of Kapuściński’s life and work: the relationship and tension between journalism and literature. In researching this book, Domośzawski, himself an award-winning foreign correspondent, enjoyed unprecedented access to Kapuściński’s private papers. The result traces his mentor’s footsteps through Africa and Latin America, delves into files and archives that Kapuściński himself examined, and records conversations with the people that he talked to in the course of his own investigations. Ryszard Kapuściński is a meticulous, riveting portrait of a complex man of intense curiosity living at the heart of dangerous times.

Ten Great Lies and How They Shaped the World

An Argumentation of Historians

Put Yourself First and Change Your Eating Forever

A personal exploration of the impact of colonisation

The ninth book in the bestselling Chronicles of St Mary's series which follows a group of tea-soaked disaster magnets as they hurtle their way around History. If you love Jasper Fforde or Ben Aaronovitch, you won't be able to resist Jodi Taylor. They say you shouldn't push your luck. Max gives her own luck a massive shove every day – and it's only a matter of time until luck pushes back... January 1536 – the day of Henry VIII's infamous jousting accident. Historians from St Mary's are there in force, recording and documenting. And, arguing – obviously. A chance meeting between Max and the Time Police leads to a plan of action. And, it's one that will have very serious consequences – especially for Max. Her private life is already more than a little rocky. But with Leon recovering and Matthew safe in the future there will never be a better opportunity to bring down Clive Ronan, once and for all. From Tudor England to the burning city of Persepolis – and from a medieval siege to a very nasty case of 19th century incarceration – Max is determined that this time, he will not escape. Readers love Jodi Taylor: 'Once in a while, I discover an author who changes everything... Jodi Taylor and her protagonista Madeleine "Max" Maxwell have seduced me' 'A great mix of British proper-ness and humour with a large dollop of historical fun' 'Addictive. I wish St Mary's was real and I was a part of it' 'Jodi Taylor has an imagination that gets me completely hooked' 'A tour de force'

The eighth book in the bestselling Chronicles of St Mary's series which follows a group of tea-soaked disaster magnets as they hurtle their way around History. If you love Jasper Fforde or Ben Aaronovitch, you won't be able to resist Jodi Taylor. Because, my dear Max, you dance on the edge of darkness ... and I don't think it would take very much for you to dance my way. When an old enemy appears out of nowhere with an astonishing proposition for Max – a proposition that could change everything Max is tempted. Very tempted. With an end to an old conflict finally in sight, it looks as if St Mary's problems are over with. Can they all now live happily ever after? As everything hangs in the balance, Max and St Mary's find themselves engulfed in tragedies worse than they could ever imagine. Is this the end? Readers love Jodi Taylor: 'Once in a while, I discover an author who changes everything... Jodi Taylor and her protagonista Madeleine "Max" Maxwell have seduced me' 'A great mix of British proper-ness and humour with a large dollop of historical fun' 'Addictive. I wish St Mary's was real and I was a part of it' 'Jodi Taylor has an imagination that gets me completely hooked' 'A tour de force'

'Jodi Taylor is quite simply the Queen of Time. Her books are a swashbuckling joyride through History' C. K. MCDONNELL 'A great mix of British properness and humour with a large dollop of historical fun' \*\*\*\*\* Meet St Mary's – a group of tea-soaked disaster magnets who hurtle their way around History. – If the whole of History lay before you, where would you go? When Dr Madeleine Maxwell is recruited by the St Mary's Institute of Historical Research, she discovers the historians there don't just study the past – they revisit it. But one wrong move and History will fight back – to the death. And Max soon discovers it's not just History she's fighting... BOOK 1 IN THE INTERNATIONALLY BESTSELLING CHRONICLES OF ST MARY'S SERIES For fans of Jasper Fforde, Doctor Who, Genevieve Cogman and Richard Osman's Thursday Murder Club Readers love Jodi Taylor: 'Once in a while, I discover an author who changes everything... Jodi Taylor and her protagonista Madeleine "Max" Maxwell have seduced me' 'A great mix of British proper-ness and humour with a large dollop of historical fun' 'Addictive. I wish St Mary's was real and I was a part of it' 'Jodi Taylor has an imagination that gets me completely hooked' 'A tour de force'

These essays explore the understanding of the boundary between fact and fiction in Ancient Greece and Rome and considers how far 'lying' was distinguished from 'fiction' in different periods and genres.

Early Greek poetry, Plato, and Greek and Roman historiography and novels are covered.

Lies, Damned Lies, and Marketing: Separate Fact from Fiction and Drive Growth

How to Lie with Statistics

**“Comprehensive, readable, and replete with current, useful examples, this book provides a much-needed explanation of how to be a critical consumer of the scientific claims we encounter in our everyday lives.”**—April Cordero Maskiewicz, Department of Biology, Point Loma Nazarene University
**“Seethaler’s book helps the reader look inside the workings of science and gain a deeper understanding of the pathway that is followed by a scientific finding—from its beginnings in a research lab to its appearance on the nightly news.”**—Jim Slotta, Ontario Institute for Studies in Education, University of Toronto
**“How I wish science was taught this way! Seethaler builds skills for critical thinking and evaluation. The book is rich with examples that not only illustrate her points beautifully, they also make it very interesting and fun to read.”**—Julia R. Brown, Director, Targacept, Inc.
**Don't Get Hoodwinked! Make Sense of Health and Science News...and Make Smarter Decisions!** Every day, there's a new scientific or health controversy. And every day, it seems as if there's a new study that contradicts what you heard yesterday. What's really going on? Who's telling the truth? Who's faking it? What do scientists actually know—and what don't they know? This book will help you cut through the confusion and make sense of it all—even if you've never taken a science class! Leading science educator and journalist Dr. Sherry Seethaler reveals how science and health research really work...how to put scientific claims in context and understand the real tradeoffs involved...tell quality research from junk science...discover when someone's deliberately trying to fool you...and find more information you can trust! Nobody knows what new controversy will erupt tomorrow. But one thing's for certain: With this book, you'll know how to figure out the real deal—and make smarter decisions for yourself and your family! Watch the news, and you'll be overwhelmed by snippets of badly presented science: information that's incomplete, confusing, contradictory, out-of-context, wrong, or flat-out dishonest. Defend yourself! Dr. Sherry Seethaler gives you a powerful arsenal of tools for making sense of science. You'll learn how to think more sensibly about everything from mad cow disease to global warming—and how to make better science-related decisions in both your personal life and as a citizen. You'll begin by understanding how science really works and progresses, and why scientists sometimes disagree. Seethaler helps you assess the possible biases of those who make scientific claims in the media, and place scientific issues in appropriate context, so you can intelligently assess tradeoffs. You'll learn how to determine whether a new study is really meaningful; uncover the difference between cause and coincidence; figure out which statistics mean something, and which don't. Seethaler reveals the tricks self-interested players use to mislead and confuse you, and points you to sources of information you can actually rely upon. Her many examples range from genetic engineering of crops to drug treatments for depression...but the techniques she teaches you will be invaluable in understanding any scientific controversy, in any area of science or health.
^ Potions, plots, and personalities: How science progresses, and why scientists sometimes disagree
^ Is it “cause” or merely coincidence? How to tell compelling evidence from a “good story”
^ There are always tradeoffs: How to put science and health claims in context, and understand their real implications
^ All the tricks experts use to fool you, exposed! How to recognize lies, “truthiness,” or pseudo-expertise

Science and technology are responsible for almost every advance in our modern quality of life. Yet science isn't just about laboratories, telescopes and particle accelerators. Public policy exerts a huge impact on how the scientific community conducts its work. Beyond Sputnik is a comprehensive survey of the field for use as an introductory textbook in courses and a reference guide for legislators, scientists, journalists, and advocates seeking to understand the science policy-making process. Detailed case studies—on topics from cloning and stem cell research to homeland security and science education—offer readers the opportunity to study real instances of policymaking at work. Authors and experts Homer A. Neal, Tobin L. Smith, and Jennifer B. McCormick propose practical ways to implement sound public policy in science and technology and highlight how these policies will guide the results of scientific discovery for years to come. Homer A. Neal is the Samuel A. Goudsmit Distinguished University Professor of Physics, Interim President Emeritus, and Vice President for Research Emeritus at the University of Michigan, and is a former member of the U.S. National Science Board. Tobin L. Smith is Associate Vice President for Federal Relations at the Association of American Universities. He was formerly Assistant Director of the University of Michigan and MIT Washington, DC, offices. Jennifer B. McCormick is an Assistant Professor of Biomedical Ethics in the Division of General Internal Medicine at the Mayo College of Medicine in Rochester, Minnesota, and is the Associate Director of the Research Ethics Resource, part of the Mayo Clinic's NIH Clinical Translational Science Award research programs. GO BEYOND SPUTNIK ONLINE--Visit www.science-policy.net for the latest news, teaching resources, learning guides, and internship opportunities in the 21st-Century field of science policy. "Beyond Sputnik is a readable, concise, yet remarkably comprehensive introduction to contemporary science policy. It is devoid of 'wonkishness' yet serves the needs of policymakers and students alike. Because science and technology policy is of central importance in the twenty-first century this accessible volume is a godsend." ---Charles M. Vest, President of the National Academy of Engineering and Vice Chair of the National Research Council of the National Academies of Sciences and Engineering "This highly researched book is a treasure trove for anyone concerned with science policy relating to such challenges as providing energy, preserving the environment, assuring healthcare, creating jobs, and more." ---Norman Augustine, retired Chairman and CEO of Lockheed Martin Corporation and recipient of the 2008 Vannevar Bush Award from the National Science Board "Science policy is a subject of growing importance in the United States, yet there has long been a vacuum among textbooks in the field. Beyond Sputnik fills it splendidly and will be greeted with enthusiasm by students and faculty alike. Even those who have practiced the art for years will learn from it." ---Albert Teich, Director of Science and Policy Programs at the American Association for the Advancement of Science "Homer A. Neal, Tobin L. Smith, and Jennifer B. McCormick have written a landmark work calling for a national effort to restore our nation's power in the fields of science, energy, and education, as we did in the remarkable year following Sputnik. The next preident should read Beyond Sputnik and accept this call to action as did President Eisenhower." ---Ambassador David M. Abshire, President of the Center for the Study of the Presidency, Cofounder and Vice Chairman of the Center for Strategic and International Studies, and President of the Richard Lounsbery Foundation "At last we have a text that tells the story from where A. Hunter Dupree left off; an excellent core text for courses in science and technology policy, DC policymakers, and anyone who needs to get up to speed in the field. . . . The book that we have all been waiting for." ---Christopher T. Hill, Professor of Public Policy and Technology, George Mason University

If you want to outsmart a crook, learn his tricks—Darrell Huff explains exactly how in the classic How to Lie with Statistics. From distorted graphs and biased samples to misleading averages, there are countless statistical dodges that lend cover to anyone with an ax to grind or a product to sell. With abundant examples and illustrations, Darrell Huff's lively and engaging primer clarifies the basic principles of statistics and explains how they're used to present information in honest and not-so-honest ways. Now even more indispensable in our data-driven world than it was when first published, How to Lie with Statistics is the book that generations of readers have relied on to keep from being fooled.

The tenth book in the bestselling Chronicles of St Mary's series which follows a group of tea-soaked disaster magnets as they hurtle their way around History. If you love Jasper Fforde, Ben Aaronovitch or Doctor Who, you won't be able to resist Jodi Taylor. 'Jodi Taylor does it again. A brilliant yomp through history' - Reader Review You can't change History. History doesn't like it. There are always consequences. Max is no stranger to taking matters into her own hands. Especially when she's had A Brilliant Idea. Yes, it will mean breaking a few rules, but - as Max always says - they're not her rules. Seconded to the Time Police to join in the hunt for the renegade Clive Ronan, Max is a long way from St Mary's. But life in the future does have its plus points - although not for long. A problem with the Time Map reveals chaos in the 16th century and the wrong Tudor queen on the throne. History has gone rogue, there's a St Mary's team right in the firing line and Max must step up. You know what they say. Hope for the best. But plan for the worst. Readers love Jodi Taylor: 'Once in a while, I discover an author who changes everything... Jodi Taylor and her protagonista Madeleine "Max" Maxwell have seduced me' 'A great mix of British proper-ness and humour with a large dollop of historical fun' 'Addictive. I wish St Mary's was real and I was a part of it' 'Jodi Taylor has an imagination that gets me completely hooked' 'A tour de force'

Lies, Damned Lies

A Chronicles of St Mary's short story that is sure to entertain. If you love Jasper Fforde or Ben Aaronovitch, you won't be able to resist Jodi Taylor. Astonishingly, Dr Bairstow has declared a holiday. Even more astonishingly - he's paying for it. Needless to say, there are strings attached. They have to record the 1601 performance of Hamlet, with Shakespeare himself in the role of the Ghost. It doesn't go well, of course. With Dr Bairstow and Mrs Mack turning a simple visit to a street market into a public brawl, Professor Rapson inadvertently stowing away on a vessel bound for the New World, and Shakespeare himself going up in flames, it would seem that Max, of all people, is the only one actually completing the assignment. Readers love Jodi Taylor: 'Once in a while, I discover an author who changes everything... Jodi Taylor and her protagonista Madeleine "Max" Maxwell have seduced me' 'A great mix of British proper-ness and humour with a large dollop of historical fun' 'Addictive. I wish St Mary's was real and I was a part of it' 'Jodi Taylor has an imagination that gets me completely hooked' 'A tour de force'

When it comes to your relationship with marketing, it's time to wipe the slate clean. You've been promised big results with a quick turnaround. You've been told that social media is a silver bullet for increased sales (so far, you haven't seen an impact). Your marketing team and vendors have overpromised and underdelivered, and you're disappointed. You're frustrated. Perhaps you're close to giving up on marketing entirely, but something tells you that you shouldn't—you just need to know how to use it wisely. In Lies, Damned Lies, and Marketing, Atul Minocha reveals the root causes of your frustration and provides you with the insight you need to utilize your marketing dollars for real results. He helps you understand why you need marketing, the important distinctions between marketing and sales, and how to attain the right blend of hard data and softer creativity to persuade your audience. Bringing with him more than thirty-five years of experience, Atul shows you how to make marketing work for you and finally achieve the results you've been waiting for.

From cats, spats and catacombs to the Wall Street shuffle, this book looks at how historical events didn't always unfold as we think they did. It takes the readers on a journey, century-by-century, showing how the truth we take for granted is a far cry from the facts. It is suitable for those who want to see the past as it was.

With the same ability to make personalities and events come alive that characterizes his classic Skid Road, Murray Morgan here tells the colorful story of Tacoma, the City of Destiny, and southern Puget Sound, where many major events of Washington's history took place. Drawing upon original journals and reports, Morgan builds Puget Sound around individuals, interweaving portraits of well-known historical figures with those who are more obscure but have a special significance: a colorful parade of saloonkeepers, politicians, union organizers, schemers, and swindlers. Morgan begins his account with the landing of Captain Vancouver in Puget Sound in 1792 and ends with the founding of Fort Lewis in 1916, the year the author was born. Between are the arrival of the transcontinental railroad, the boom-and-bust of lumber mills, the anti-Chinese riots of 1885, and more unique Northwest history that will intrigue both new arrivals and longtime residents. With a new introduction by historian and historic preservationist Michael Sean Sullivan, this redesigned edition of Puget Sound brings new life to Morgan's landmark history of the South Sound and the early days of Tacoma.

The Use of Literary Deceit in Early Christian Polemics

A Life

**A POPSUGAR Best YA! A Seventeen Best YA! “Ultrasmart.”—Publishers Weekly, starred review You should know, right now, that I’m a liar. They’re usually little lies. Tiny lies. Baby lies. Not so much lies as lie adjacent. But they’re still lies... Golden-haired Max Monroe has it all: beauty, friends, and tons of followers. Her picture-perfect existence seems eminently enviable. Except it’s all fake. “Max” is actually Kat Sanchez, a quiet and sarcastic 17-year-old living in drab Bakersfield, California. Nothing glamorous about her existence—just bad house parties, a crap school year, and the awkwardness of dealing with best friend Hari’s unrequited love. But while Kat’s life is far from perfect, she thrives as Max: doling out advice, sharing beautiful photos, networking with fans, even finding a real friend (or more?—Is Kat into girls!?) in a gorgeous Fat follower named Elena. But the closer Elena and “Max” get, the more Kat feels she has to keep up the façade. “Max” is the first time people have really listened to what Kat has to say—and after a lifetime of invisibility (including ice-cold indifference from her parents) can she really give that up? But when one of Kat’s posts goes viral and gets back to the girl she’s been stealing photos from, her entire world—real and fake—comes crashing down around her. Can she escape the web of lies she’s woven without hurting the people she loves? This insightful, provocative novel—hilarious and raw by turns—is the second book from Crystal Maldonado, author of smash-hit New England Book Award Winner Fat Chance, Charlie Vega. Brilliantly plotted, deeply sensitive, and rich in voice, No Filter and Other Lies deftly addresses FOMO, first love, one-sided love, frayed family ties, raced exclusion on social media, queer awakenings, and learning to live with—and love—yourself. Because the most powerful lies are the lies we tell ourselves. “Thought-provoking.”—POPSUGAR “Stunning.”—Nerdist “A first purchase.”—School Library Journal “Really genuine.”—YA Books Central “Brings me to tears.”—Latinx in Kid Lit “Bittersweet and complicated.”—Kirkus Reviews “Compelling and heartening.”—Shelf Awareness**
**A top behavioral geneticist makes the case that DNA inherited from our parents at the moment of conception can predict our psychological strengths and weaknesses. In Blueprint, behavioral geneticist Robert Plomin describes how the DNA revolution has made DNA personal by giving us the power to predict our psychological strengths and weaknesses from birth. A century of genetic research shows that DNA differences inherited from our parents are the consistent**

**life-long sources of our psychological individuality—the blueprint that makes us who we are. This, says Plomin, is a game changer. Plomin has been working on these issues for almost fifty years, conducting longitudinal studies of twins and adoptees. He reports that genetics explains more of the psychological differences among people than all other factors combined. Genetics accounts for fifty percent of psychological differences—not just mental health and school achievement but all psychological traits, from personality to intellectual abilities. Nature, not nurture is what makes us who we are. Plomin explores the implications of this, drawing some provocative conclusions—among them that parenting styles don't really affect children's outcomes once genetics is taken into effect. Neither tiger mothers nor attachment parenting affects children's ability to get into Harvard. After describing why DNA matters, Plomin explains what DNA does, offering readers a unique insider's view of the exciting synergies that came from combining genetics and psychology.**

**'A brilliant and important book ... Five Stars!' Mark Dolan, talkRADIO 'An important new book' Daily Express An alternative history of the world that exposes some of the biggest lies ever told and how they've been used over time. Lincoln did not believe all men were created equal. The Aztecs were not slaughtered by the Spanish Conquistadors. And Churchill was not the man that people love to remember. In this fascinating new book, journalist and author Otto English takes ten great lies from history and shows how our present continues to be manipulated by the fabrications of the past. He looks at how so much of what we take to be historical fact is, in fact, fiction. From the myths of WW2 to the adventures of Columbus, and from the self-serving legends of 'great men' to the origins of curry - fake history is everywhere and used ever more to impact our modern world. Setting out to redress the balance, English tears apart the lies propagated by politicians and think tanks, the grand narratives spun by populists and the media, the stories on your friend's Facebook feed and the tales you were told in childhood. And, in doing so, reclaims the truth from those who have perverted it. Fake History exposes everything you weren't told in school and why you weren't taught it.**

**Aleister Crowley's The Book of Lies is an important and complex work of occultism. Deciphering its many layers of hidden meaning requires a little patience and more than a beginner's knowledge of Thelema. For those interested in passing beyond the initiate stage, the reward offered by a deeper understanding of this challenging text is well worth the effort. This new 2018 edition of The Book of Lies from Kismet Publishing restores all of Crowley's original text, including the important keys, sigils and diagrams often omitted from reprints.**

**Lies, Damn Lies, and Statistics**

**A Narrative of Early Tacoma and the Southern Sound**

**Tell it to the Magistrate!**

**No Filter and Other Lies**

**Leading expert Brian Winston's new book is one of the first to take the ethical issue seriously. Looking at the recent crises of confidence in public service broadcasting and the controversy surrounding docusoaps, his major new study provides a foundational study of ethics and the documentary. This accessible but comprehensive treatment will be an important contribution to academic debates over the role of the media and to the ongoing debates in the documentary community.**

**This study explores the dynamic relationship between science, numbers and politics. What can scientific evidence realistically do in and for politics? The volume contributes to that debate by focusing on the role of "numbers" as a means by which knowledge is expressed and through which that knowledge can be transferred into the political realm. Based on the assumption that numbers are constantly being actively created, translated, and used, and that they need to be interpreted in their respective and particular contexts, it examines how numbers and quantifications are made 'politically workable', examining their production, their transition into the sphere of politics and their eventual use therein. Key questions that are addressed include: In what ways does scientific evidence affect political decision-making in the contemporary world? How and why did quantification come to play such an important role within democratic politics? What kind of work do scientific evidence and numbers do politically?**

**Here, by popular demand, is the updated edition to Joel Best's classic guide to understanding how numbers can confuse us. In his new afterword, Best uses examples from recent policy debates to reflect on the challenges to improving statistical literacy. Since its publication ten years ago, Damned Lies and Statistics has emerged as the go-to handbook for spotting bad statistics and learning to think critically about these influential numbers.**

**The war in Iraq may be remembered as the point at which the propaganda model perfected in the twentieth century stopped working: the world is too complex, information is too plentiful, and-as events in Iraq reveal- propaganda makes bad policy.**

**The Best War Ever is about a war that was devised in fantasy and lost in delusion. It highlights the futility of lying to oneself and others in matters of life and death. And it offers lessons to the current generation so that, at least in our time, this never happens again. As the team of Rampton and Stauber show in their first new book since President Bush's reelection, the White House seems to have fooled no one as much as itself in the march toward a needless (from a security perspective) war in Iraq. As the authors argue, one of the most tragic consequences of the Bush administration's reliance on propaganda is its disdain for realistic planning in matters of war. Repeatedly, when faced with predictions of problems, U.S.**

**polycymakers dismissed the warnings of Iraq experts, choosing instead to promulgate its version of the war through conservative media outlets and PR campaigns. The result has been too few troops on the ground to maintain security; failure to anticipate the insurgency; and oblivious disregard, even contempt, for critics in either party who attempted to assess the human and economic costs of the war. Even now that withdrawal seems imminent, however, the administration and its allies continue their cover-ups: downplaying civilian deaths and military injuries; employing marketing buzzwords like "victory" repeatedly to shore up public opinion; and botched attempts, through third-party PR firms, at creating phony news. The Bush administration entered Iraq believing that its moral, technological, and military superiority would ensure victory abroad, and that its mastery of the politics would win support at home. Instead, it found a morass of problems that do not lend themselves to moralistic, technological, or propaganda-based solutions.**

**Lies, Damn Lies and Documentaries**

**Lies, Damned Lies, and Testimony**

**Lies, Damned Lies and History**

**A deeply personal exploration of Australia's colonisation past, present and future by one of Australia's finest contemporary authors This is a difficult piece to write. It cuts closer to the bone than most of what I have written; closer to my bones, through my blood and flesh to the bones of truth and country: there is truth here, not disguised but in the open and that truth hurts. In Lies, Damned Lies acclaimed author Claire G. Coleman, a proud Noongar woman, takes the reader on a journey through the past, present and future of Australia, lensed through her own experience. Beautifully written, this literary work blends the personal with the political, offering readers an insight into the stark reality of the ongoing trauma of Australia's violent colonisation. Colonisation in Australia is not over.**

**Colonisation is a process, not an event - and the after-effects will continue while there are still people to remember it. PRAISE FOR CLAIRE G. COLEMAN 'An urgent examination of oneself and one's country. Written with a booming cadence that demands to be read aloud, again and again.' - Tara June Winch, Miles Franklin Award winning author of The Yield 'You may think you're woke, but Coleman never sleeps.' - Dr Tyson Yunkaporta, bestselling author of Sand Talk 'Coleman is unflinching.' - Sydney Review of Books on Terra Nullius? 'Coleman stuns with this imaginative, astounding debut about colonisation.' - Publishers Weekly on Terra Nullius 'A powerful, sobering piece of writing that makes us face an Australia we try to forget, but should always remember.' - Adelaide Review on Terra Nullius ?**

**An important and compelling book on the viral dissemination of misinformation in today's world. We are being swamped with dangerous nonsense. From 9/11 conspiracy theories to Holocaust denial to alternative medicine, we are all experiencing an epidemic of demonstrably untrue descriptions of the world. For Damian Thompson, the misinformation industry is wreaking havoc on the once-lauded virtues of science and reason. Unproven theories and spurious claims are forms of "counterknowledge," and, helped by the Internet, they are creating a global generation of misguided adherents who repeat these untruths and lend them credence. Thompson explores our readiness to accept falsehoods and the viral role of technology in spreading quack remedies, pseudo-history, and creationist fanaticism. Following in the footsteps of Richard Dawkins's The God Delusion, Sam Harris's The End of Faith, and Christopher Hitchens's God Is Not Great, Counterknowledge is a brilliant defense of scientific proof in an age of fabrication.**

**Sebastian St. Cyr, Viscount Devlin, has spent years unraveling his family's tragic history. But the secrets of his past will come to light in this gripping new historical mystery from the USA Today bestselling author of What the Devil Knows. March, 1815. The Bourbon King Louis XVIII has been restored to the throne of France, Napoleon is in exile on the isle of Elba, and Sebastian St. Cyr, Viscount Devlin, and his wife, Hero, have traveled to Paris in hopes of tracing his long-lost mother, Sophie, the errant Countess of Hendon. But his search ends in tragedy when he comes upon the dying Countess in the wasteland at the tip of the Île de la Cité. Stabbed—apparently with a stiletto—and thrown from the bastions of the island's ancient stone bridge, Sophie dies without naming her murderer. Sophie had been living in Paris under an assumed name as the mistress of Maréchal Alexandre McClellan, the scion of a noble Scottish Jacobite family that took refuge in France after the Forty-Five Rebellion. Once one of Napoleon's most trusted and successful generals, McClellan has now sworn allegiance to the Bourbons and is serving in the delegation negotiating on behalf of France at the Congress of Vienna. It doesn't take Sebastian long to realize that the French authorities have no interest in involving themselves in the murder of a notorious Englishwoman at such a delicate time. And so, grieving and shattered by his mother's death, Sebastian takes it upon himself to hunt down her killer. But what he learns will not only shock him but could upend a hard-won world peace.**

**The sixth book in the bestselling Chronicles of St Mary's series which follows a group of tea-soaked disaster magnets as they hurtle their way around History. If you love Jasper Fforde or Ben Aaronovitch, you won't be able to resist Jodi Taylor. What if the course of history was on your shoulders? 'To do what I do - go where I go - see what I see - it's a wonderful, unique, never-to-be-taken-for-granted privilege.' With great privilege comes great responsibility, something Max knows only too well, and as newly appointed Chief Training Officer at the St Mary's Institute of Historical Research, it's up to her to drum this guiding principle into her five new recruits. With a training programme that includes Joan of Arc, an illegal mammoth, a duplicitous Father of History, a bombed rat, Stone Age hunters and Dick the Turd, the question everyone is asking themselves is - what could possibly go wrong? Readers love Jodi Taylor: 'Once in a while, I discover an author who changes everything... Jodi Taylor and her**

**In this sequel to the acclaimed Damned Lies and Statistics, which the Boston Globe said "deserves a place next to the dictionary on every school, media, and home-office desk," Joel Best continues his straightforward, lively, and humorous account of how statistics are produced, used, and misused by everyone from researchers to journalists. Underlining the importance of critical thinking in all matters numerical, Best illustrates his points with examples of good and bad statistics about such contemporary concerns as school shootings, fatal hospital errors, bullying, teen suicides, deaths at the World Trade Center, college ratings, the risks of divorce, racial profiling, and fatalities caused by falling coconuts. More Damned Lies and Statistics encourages all of us to think in a more sophisticated and skeptical manner about how statistics are used to promote causes, create fear, and advance particular points of view.**

**Best identifies different sorts of numbers that shape how we think about public issues: missing numbers are relevant but overlooked; confusing numbers bewilder when they should inform; scary numbers play to our fears about the present and the future; authoritative numbers demand respect they don't deserve; magical numbers promise unrealistic, simple solutions to complex problems; and contentious numbers become the focus of data duels and stat wars. The author's use of pertinent, socially important examples documents the life-altering consequences of understanding or misunderstanding statistical information. He demystifies statistical measures by explaining in straightforward prose how decisions are made about what to count and what not to count, what assumptions get made, and which figures are brought to our attention. Best identifies different sorts of numbers that shape how we think about public issues. Entertaining, enlightening, and very timely, this book offers a basis for critical thinking about the numbers we encounter and a reminder that when it comes to the news, people count—in more ways than one.**

**Revised and updated edition that analyses how the Office of National Drug Control Policy employs statistics to misleadingly claim the War on Drugs is a success. First published in 2007, Lies, Damned Lies, and Drug War Statistics critically analyzed claims made by the Office of National Drug Control Policy (ONDCP), the White House agency of accountability in the nation's drug war since 1989, as found in the six editions of the annual National Drug Control Strategy between 2000 and 2005. In this revised and updated second edition of their critically acclaimed work, Matthew B. Robinson and Renee G. Scherlen examine seven more recent editions (2006-2012) to once again determine if ONDCP accurately and honestly presents information or intentionally distorts evidence to justify continuing the drug war. They uncover the many ways in which ONDCP manipulates statistics and visually presents that information to the public.**

**Their analysis demonstrates a drug war that consistently fails to reduce drug use, drug fatalities, or illnesses associated with drug use; fails to provide treatment for drug-dependent users; and drives up the prices of drugs. They conclude with policy recommendations for reforming ONDCP's use of statistics, as well as how the nation fights the war on drugs. Praise for the First Edition "Lies, Damned Lies, and Drug War Statistics is surprisingly easy to read, and Robinson and Scherlen have done a huge favor not only to critics of current drug policy by compiling this damning critique of ONDCP claims, but also to anyone interested in how data is compiled, presented, and misused by bureaucrats attempting to guard their domains. It should be required reading for members of Congress." - Drug War Chronicle Book Review "The authors have performed a valuable service to our democracy with their meticulous analysis of the White House ONDCP public statements and reports. They have pulled the sheet off what appears to be an official policy of deception using clever and sometimes clumsy attempts at statistical manipulation. This document, at last, gives us a map of the truth." - Mike Gray, author of Drug Crazy: How We Got into This Mess and How We Can Get Out "Robinson and Scherlen make a valuable contribution to documenting how ONDCP fails to live up to basic standards of accountability and consistency." - Ethan Nadelmann, Executive Director, Drug Policy Alliance**

**From the author of Zero, comes this "admirable salvo against quantitative bamboozlement by the media and the government" (The Boston Globe) In Zero, Charles Seife presented readers with a thrilling account of the strangest number known to humankind. Now he shows readers how the power of skewed metrics-or "proofiness"- is being used to alter perception in both amusing and dangerous ways. Proofiness is behind such bizarre stories as a mathematical formula for the perfect butt and sprinters who can run faster than the speed of sound. But proofiness also has a dark side: bogus mathematical formulas used to undermine our democracy-subverting our justice system, fixing elections, and swaying public opinion with lies. By doing the real math, Seife elegantly and good-humoredly scrutinizes our growing obsession with metrics while exposing those who misuse them.**

**The fifth book in the bestselling Chronicles of St Mary's series which follows a group of tea-soaked disaster magnets as they hurtle their way around History. If you love Jasper Fforde or Ben Aaronovitch, you won't be able to resist Jodi Taylor. A Fete Worse Than Death... The St Mary's Institute of Historical Research has finally recovered from its wounds and it's business as usual for those rascals in the History Department. From being trapped in the Great Fire of London to an unfortunately timed comfort break at Thermopylae, which leaves the fate of the western world hanging in the balance, Max must struggle to get History back on track. But first, they must get through the St Mary's Fete - which is sure to end badly for everyone. Only one thing is certain, life at St Mary's is never dull! Readers love Jodi Taylor: 'Once in a while, I discover an author who changes everything... Jodi Taylor and her protagonist Madeleine**

History in a Post-Truth World

Damned Lies and Statistics

History in a Post-Truth World: Theory and Praxis explores one of the most significant paradigm shifts in public discourse. A post-truth environment that appeals primarily to emotion, elevates personal belief, and devalues expert opinion has important implications far beyond Brexit or the election of Donald Trump, and has a profound impact on how history is produced and consumed. Post-truth history is not merely a synonym for lies. This book argues that indifference to historicity by both the purveyor and the recipient, contempt for expert opinion that contradicts it, and ideological motivation are its key characteristics. Taking a multidisciplinary approach, this work explores some of the following questions: What exactly is post-truth history? Does it represent a new phenomenon? Does the historian have a special role to play in preserving public memory from 'alternative facts'? Do academics more generally have an obligation to combat fake news and fake history both in universities and on social media? How has a 'post-truth culture' impacted professional and popular historical discourse? Looking at theoretical dimensions and case studies from around the world, this book explores the violent potential of post-truth history and calls on readers to resist.
