Anthony's an eligible bachelor, and he's finally been convinced to put aside his womanizing ways to settle down. He needs a wife and children to share his wealth with, and his friend convinces him that an oriental woman named Feng Ling is the submissive woman he needs. When he sees her step out of the train, he notices a few things straight away. She's shy. She's pretty. She's definitely not Chinese. Gianna is a headstrong young woman, and she's there for a reason. But she'll have to learn to be submissive if she plans on living under Anthony's roof, where even the slightest infraction can lead to her being bent over his lap and punished in a way she's ashamed to say she enjoys. She'll need to choose between what her head is telling her and what her heart is telling her when she's faced with a dilemma that threatens to change her live - and marriage - forever. One leap of faith will change her life forever. This is an explicit historical romance. This book contains multiple sex scenes involving domestic discipline, spanking, power plays, and an alpha male who's not afraid to take what belongs to him.

Leverage digital technologies to achieve competitive advantage through market-leading processes, products and services, customer relationships, and innovation How does Information Technology enable competitive advantage? Digital Disciplines details four strategies that exploit today's digital technologies to create unparalleled customer value Using non-technical language, this book describes the blueprints that any company, large or small, can use to gain or retain market leadership, based on insights derived from examining modern digital giants such as Amazon, Netflix, and Uber, established firms such as Burberry, GE, Nike, and Procter & Gamble, and lesser-known innovators such as Alvio, Fruition Sciences, Opower, and Quirky. Companies can develop a competitive edge through four digital disciplines—information excellence, solution leadership, collective

intimacy, and accelerated innovation—that exploit cloud computing, big data and analytics, mobile and wireline networks, social media, and the Internet of Things. These four disciplines extend and update the value disciplines of operational excellence, product leadership, and customer intimacy originally defined by Michael Treacy and Fred Wiersema in their bestselling business classic *The Discipline of Market Leaders*. Operational excellence must now be complemented by information excellence—leveraging automation, information, analytics, and sophisticated algorithms to make processes faster, better, and more cost-effective, seamlessly fuse digital and physical worlds, and generate new revenue through techniques such as exhaust data monetization. Product leadership must be extended to solution leadership—smart digital products and services ranging from wind turbines and wearables to connected healthcare, linked to each other, cloud services, social networks, and partner ecosystems, focused on customer outcomes and creating new experiences and transformations. Customer intimacy is evolving to collective intimacy—face-to-face relationships not only go online, but are collectively analyzed to provide individually targeted recommendations and personalized services ranging from books and movies to patient-specific therapies. Traditional innovation is no longer enough—accelerated innovation goes beyond open innovation to exploit crowdsourcing, idea markets, innovation networks, challenges, and contest economics to dramatically improve processes, products, and relationships. This book provides a strategy framework supported by empirical data, case studies, deep insights, and pragmatic steps for any enterprise to

and attain market leadership in today's digital era. Ending Zero Tolerance answers the calls of grassroots communities pressing for integration and increased education funding with a complete rethinking of school discipline. In the era of zero tolerance, we are flooded with stories about schools issuing draconian punishments for relatively innocent behavior. One student was suspended for chewing a Pop-Tart into the shape of a gun. Another was expelled for cursing on social media from home. Suspension and expulsion rates have doubled over the past three decades as zero tolerance policies have become the normal response to a host of minor infractions that extend well beyond just drugs and weapons. Students from all demographic groups have suffered, but minority and special needs students have suffered the most. On average, middle and high schools suspend one out of four African American students at least once a year. The effects of these policies are devastating. Just one suspension in the ninth grade doubles the likelihood that a student will drop out. Fifty percent of students who drop out are subsequently unemployed. Eighty percent of prisoners are high school

drop outs. The risks associated with suspension and expulsion are so high that, as a practical matter, they amount to educational death penalties, not behavioral correction tools. Most important, punitive discipline policies undermine the quality of education that innocent bystanders receive as well—the exact opposite of what schools intend. Derek Black, a former attorney with the Lawyers ’ Committee for Civil Rights Under Law, weaves stories about individual students, lessons from social science, and the outcomes of courts cases to unearth a shockingly irrational system of punishment. While schools and legislatures have proven unable and unwilling to amend their failing policies, Ending Zero Tolerance argues for constitutional protections to check abuses in school discipline and lays out theories by which courts should re-engage to enforce students ’ rights and support broader reforms.

Can she make a new life for herself by stealing a dead woman's identity? Elizabeth Taylor has been a handful of trouble all her life. In Boston, she usually found herself in one minor mishap after another. The night her problems got too big for her to wiggle out of with a flutter of lashes and a smile, she finds the only course of action to save herself is to hightail it out of the city. Figuring it is time to see what has her brother so

taken with small town America, she heads west. By the time she arrives in Grover Town, she has a new name, a position, and a husband. But avoiding her brother's suspicions isn't her only issue. Keeping out from under her husband's firm hand seems impossible. Who ever knew that a man could be so stuck on truth? As one lie after another gets unpacked, she may lose the one thing that has become important to her, her husband's love. Doc Martin Clarkston has lived in Grover Town all his life, except the years he left to get his medical training. With a fresh new clinic and things booming in town, he's ready to settle down. However, he doesn't have time for courting, so ordering himself a wife and finding one trained as a nurse is even better. When the lovely Beth arrives off the train, she isn't what he expected. She doesn't seem at all as she'd professed to be in her letters, dressed more like a woman expecting to receive visitors in a parlor than one ready to roll up her sleeves and treat the Mid-west's ill. He learns quickly that spoiled and falsehoods go hand-in-hand with his wife. Educating her in all things soon becomes his main priority. And when her past catches up to her, Clarkston is prepared to fight to protect what's his.

**They'd found him with an Indian arrow in his back. What was a woman supposed to do with one dead husband, one untended farm, and zero options? Strength, sass, and a never-give-up attitude had served Sophie well, but after the death of her strict, but loving, Clive, she'd need a lot more than those qualities to survive. There might be one way though, one last desperate option... and they called it the Widow Wagon. Widows and their children could purchase safe passage in a**

**covered wagon to the Oregon Territory - where they would all meet up with the strong, determined men looking for mail order brides. The Widow Wagon might be one man's last, best hope. For Daniel Weston, losing his beloved wife had broken more than his heart, it had broken his confidence that he could conquer the west. From the first moment he set eyes on Sophie he knew he wanted her, to make her his in every way. Her dramatic curves, bewitching eyes and fiery temper drew him, called to him, fired his possessive lust. But would that attraction be enough? He could already tell there was going to be a reckoning - and that reckoning would be the heated meeting of his work-roughened palm with her soft, bare bottom. Yes, she was beautiful, intelligent, and with a little more attitude than would be good for the health of her backside, but Daniel thought he had what it took to break the spirited filly. What's more, could Daniel dare hope for a second chance? How she reacted that first time he bent her over his lap - or strung her up in his barn - might be the key to whether or not this marriage of convenience in the American west might bloom into something so much more. Would this young, headstrong, mail-order bride allow herself to be molded, tempered, and disciplined into**
