

Look At Me! (New Baby)

My baby is turning one year old, and I'm sad. Her first year went by so quickly, and it almost seemed rough. Didn't I just find out I was pregnant with it? Wasn't I working with her moments ago? Look, here I am, walking around the labor and delivery ward, right after the waters come out, waiting for the heavy contractions to start. It certainly wouldn't have been nearly a year since we brought her home from the hospital. It was all a blur. Maybe time feels like it's speeding up immeasurably because she's our third child. With baby number one, that first year lasted forever! But this time, we anticipate sleepless nights, causeless crying (baby and me), and all the challenges that come with giving birth to a newborn. It was easy to add to our family. I even enjoyed waking up with her at night, because I knew this might be the last time I'd do it. When I think of her early days and weeks, all I remember is that I fell in love. Sure, I was exhausted, but having her with us was pretty cool. Then all of a sudden, our daughter was a month old, then two months old, then three years old. And soon we no longer had a newborn. She was growing up before our eyes. Every morning I would walk to her room, and see a new baby smiling at me. Every day she looked older, older and less childish. I couldn't believe how fast time was going. I would shake her at night, and whisper, "You don't grow up too fast." On more than one occasion I cried a little, looking at her, lamenting that her childhood was ending so early. I'm four months old, then five, and six, and seven - well, you know where to go with this.

This is a true story of a woman who grew up trying to buy love, and to be accepted. She ran from her troubles. She ran from men. She ran from the Lord. The more she ran the more trouble she got into, until she fell into a pit, which was her death bed. However, the Lord delivered her. She is

no longer running because she ran into the right hands, the Lords. This story will touch your heart. This story will show you what God can do. He can turn a tragedy into a triumph. He can turn your life completely around, like the fairy tales of Cinderella, and Beauty and the Beast. Only, this is the real life of a woman who once was blind, but now she sees.

Look! The sun is rising at baby's house. In this delightful follow-up to Look, Look! and Look at the Animals!, a baby's day unfolds. Bold, black-and-white illustrations and a warm, simple text are perfect for sharing with little ones just beginning to look and learn. An ideal shower gift! In his ESSENCE Magazine bestseller, "Blood Kin, A Savannah Story," Robert T.S. Mickles introduced readers all over the world to the residents of Woodloe Plantation as they grappled with the violent chaos of the 1860s Civil War and struggled to adapt to the changes taking place in their lives as well as to simply survive. In "Isaiah's Tears," part two of the author's Savannah Stories, we meet fifteen-year-old Isaiah Jones. For Isaiah, the end of slavery in the United States in 1865 means the beginning of a long but very challenging life as a free man. Following the death of both his parents and the acquisition of his sudden unexpected freedom, Isaiah has to choose between life as he has always known it--and life as an uncertain adventure in a new and uncertain world. His story, as he journeys from boyhood to manhood, is at times laugh out loud comical and at other times heartbreakingly tragic.

A Mighty Girl Best Book of 2020! From debut author Sarah Allen comes a pitch-perfect, heartwarming middle grade novel about growing up, finding yourself, and loving people with everything you're made of. Twelve-year-old Libby Monroe is great at science, being optimistic, and talking to her famous, accomplished friends (okay, maybe that last one is only in her head). She's not great at playing piano, sitting still, or figuring out how to say the right thing at the right time in real life. Libby was born with Turner Syndrome, and that makes some things hard. But she has lots of people who love her, and that makes her pretty lucky. When her big sister Nonny tells her she's pregnant, Libby is thrilled—but worried. Nonny and her husband are in a financial black hole, and Libby knows that babies aren't always born healthy. So she strikes a deal with the universe: She'll enter a contest with a project about Cecilia Payne, the first person to discover what stars are made of. If she wins the grand prize and gives all that money to Nonny's family, then the baby will be perfect. Does she have what it takes to care for the sister that has always cared for her? And what will it take for

the universe to notice?

Running into the Arms of Love

Katharina's husband isn't coming home for the weekend—again—so she's on her own. When their chaotic daughter Helli has a nosebleed, Kat has to dash off to school to pick her up. Then their son, Alex, announces he's bringing his new girlfriend home for the first time. Kat's best friend from college is coming around tonight too, and she's wondering if she should try to seduce him—but first she needs to do the shopping, the vacuuming and the laundry, deal with an exploding clothes-dryer, find their neighbour's severed thumb in the front yard and catch a couple of escaped rodents. When she's got all that sorted, perhaps she'll have time to think about the thing she's been trying not to think about—the lump she's just found in her breast. Because you can't just die and leave a huge mess for someone else to clean up...can you? And wasn't there supposed to be more to life than this? Mareike Krügel lives in Schleswig-Holstein with her husband and their two children. She has received numerous literary awards, including the

Friedrich Hebbel Prize. Look at Me is her fourth novel, and the first to be translated into English. 'Funny, moving and thought-provoking.' BookMooch 'Kat and her family are deeply flawed but likeable characters; you want to cheer them on...A good read, suitable for long, dark evenings.' Otago Daily Times 'A quirky ride that masterfully blends a sardonic sense of humour with a deeply embedded fear of mortality.' Readings 'For all the chaos of Katharina's life and for all the humour of her narrative voice, this well-written and surprisingly complex novel has an unexpected gravitas.' Age 'Definitely one of those "read in one sitting", "hard to put down" books.' Nudge Books 'An enjoyable and thought provoking read.' MindFood 'With a heroine so well-realised she feels like a friend, and piercingly true ruminations on the strange courses that life can take, Look At Me is a wildly impressive English-language debut.' Culturefly 'Full of whimsical inner monologues and snappy one liners.' Booklist 'Krügel knows her way around both the salty and sweet of marriage and motherhood.' Kirkus Reviews

Comic and television star Tim Conway (McHale's Navy, The Carol Burnett Show, The Apple Dumpling Gang) enjoyed enormous popular appeal, including a wide readership for his best-selling memoir, What's So Funny? In her own humorous, loving, and surprising memoir, Tim's eldest child, Kelly, reveals that

the Conway home life was as riotous and engaging as some of her father's best-known comedy sketches. Kelly Conway allows readers an intimate look at a supremely American childhood, from the studios of Television City in Los Angeles to the midwestern pleasures of her mom and dad's hometowns. My Dad's Funnier Than Your Dad is her love letter to her father and mother, as well as an account of the warm, laugh-filled world in which she spent her childhood. The book portrays a Cheaper by the Dozen-style upbringing, when she and her five younger brothers spent their lives playing together within a protective cocoon of affection and love. Her dad acted as the ringmaster of their circus. What kind of dad builds his kids a go-cart track in the backyard of his Encino residence by himself, not hiring a crew of professionals to do it? How about a dad that circles the block when his kids go off to their first day of grade school, fretting and fussing that they're okay away from home? What can you say about a famous father who lived not for his celebrity but kept himself firmly grounded in family? While not all puppy dogs and rainbows—the Conways divorced when the author was seventeen—this is nevertheless a warm-hearted memoir of a man who was as funny off the set as on.

Can psychoanalysis help people control their destinies? Using empirical evidence from neuroscience, Lucy Holmes makes a powerful argument that it can. This book considers the various ways in which destiny is linked to the repetition compulsion, and how free association in psychoanalysis can literally change the mind in ways that can help people reshape and take control of the future. Freud's psychoanalysis is revealed here to be startlingly modern in its consonance with the latest findings in the study of the brain. The compulsion to repeat can propel human beings toward destinies they would never have

consciously chosen. The tenacity of this human tendency can inhibit our ability to meet life's challenges. These challenges include our gender; an inability to master the complexities of loving and the strains of marriage; fears regarding the impertinence of being successful; the unconscious, reptilian pleasure we derive from going to war and raping the planet; and the inexorable decline and decay of our mortal flesh. This book argues that the evolved talking that occurs in the psychoanalytic process can change the chemistry and structure of the brain in a way that helps the talker face these challenges and take charge of his or her own destiny. The author presents a cogent hypothesis spanning brain and mind to clarify how the basic rule of psychoanalysis - "just say everything" - can actually cure. This will appeal to mental health professionals such as psychoanalysts and psychotherapists, and students at the post-graduate level, as well as the general interested reader.

A thought-provoking combination of practical parenting information and scientific analysis, *Our Babies, Ourselves* is the first book to explore why we raise our children the way we do--and to suggest that we reconsider our culture's traditional views on parenting. New parents are faced with innumerable decisions to make regarding the best way to care for their baby, and, naturally, they often turn for guidance to friends and family members who have already raised children. But as scientists are discovering, much of the trusted advice

that has been passed down through generations needs to be carefully reexamined. In this ground-breaking book, anthropologist Meredith Small reveals her remarkable findings in the new science of ethnopediatrics. Professor Small joins pediatricians, child-development researchers, and anthropologists across the country who are studying to what extent the way we parent our infants is based on biological needs and to what extent it is based on culture--and how sometimes what is culturally dictated may not be what's best for babies. Should an infant be encouraged to sleep alone? Is breast-feeding better than bottle-feeding, or is that just a myth of the nineties? How much time should pass before a mother picks up her crying infant? And how important is it really to a baby's development to talk and sing to him or her? These are but a few of the important questions Small addresses, and the answers not only are surprising, but may even change the way we raise our children.
